

## **NATIONAL REPORT ON THE IMPLEMENTATION OF THE RAMSAR CONVENTION ON WETLANDS**

**National Reports to be submitted to the 12<sup>th</sup> Meeting  
of the Conference of the Contracting Parties,  
Uruguay, 2015**

Please submit the completed National Report in Microsoft Word format (.doc, 97-2003), as an electronic file (not a printed copy) and preferably by e-mail, to Alexia Dufour, Regional Affairs Officer, Ramsar Secretariat ([dufour@ramsar.org](mailto:dufour@ramsar.org)) by **1 September 2014**.

## The structure of the COP12 National Report Format

The COP12 National Report Format (NRF) is in four sections:

**Section 1** provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

**Section 2** is a 'free-text' section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

**Section 3** provides the 66 implementation indicator questions, grouped under each Convention implementation strategy in the Strategic Plan 2009-2015, and with an optional 'free-text' section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

**Section 4** is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

## General guidance for completing and submitting the COP12 National Report Format

**IMPORTANT – PLEASE READ THIS GUIDANCE SECTION BEFORE STARTING TO COMPLETE THE NATIONAL REPORT FORMAT**

1. All Sections of the COP12 NRF should be completed in one of the Convention's official languages (English, French, Spanish).
2. The deadline for submission of the completed NRF is **1 September 2014**. It will not be possible to include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP12.
3. All fields with a pale yellow background  must be filled in.
4. Fields with a pale green background  are free-text fields in which to provide additional information, if the Contracting Party so wishes. Although providing information in these fields is optional, Contracting Parties are encouraged to provide such additional information wherever possible and relevant, as it helps us understand Parties' progress and activity more fully, to prepare the best possible global and regional implementation reports to COP.
5. The Format is created as a form in Microsoft Word. You are only able to submit replies and information in the yellow or green boxes, as all other parts of the form are locked to ensure that the structure and wording of indicators will remain uniform and comparable for all Parties.
6. To select a yellow or green field you wish to complete, move the cursor over the relevant part of the form and left-click the mouse. The cursor will automatically move to the next field available.
7. To move down through the sequence of fields, you can also use the 'Tab' key on the computer keyboard.

8. For a 'free-text' field, you can type in whatever information you wish. Note that there is only limited facility within the Microsoft 'form' format to make editorial changes in the 'free-text' box once text has been entered. Therefore, if you wish to amend any of the text you have put in a green or yellow 'free-text' box, you should cut and paste the existing text into a separate document, make all the amendments, and then cut and paste the revised text back into the box.
9. Certain keyboard characters interfere with the automatic entry of data into the Secretariat's database. For that reason, please **do not use double quote marks " "** in the 'free-text' fields. Please **only use single quote marks ' '**. For the same reason, please **only use simple text in the 'free-text' fields: they cannot accept formatting, colours or objects such as tables and images.**
10. For each of the 'indicator questions' in Section 3, a drop-down menu of answer options is provided. These vary between indicators, depending on the question, but are generally of the form: 'Yes', 'No', 'Partly', 'In progress'. This is necessary so that statistical comparisons can be made of the replies.
11. For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the green additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).
12. To select an answer to an indicator question, use the Tab key, or move the cursor over the relevant yellow box and left-click the mouse. The drop-down menu of answer options will appear. Left-click the mouse on the answer option you choose, and this will appear in the centre of the yellow box.
13. An NRF is not usually completed by one person alone: for many indicators it is best for the principal compiler to consult with colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP11 to ensure the continuity and consistency of information provided.
14. After each session, **remember to save the file** in Microsoft Word, .doc, 97-2003 format. A recommended filename structure is: COP12NRF [Country] [date], for example: COP12NRFSpain13July2014.doc
15. After the NRF has been completed, please **send it in this format to Alexia Dufour, Regional Affairs Officer, Ramsar Convention Secretariat, preferably by e-mail (dufour@ramsar.org).**
16. The completed NRF **must be accompanied by a letter or e-mail message in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP12 National Report.**
17. If you have any questions or problems, please contact the Ramsar Secretariat for advice (e-mail as above).

