

# Ramsar National Report to COP13

## COP13 National Report

### Background information

1. The COP13 National Report Format (NRF) has been approved by the Standing Committee 52 for the Ramsar Convention's Contracting Parties to complete as their national reporting to the 13th meeting of the Conference of the Contracting Parties of the Convention (United Arab Emirates, 2018).
2. The Standing Committee through Decision SC52-07 has also agreed that an online National Reporting format could be made available to Parties by keeping the off-line system and requested the Secretariat to present an evaluation for the next COP regarding the use of the on-line system.
3. The National Report Format is being issued by the Secretariat in 2016 to facilitate Contracting Parties' implementation planning and preparations for completing the Report. The deadline for submission of national targets is by 30 November 2016 and the deadline for submission of completed National Reports is January 21st 2018.
4. Following Standing Committee discussions, this COP13 NRF closely follows that of the NRF used for COP12, to permit continuity of reporting and analysis of implementation progress by ensuring that indicator questions are as far as possible consistent with previous NRFs (and especially the COP12 NRF). It is also structured in terms of the Goals and Strategies of the 2016-2024 Ramsar Strategic Plan adopted at COP12 as Resolution XII.2.
5. This COP13 NRF includes 92 indicator questions. In addition, Section 4 is provided as an optional Annex in order to facilitate the task of preparing the Party's National Targets and Actions for the implementation of each of the targets of the Strategic Plan 2016-2024 according to Resolution XII.2.
6. As was the case for previous NRF, the COP13 Format includes an optional section (Section 5) to permit a Contracting Party to provide additional information, on indicators relevant to each individual Wetland of International Importance (Ramsar Site) within its territory.
7. Note that, for the purposes of this national reporting to the Ramsar Convention, the scope of the term "wetland" is that of the Convention text, i.e. all inland wetlands (including lakes and rivers), all nearshore coastal wetlands (including tidal marshes, mangroves and coral reefs) and human-made wetlands (e.g. rice paddy and reservoirs), even if a national definition of "wetland" may differ from that adopted by the Contracting Parties to the Ramsar Convention.

### The purposes and uses of national reporting to the Conference of the Contracting Parties

8. National Reports from Contracting Parties are official documents of the Convention and are made publicly available on the Convention's website.
9. There are seven main purposes for the Convention's National Reports. These are to:
  - i) provide data and information on how, and to what extent, the Convention is being implemented
  - ii) provide tools for countries for their national planning
  - iii) capture lessons and experience to help Parties plan future action;
  - iv) identify emerging issues and implementation challenges faced by Parties that may require further attention from the Conference of the Parties;
  - v) provide a means for Parties to account for their commitments under the Convention;
  - vi) provide each Party with a tool to help it assess and monitor its progress in implementing the Convention, and to plan its future priorities; and
  - vii) provide an opportunity for Parties to draw attention to their achievements during the triennium.
10. The data and information provided by Parties in their National Reports have another valuable purpose as well, since a number of the indicators in the National Reports on Parties' implementation provide key sources of information for the analysis and assessment of the "ecological outcome-oriented indicators of

effectiveness of the implementation of the Convention”.

11. To facilitate the analysis and subsequent use of the data and information provided by Contracting Parties in their National Reports, the Ramsar Secretariat holds in a database all the information it has received and verified. The COP13 reports will be in an online National Reporting system.

12. The Convention’s National Reports are used in a number of ways. These include:

- i) providing an opportunity to compile and analyze information that contracting parties can use to inform their national planning and programming.
- ii) providing the basis for reporting by the Secretariat to each meeting of the Conference of the Parties on the global, national and regional implementation, and the progress in implementation, of the Convention. This is provided to Parties at the COP as a series of Information Papers, including:
  - \* the Report of the Secretary General on the implementation of the Convention at the global level;
  - \* the Report of the Secretary General pursuant to Article 8.2 (b), (c), and (d) concerning the List of Wetlands of International Importance); and
  - \* the reports providing regional overviews of the implementation of the Convention and its Strategic Plan in each Ramsar region;
- iii) providing information on specific implementation issues in support of the provision of advice and decisions by Parties at the COP.
- iv) providing the source data for time-series assessments of progress on specific aspects in the implementation of the Convention included in other Convention products. An example is the summary of progress since COP3 (Regina, 1997) in the development of National Wetland Policies, included as Table 1 in Ramsar Wise Use Handbook 2 (4th edition, 2010); and
- v) providing information for reporting to the Convention on Biological Diversity (CBD) on the national implementation of the CBD/Ramsar Joint Work Plan and the Ramsar Convention’s lead implementation role on wetlands for the CBD. In particular, the Ramsar Secretariat and STRP used the COP10 NRF indicators extensively in 2009 to prepare contributions to the in-depth review of the CBD programme of work on the biological diversity of inland water ecosystems for consideration by CBD SBSTTA14 and COP10 during 2010 (see UNEP/CBD/SBSTTA/14/3). Similar use of COP12 NRF indicators is anticipated for the CBD’s next such in-depth review.

