

NATIONAL REPORT ON THE IMPLEMENTATION OF THE RAMSAR CONVENTION ON WETLANDS

**National Reports to be submitted to the 12th Meeting
of the Conference of the Contracting Parties,
Uruguay, 2015**

Please submit the completed National Report in Microsoft Word format (.doc, 97-2003), as an electronic file (not a printed copy) and preferably by e-mail, to Alexia Dufour, Regional Affairs Officer, Ramsar Secretariat (dufour@ramsar.org) by **1 September 2014**.

The structure of the COP12 National Report Format

The COP12 National Report Format (NRF) is in four sections:

Section 1 provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

Section 2 is a ‘free-text’ section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

Section 3 provides the 66 implementation indicator questions, grouped under each Convention implementation strategy in the Strategic Plan 2009-2015, and with an optional ‘free-text’ section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

Section 4 is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

General guidance for completing and submitting the COP12 National Report Format

IMPORTANT – PLEASE READ THIS GUIDANCE SECTION BEFORE STARTING TO COMPLETE THE NATIONAL REPORT FORMAT

1. All Sections of the COP12 NRF should be completed in one of the Convention’s official languages (English, French, Spanish).
2. The deadline for submission of the completed NRF is **1 September 2014**. It will not be possible to include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP12.
3. All fields with a pale yellow background  must be filled in.
4. Fields with a pale green background  are free-text fields in which to provide additional information, if the Contracting Party so wishes. Although providing information in these fields is optional, Contracting Parties are encouraged to provide such additional information wherever possible and relevant, as it helps us understand Parties’ progress and activity more fully, to prepare the best possible global and regional implementation reports to COP.
5. The Format is created as a form in Microsoft Word. You are only able to submit replies and information in the yellow or green boxes, as all other parts of the form are locked to ensure that the structure and wording of indicators will remain uniform and comparable for all Parties.
6. To select a yellow or green field you wish to complete, move the cursor over the relevant part of the form and left-click the mouse. The cursor will automatically move to the next field available.
7. To move down through the sequence of fields, you can also use the ‘Tab’ key on the computer keyboard.

8. For a 'free-text' field, you can type in whatever information you wish. Note that there is only limited facility within the Microsoft 'form' format to make editorial changes in the 'free-text' box once text has been entered. Therefore, if you wish to amend any of the text you have put in a green or yellow 'free-text' box, you should cut and paste the existing text into a separate document, make all the amendments, and then cut and paste the revised text back into the box.
9. Certain keyboard characters interfere with the automatic entry of data into the Secretariat's database. For that reason, please **do not use double quote marks " "** in the 'free-text' fields. Please **only use single quote marks ' '**. For the same reason, please **only use simple text in the 'free-text' fields: they cannot accept formatting, colours or objects such as tables and images.**
10. For each of the 'indicator questions' in Section 3, a drop-down menu of answer options is provided. These vary between indicators, depending on the question, but are generally of the form: 'Yes', 'No', 'Partly', 'In progress'. This is necessary so that statistical comparisons can be made of the replies.
11. For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the green additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).
12. To select an answer to an indicator question, use the Tab key, or move the cursor over the relevant yellow box and left-click the mouse. The drop-down menu of answer options will appear. Left-click the mouse on the answer option you choose, and this will appear in the centre of the yellow box.
13. An NRF is not usually completed by one person alone: for many indicators it is best for the principal compiler to consult with colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP11 to ensure the continuity and consistency of information provided.
14. After each session, **remember to save the file** in Microsoft Word, .doc, 97-2003 format. A recommended filename structure is: COP12NRF [Country] [date], for example: COP12NRFSpain13July2014.doc
15. After the NRF has been completed, please **send it in this format to Alexia Dufour, Regional Affairs Officer, Ramsar Convention Secretariat, preferably by e-mail (dufour@ramsar.org).**
16. The completed NRF **must be accompanied by a letter or e-mail message in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP12 National Report.**
17. If you have any questions or problems, please contact the Ramsar Secretariat for advice (e-mail as above).

SECTION 2: GENERAL SUMMARY OF NATIONAL IMPLEMENTATION PROGRESS AND CHALLENGES

REMINDER: Please do not use double quote marks “ ”: use single quotes ‘ ’ instead.

In your country, in the past triennium (i.e., since COP11 reporting):

A. What have been the five most successful aspects of implementation of the Convention?

1) The awareness activities related to the World Wetlands Day being implemented by the Nature Conservation Division (NCD) from the Suriname Forest Service (LBB). Schoolchildren and some personnel of the Ministry of Physical Planning, Land and Forest (RGB) Service were made aware on the value of wetlands and the wise use of them.

2) A commitment of the Ministry of Physical Planning, Land and Forest Management with some international NGOs on doing a feasibility study for protecting 2 million ha of pristine forests that consists of pristine tropical forests in South Suriname and headwaters of the majority of Suriname's major rivers.

3) The Ministry of RGB looks at possibilities to protect Coronie swamp. This freshwater swamp holds a considerable amount of freshwater resources, natural wealth in terms of biodiversity and possibilities for eco-tourism.

4) Getting approved in 2014 by Ramsar Secretariat the Project 'Aerial Survey Training for Research Staff of the Ministry of Physical Planning, Land and Forest Management (RGB) to undertake baseline surveys, analysis and reporting of wetland flora and fauna' (WFF/13/SR/1). This project relates to Goal 2 to protect wetlands of international importance and Goal 4 for institutional capacity and effectiveness to ensure that, as a signatory to the Ramsar Convention that Suriname can adequately manage its single listed wetland.

The project objective is to develop and enhance staff capacity within the Ministry to be able to develop and implement effective research activities (including data analysis) within Coppename Monding Nature Reserve that will support the development of effective policy that will aid in the achievement of effective management of the Ramsar wetland and more broadly the wetlands of Suriname

5) Implementing a project till 2015 on Awareness of coastal birds, especially the Scarlet ibis. During the awareness activities, NCD is also able to stress the importance of conservation of wetlands especially of international importance.

B. What have been the five greatest difficulties in implementing the Convention?

1) The limited governmental budget to implement the Convention as planned.

2) Not enough human resources.

3) Communication with other relevant actors.

4) Difficult accessibility to Remote wetlands areas.

5)

C. What are the five priorities for future implementation of the Convention?

- 1) To continue making people more aware (fishermen, hunters, local communities) on the wise use of wetlands.
- 2) To continue involving all the Districts Commissioners in the Districts for implementing activities related to the Ramsar Convention.
- 3) Involvement of local actors.
- 4) Looking for a local effective management structure to conserve wetlands and biodiversity.
- 5) Continue monitoring activities of coastal birds.

D. Do you (AA) have any recommendations concerning implementation assistance from the Ramsar Secretariat?

To report all activities of all Contracting Parties and to disseminate their experiences between the countries through exchange visits within the Countries in a certain Region, ej. between countries of the Caribbean. To share information of best practices between ej. Caribbean countries.

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

Technical assistance in developing monitoring plans of species within wetlands.

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Ramsar, Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), CITES, and World Heritage Convention), and UNCCD and UNFCCC?

Sharing information and collaboration with different actors involved in wetlands management on national and regional level.

G. How can implementation of the Ramsar Convention be better linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity)?

Sharing information and collaboration with different actors involved in wetlands management on national and regional level.

H. Do you (AA) have any other general comments on the implementation of the Convention?

No.

I. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report:

Different Departments within the Ministry of Physical Planning, Land and Forest Management.