## SECTION 2: GENERAL SUMMARY OF NATIONAL IMPLEMENTATION PROGRESS AND CHALLENGES

**REMINDER: Please do not use double quote marks “ ”: use single quotes ‘ ’ instead.**

**In your country, in the past triennium (i.e., since COP11 reporting):**

**A. What have been the five most successful aspects of implementation of the Convention?**

- 1) There was a great increase in natural freshwater returned to use by wetlands in Israel, that had been captured in the past for other uses. From a total of about 35 million cubic meters in 2012, to almost 90 million in 2014.
- 2) The amount of water supplied artificially to support wetlands in Israel was increased greatly. From a total of 10 million cubic meters in 2012, to a total of 31 million in 2014. The allocated amounts are based on signed agreements between the INPA, the Ministry of Environment and the Water Authority.
- 3) There was a significant improvement in removal of contaminants and pollutants from wetlands from 115 pollution point sources in 2009 to 80 in 2013.
- 4) There was a significant increase in activities for rehabilitation and restoration of wetland habitats, in physical, hydrological and biological terms.
- 5) There was a significant increase in activities in wetlands to control and remove invasive plants and over-abundant plants that negatively effect the biodiversity.

**B. What have been the five greatest difficulties in implementing the Convention?**

- 1) There was an ongoing drought in Israel which increased the difficulty in completing water agreements for sufficient freshwater being allocated to wetlands.
- 2) There are still wetland sites in Israel that suffer from diffuse and point-source pollution.
- 3) There are difficulties in acquiring control of large-scale wetland sites for needed rehabilitation and restoration. not clear what this is referring to. what difficulties . remove
- 4) Due to Israel being a small country, anthropogenic influences are greatly amplified and as the human population increases so does its impact upon the wetlands, e.g. recreational uses in sensitive sites, invasive species, increased fragmentation, reduced buffers around protected sites.
- 5) Acquiring appropriate budgets for large-scale projects from all relevant stakeholders.

**C. What are the five priorities for future implementation of the Convention?**

- 1) Water quality improvement.
- 2) Increased quantity of water from natural flow regime to the wetlands.
- 3) Improvement of habitat structure through restoration and rehabilitation of wetland sites (e.g. increase habitat complexity).
- 4) Improvement of habitat function (for example by controlling invasive plant species).
- 5) Management aimed at improving the conservation status of Red Book (endangered) plants in wetlands.

**D. Do you (AA) have any recommendations concerning implementation assistance from the Ramsar Secretariat?**

**E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)**

.....

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Ramsar, Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), CITES, and World Heritage Convention), and UNCCD and UNFCCC?

.....

G. How can implementation of the Ramsar Convention be better linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity)?

H. Do you (AA) have any other general comments on the implementation of the Convention?

.....

I. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report:

Israel Nature and Parks Authority.

## SECTION 3: INDICATOR QUESTIONS AND FURTHER IMPLEMENTATION INFORMATION

### REMINDER: Guidance for completing this section

1. For each 'indicator question', please select one answer from the 'drop-down' list in the yellow box.
2. If you wish to add any additional information on a specific indicator, please provide this information in the green 'free-text' boxes below the indicator questions.
3. If you wish to amend any of the text you have put in a green 'free-text' box, you should cut and paste the existing text into a separate file, make the amendments, and then cut and paste the revised text back into the green box.
4. Some characters used in the free text box prevent the automatic data entry into our database National Reports. For that reason, **please do not use double quote marks “ ” in the free text boxes. Use single quotes ‘ ’. Text in the ‘free text’ boxes should be simple text only: they cannot accept formatting, colours or objects such as tables and images.**
5. To help Contracting Parties refer to relevant information they provided in their National Report to COP11, for each appropriate indicator a cross-reference is provided to the equivalent indicator(s) in the COP11 NRF, shown thus: {x.x.x}
6. Where appropriate, a cross-reference is also provided to the relevant Key Result Area (KRA) relating to Contracting Parties implementation in the Strategic Plan 2009-2015.
7. Only Strategic Plan 2009-2015 Strategies and KRAs for which there are significant implementation actions for Contracting Parties are included in this reporting format; those parts of the Strategic Plan that do not refer directly to Parties are omitted.

## GOAL 1. THE WISE USE OF WETLANDS

**STRATEGY 1.1 Wetland inventory and assessment.** *Describe, assess and monitor the extent and condition of all types of wetlands as defined by the Ramsar Convention and wetland resources at relevant scales, in order to inform and underpin implementation of the Convention, in particular in the application of its provisions concerning the wise use of all wetlands.*

(If 'Yes', please give the title and date of the policy in the green text box)

C - In preparation

1.3.1 Additional information:

A new overall National Freshwater Policy is being prepared in Israel and is in an advanced stage of completion including participatory planning with all relevant stakeholders. For the first time there is a chapter relating to the right of Nature to receive ample freshwater which is based on the need to give priority to wetlands and is based on the habitat's potential for ecological rehabilitation. The Ministry of Environmental Protection, the INPA and the Israel Water Authority are financing and implementing this policy.

1.3.2 Have wetland issues been incorporated into other national strategies and planning processes, including:

- a) Poverty eradication strategies