## **The structure of the COP13 National Report Format**

**Section 1** provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

**Section 2** is a ‘free-text’ section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

**Section 3** provides the 92 implementation indicator questions, grouped under each Convention implementation Goals and Targets in the Strategic Plan 2016-2024, and with an optional ‘free-text’ section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

**Section 4** is an optional annex to allow any Contracting Party that has developed national targets to provide information on the targets and actions for the implementation of each of the targets of the Strategic Plan 2016-2024.

In line with Resolution XII.2, which encourages Contracting Parties “to develop and submit to the Secretariat on or before December 2016, and according to their national priorities, capabilities and resources, their own quantifiable and time-bound national and regional targets in line with the targets set in the Strategic Plan”, all Parties are encouraged to consider using this comprehensive national planning tool as soon as possible, in order to identify the areas of highest priority for action and the relevant national targets and actions for each target.

The planning of national targets offers, for each of them, the possibility of indicating the national priority for that area of activity as well as the level of resourcing available, or that could be made available during the triennium, for its implementation. In addition, there are specific boxes to indicate the National Targets for implementation by 2018 and the planned national activities that are designed to deliver these targets. Ramsar Strategic Plan 2016-2024 shows the synergies between CBD Aichi Biodiversity Targets and Ramsar Targets. Therefore, the NRF provide an opportunity that Contracting Parties indicate as appropriate how the actions they undertake for the implementation of the Ramsar Convention contribute to achievement of the Aichi Targets according to paragraph 51 of Resolution XII.3.

**Section 5** is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

## **General guidance for completing and submitting the COP13 National Report Format**

All Sections of the COP13 NRF should be completed in one of the Convention's official languages (English, French, Spanish).

The deadline for submission of the completed NRF is January 21st **2018**. It will not be possible to include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP13.

The deadline for submission of national targets is by 30 November 2016

To help Contracting Parties refer to relevant information they provided in their National Report to COP12, for each appropriate indicator a cross-reference is provided to the equivalent indicator(s) in the COP12 NRF or previous NRF, shown thus: {x.x.x}

For follow up and where appropriate, a cross-reference is also provided to the relevant Key Result Area (KRA) relating to Contracting Parties implementation in the Strategic Plan 2009-2015.

Only Strategic Plan 2016-2024 Targets for which there are implementation actions for Contracting Parties are included in this reporting format; those targets of the Strategic Plan that do not refer directly to Parties are omitted (e.g. targets 6 and 14).

For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).

The NRF should ideally be completed by the principal compiler in consultation with relevant colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP12 to ensure the continuity and consistency of information provided.

If you have any questions or problems, please contact the Ramsar Secretariat for advice ([nationalreports@ramsar.org](mailto:nationalreports@ramsar.org)).

## Section 1: Institutional Information

**Important note:** the responses below will be considered by the Ramsar Secretariat as the definitive list of your focal points, and will be used to update the information it holds. The Secretariat's current information about your focal points is available at <http://www.ramsar.org/search-contact>.

### Name of Contracting Party

The completed National Report **must be accompanied by a letter** in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP13 National Report. It can be attached to this question using the "Manage documents" function (blue symbol below)

> Carole Dieschbourg - Minister for the Environment

## **Section 2: General summary of national implementation progress and challenges**

In your country, in the past triennium (i.e., since COP12 reporting)

### **A. What have been the five most successful aspects of implementation of the Convention?**

- 1)  
> Awareness Raising has been increased
- 2)  
> Through water protection measures such as special areas of drinking water protection, Wetland ecology has been strengthened
- 3)  
> Visitor Center in RAMSAR area has opened
- 4)  
> Management plans and steering committees set up for the better protection. (not limited to the RAMSAR sites)
- 5)  
>

### **B. What have been the five greatest difficulties in implementing the Convention?**

- 1)  
> Agriculture still remains a big polluter for local Wetlands
- 2)  
> Landscape fragmentation remains at an alltime high
- 3)  
> Economic Growth and land consumption threaten Wetlands
- 4)  
> Adverse effects of Invasive alien species
- 5)  
> Restoration of wetlands is being complicated trough high population density near Streams and wetlands.

### **C. What are the five priorities for future implementation of the Convention?**

- 1)  
> awareness raising of the national RAMSAR sites and the relevance in relation to Climate Change
- 2)  
> Increasing stepping stones between wetlands
- 3)  
> Reduce fragmentation
- 4)  
> Invasive alien species control
- 5)  
> general restoration of Wetlands (also as an important objective for better climate change mitigation and adaptation)

D. Do you (AA) have any recommendations concerning implementation assistance from the Ramsar Secretariat?

> /

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

> /

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), Convention on International Trade in Endangered Species (CITES), World Heritage Convention (WHC), and United Nations Convention to Combat Desertification (UNCCD) and the United Nations Framework Convention on Climate Change (UNFCCC)?

> Reducing the administrative burden is a key aspect that needs to be addressed.

In addition, recognition of UNFCCC for the positive effects of wetlands for climate mitigation and adaptation needs to be strengthened. In that regard it is clear that meetings of the Convention need to have a sound focus on sustainability. The meetings need to be as sustainable as possible! To date this is not the case.

G. How can implementation of the Ramsar Convention be better linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity)?

>

H. Do you (AA) have any other general comments on the implementation of the Convention?

>

I. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report

> Administration de la gestion de l'eau

## Section 3: Indicator questions and further implementation information

### Goal 1. Addressing the drivers of wetland loss and degradation

#### Target 1

Wetland benefits are featured in national/ local policy strategies and plans relating to key sectors such as water, energy, mining, agriculture, tourism, urban development, infrastructure, industry, forestry, aquaculture, fisheries at the national and local level.

1.1 Have wetland issues/benefits been incorporated into other national strategies and planning processes, including: {1.3.2} {1.3.3} KRA 1.3.i

Please select only one per square.

a) National Policy or strategy for wetland management	<input checked="" type="checkbox"/> A=Yes <input type="checkbox"/> B=No <input type="checkbox"/> C=Partially <input type="checkbox"/> D=Planned <input type="checkbox"/> X=Unknown <input type="checkbox"/> Y=Not Relevant
b) Poverty eradication strategies	<input type="checkbox"/> A=Yes <input type="checkbox"/> B=No <input type="checkbox"/> C=Partially <input type="checkbox"/> D=Planned <input type="checkbox"/> X=Unknown <input checked="" type="checkbox"/> Y=Not Relevant

### 1.1 Additional information

> Habitat considerations generally included in spatial development. Additionally a mechanism for habitat specific compensation has been developed.  
Consideration of bird species is taken into account when planning Wind energy projects.

## Target 2

Water use respects wetland ecosystem needs for them to fulfil their functions and provide services at the appropriate scale inter alia at the basin level or along a coastal zone

2.1 Has the quantity and quality of water available to, and required by, wetlands been assessed to support the implementation of the Guidelines for the allocation and management of water for maintaining the ecological functions of wetlands (Resolution VIII.1, VIII.2) ? 1.24.

*Please select only one option*

- A=Yes  
 B=No  
 C=Partially  
 D=Planned

### 2.1 Additional Information

>

2.2 Have assessments of environmental flow been undertaken in relation to mitigation of impacts on the ecological character of wetlands (Action r3.4.iv)

*Please select only one option*

- A=Yes  
 B=No

- C=Partially
- D=Planned

## 2.2 Additional Information

>

## 2.3 Have Ramsar Sites improved the sustainability of water use in the context of ecosystem requirements?

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned
- O=No Change
- X=Unknown

## 2.3 Additional Information

> The RAMSAR sites are also protected under EU and national law. It is hard to differentiate the effects of the different levels of protection on the improvement of the sustainability of water use

## 2.4 Have the Guidelines for allocation and management of water for maintaining ecological functions of wetlands (Resolutions VIII.1 and XII.12 ) been used/applied in decision-making processes. (Action 3.4.6.)

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

## 2.4 Additional Information

>

## 2.5 Have projects that promote and demonstrate good practice in water allocation and management for maintaining the ecological functions of wetlands been developed (Action r3.4.ix. )

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

## 2.5 Additional Information

> Planned in the new NBSAP: Demonstration farms that can provide best practices to other farmers.

## 2.6 How many household/municipalities are linked to sewage system? SDG Target 6.3.1.

*Please select only one option*

- E=Exact number (households/municipalities)

> 996.711

- F=Less than (households/municipalities)

>

- G=More than (households/municipalities)

>

- X=Unknown
- Y=Not Relevant

## 2.6 Additional Information

> In 2017, every Luxembourgian municipality (105/105) is linked to a wastewater treatment plant. The sewage is treated for 996.711 population equivalent.

## 2.7 What is the percentage of sewerage coverage in the country? SDG Target 6.3.1.

*Please select only one option*

- E=Exact number (percentage)

> 98%

F=Less than (percentage)

>

G=More than (percentage)

## 2.8 Additional Information

> More than 98 % of the population is linked to a wastewater treatment plant. 2 % are covered by septic tanks.

## 2.9 Does the country use constructed wetlands/ponds as wastewater treatment technology? SDG Target 6.3.1.

*Please select only one option*

A=Yes

B=No

C=Partially

D=Planned

X=Unknown

Y=Not Relevant

## 2.9 Additional Information

> There are only 4 small sites in Luxembourg covering altogether 730 population equivalent.

## 2.10 How do the country use constructed wetlands/ponds as wastewater treatment technology perform? SDG Target 6.3.1.

*Please select only one option*

A=Good

B=Not Functioning

C=Functioning

Q=Obsolete

X=Unknown

Y=Not Relevant

## 2.10 Additional Information

> The technology is not very effective during winter, and is therefore not recommendable. The 4 sites in Luxembourg will be replaced by other treatment technologies.

## 2.11 How many centralised wastewater treatment plants exist at national level? SDG Target 6.3.1.

*Please select only one option*

E=Exact number (plants)

> 222

F=Less than (plants)

>

G=More than (plants)

>

- X=Unknown
- Y=Not Relevant

### 2.11 Additional Information

> In Luxembourg, the wastewater management is done at the level of the municipalities or unions of municipalities. In 2017, there are 222 wastewater treatment plants.

### 2.12 How is the functional status of the wastewater treatment plants? SDG Target 6.3.1.

*Please select only one option*

- A=Good
- B=Not functioning

- D=Planned

### 3.3 Additional information

> Certain protected wetland biotopes are subject to specific biodiversity contracts allocated to farmers for the use of sustainable agricultural practices

### 3.4 Have actions been taken to remove perverse incentive measures which discourage conservation and wise use of wetlands? {1.11.2} KRA 1.11.i

Please select only one option

- A=Yes
- B=No
- D=Planned
- Z=Not Applicable

### 3.4 Additional Information

> A review of environmentally harmful subsidies allocated for certain agricultural practices that might have adverse effects on wetlands is planned.

## Target 4

Invasive alien species and pathways of introduction and expansion are identified and prioritized, priority invasive alien species are controlled or eradicated, and management responses are prepared and implemented to prevent their introduction and establishment.

### 4.1 Does your country have a comprehensive national inventory of invasive alien species that currently or potentially impact the ecological character of wetlands? {1.9.1} KRA 1.9.i

Please select only one option

- A=Yes
- B=No
- C=Partially
- D=Planned

#### 4.1 Additional information

> A species list of Union Concern has been developed and is included in EU Regulation 1143/2014.

#### 4.2 Have national policies or guidelines on invasive species control and management been established or reviewed for wetlands? {1.9.2} KRA 1.9.iii

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

#### 4.2 Additional information

> Currently under development for all areas where those species occur.

#### 4.3 How many invasive species are being controlled through management actions.

#### 4.3 Additional information

If 'Yes', please indicate the year of assessment and the source of the information

> Not all of these species are bound to wetlands. But special efforts are put into controlling the spread of wetland species such as *Branta canadensis*, *Alopochen aegyptiaca*, *Ondatra zibethicus*, *Pacifastacus leniusculus*, *Procyon lotor*.

#### 4.4 Have the effectiveness of wetland invasive alien species control programmes been assessed?

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned
- X=Unknown
- Y=Not Relevant

#### 4.4 Additional information

> Most of the measures have only been recently been started and the evaluation will only be possible after the first results will have been collected.

## Goal 2. Effectively conserving and managing the Ramsar Site network

### Target 5

The ecological character of Ramsar Sites is maintained or restored through effective, planning and integrated management {2.1.}

#### 5.1 Have a national strategy and priorities been established for the further designation of Ramsar Sites, using the Strategic Framework for the Ramsar List? {2.1.1} KRA 2.1.i

*Please select only one option*

- A=Yes
- B=No
- C=Partially

### Target 18

International cooperation is strengthened at all levels {3.1}

18.1 Are the national focal points of other MEAs invited to participate in the National Ramsar/Wetland Committee? {3.1.1} {3.1.2} KRAs 3.1.i & 3.1.iv

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

#### 18.1 Additional information

> Focal points of all relevant MEA's are working together to enhance implementation of the conventions.

18.2 Are mechanisms in place at the national level for collaboration between the Ramsar Administrative Authority and the focal points of UN and other global and regional bodies and agencies (e.g. UNEP, UNDP, WHO, FAO, UNECE, ITTO)? {3.1.2} {3.1.3} KRA 3.1.iv

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

#### 18.2 Additional information

>

18.3 Has your country received assistance from one or more UN and other global and regional bodies and agencies (e.g. UNEP, UNDP, WHO, FAO, UNECE, ITTO) or the Convention's IOPs in its implementation of the Convention? {4.4.1} KRA 4.4.ii.

The IOPs are: BirdLife International, the International Water Management Institute (IWMI), IUCN (International Union for Conservation of Nature), Wetlands International, WWF and Wildfowl & Wetland Trust (WWT).

*Please select only one option*

- A=Yes
- B=No

- C=Partially
- D=Planned
- X=Unknown
- Y=Not Relevant

### 18.3 Additional information

If 'Yes' please name the agency (es) or IOP (s) and the type of assistance received

>

18.4 Have networks, including twinning arrangements, been established, nationally or internationally, for knowledge sharing and training for wetlands that share common features? {3.4.1}

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

### 18.4 Additional information

If 'Yes' or 'Partially', please indicate the networks and wetlands involved

> There are workshops held at the EU level.

Additionally, workshops on management features such as IAS control are held.

18.5 Has information about your country's wetlands and/or Ramsar Sites and their status been made public (e.g., through publications or a website)? {3.4.2} KRA 3.4.iv

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

### 18.5 Additional information

> Standard data forms containing site information are available

18.6 Has information about your country's wetlands and/or Ramsar Sites been transmitted to the Ramsar Secretariat for dissemination? {3.4.3} KRA 3.4.ii

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

### 18.6 Additional Information

>

18.7 Have all transboundary wetland systems been identified? {3.5.1} KRA 3.5.i

*Please select only one option*

- A=Yes
- B=No
- D=Planned
- Z=Not Applicable

### 18.7 Additional information

>

18.8 Is effective cooperative management in place for shared wetland systems (for example, in shared river basins and coastal zones)? {3.5.2} KRA 3.5.ii

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned
- Y=Not Relevant

### 18.8 Additional information

If 'Yes' or 'Partially', please indicate for which wetland systems such management is in place

>

18.9 Does your country participate in regional networks or initiatives for wetland-dependent migratory species? {3.5.3} KRA 3.5.iii

*Please select only one option*

- A=Yes
- B=No
- D=Planned
- Z=Not Applicable

18.9 Additional information

>

## Target 19

Capacity building for implementation of the Convention and the 4th Ramsar Strategic Plan 2016 – 2024 is enhanced.

19.1 Has an assessment of national and local training needs for the implementation of the Convention been made? {4.1.4} KRAs 4.1.iv & 4.1.viii

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

19.1 Additional information

>

19.2 Are wetland conservation and wise-use issues included in formal education programmes?

*Please select only one option*

- A=Yes
- B=No
- C=Partially
- D=Planned

19.2 Additional information

If you answer yes to the above please provide information on which mechanisms and materials

>

19.3a How many opportunities for wetland site manager training have been provided since COP12? {4.1.5} KRA 4.1.iv

a) at Ramsar Sites

*Please select only one option*

- E=Exact number (opportunities)

>

- F=Less than (opportunities)

>

- G=More than (opportunities)

>

- C=Partially
- X=Unknown
- Y=Not Relevant

19.3b How many opportunities for wetland site manager training have been provided since COP12? {4.1.5} KRA 4.1.iv

b) at other wetlands

*Please select only one option*

- E=Exact number (Opportunities)

>

- F=Less than (Opportunities)

>

- G=More than (Opportunities)
- C=Partially

- X=Unknown
- Y=Not Relevant

### 19.3 Additional information

including whether the Ramsar Wise Use Handbooks were used in the training

>

### 19.4 Have you (AA) used your previous Ramsar National Reports in monitoring implementation of the Convention? {4.3.1} KRA 4.3.ii

*Please select only one option*

- A=Yes
- B=No
- D=Planned
- Z=Not Applicable

### 19.4 Additional information

If 'Yes', please indicate how the Reports have been used for monitoring

>

## Section 4. Optional annex to allow any Contracting Party that has developed national targets to provide information on those

### Goal 1

#### Target 1: Wetland benefits

Wetland benefits are featured in national / local policy strategies and plans relating to key sectors such as water, energy, mining, agriculture, tourism, urban development, infrastructure, industry, forestry, aquaculture, fisheries at the national and local level. Contributes to Aichi Target 2

##### Target 1: Wetland benefits - Priority

*Please select only one option*

- A=High
- B=Medium
- C=Low
- D=Not relevant
- E=No answer

##### Target 1: Wetland benefits - Resourcing

*Please select only one option*

- A=Good
- B=Adequate
- C=Limiting
- D=Severely limiting
- E=No answer

##### Target 1: Wetland benefits - National Targets

>

##### Target 1: Wetland benefits - Planned activity

>

##### Target 1: Wetland benefits - Outcomes achieved by 2018

Outcomes achieved by 2018 and how they contribute to achievement of the Aichi Targets and Sustainable Development Goals

**Note:** this field has to be completed when the full report is submitted in January 2018

>

## Target 2: Water Use

Water use respects wetland ecosystem needs for them to fulfil their functions and provide services at the appropriate scale inter alia at the basin level or along a coastal zone. Contributes to Aichi Targets 7 and 8 and Sustainable Development Goal 6.3.1

### Target 2: Water Use - Priority

*Please select only one option*

- A=High
- B=Medium
- C=Low
- D=Not relevant
- E=No answer

### Target 2: Water Use - Resourcing

>

#### **Target 4: Invasive alien species**

Invasive alien species and pathways of introduction and expansion are identified and prioritized, priority invasive alien species are controlled or eradicated, and management responses are prepared and implemented to prevent their introduction and establishment. Contributes to Aichi Target 9.

##### Target 4: Invasive alien species - Priority

*Please select only one option*

- A=High
- B=Medium
- C=Low
- D=Not relevant
- E=No answer

##### Target 4: Invasive alien species - Resourcing

## **Section 5: Optional annex to allow any Contracting Party that so wishes to provide additional information regarding any of all of its designated Wetlands of International Importance (Ramsar Sites)**

### **Guidance for filling in this section**

1. Contracting Parties can provide additional information specific to any or all of their designated Ramsar Sites, given that the situation and status of individual Ramsar Sites can differ greatly within the territory of a Contracting Party.
  2. The only indicator questions included in this section are those from Section 3 of the COP13 NRF which directly concern Ramsar Sites.
  3. In some cases, to make them meaningful in the context of reporting on each Ramsar Site separately, some of these indicator questions and/or their answer options have been adjusted from their formulation in Section 3 of the COP13 NRF.
  4. Please include information on only one site in each row. In the appropriate columns please add the name and official site number (from the Ramsar Sites Information Service).
  5. For each 'indicator question', please select one answer from the legend.
  6. A final column of this Annex is provided as a 'free text' box for the inclusion of any additional information concerning the Ramsar Site.
- A final column of this Annex is provided as a 'free text' box for the inclusion of any additional information concerning the Ramsar Site.
