Section 2: General summary of national implementation progress and challenges

In your country, in the past triennium (i.e., since COP13 reporting)

A. What have been the five most successful aspects of implementation of the Convention?

- 1)
 - › Government is committed to designate more Ramsar Sites as stated in the National Protected Area Strategic Management Plan 2017-2031. We have designated Stung Sen Core Areas as Cambodia fifth Ramsar Site and designed Boeung Snae Wetlands as the first Protected Area in Prey Vang Province of Cambodia.
- 2)
 - › Regional cooperation, multi-sector and stakeholder engagement, and resource mobilization for the conservation and protection of the important wetlands and their biodiversity
- 3)
 - › Conducting education and awareness raising (i.e. World Wetlands Day, World Migratory Birds Day, Welcome to the Bird, and other activities)
- 4)
 - › Conducting feasibility study and wetlands assessments for wetlands values and ecosystem services and at least five other wetlands have been identified and process in designated as Ramsar Sites.
- 5)
 - › Developed guideline or policies on wise use of wetlands and expand communities livelihood opportunities through wetland friendly-products and ecotourism activities

B. What have been the five greatest difficulties in implementing the Convention?

- 1)
 - › Wetlands conversion to agriculture, settlement, and urban
- 2)
 - › Over harvesting of wetland resources especially fishery and water for agriculture
- 3)
 - › Lack of technical human resources at the sub-national level
- 4)
 - › Overlap the management mandate and lack of local participation
- 5)
 - › Sustainability and balance between economic development and wetlands conservation with consideration of local poverty

C. What are the five priorities for future implementation of the Convention?

- 1)
 - › National wetland inventory
- 2)
 - › Develop the management plan and zonation for all the wetland protected areas and Ramsar Sites
- 3)
 - › Capacity building and training to local authorities and site management team including site managers and rangers
- 4)
 - › Endeavor on CEPA (Communication, Education, Participation and Awareness) at local and national level
- 5)
 - › Expand communities livelihood opportunities and promote wetland wise use concept

D. Do you (AA) have any recommendations concerning priorities for implementation assistance and

requirements for such assistance from the Ramsar Secretariat?

> Ramsar Secretariat should assist in attracting private sectors to involve and invest in wetland conservation. In addition, Ramsar Secretariat should consider providing capacity building to its contracting parties for the effectiveness in wetland management and contribute to the achievement of the Ramsar strategic plan 2016-2024

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

> IOPs should assist the contracting parties in scientific expertise, technical support, capacity building as well as absorb more regional funding projects which are align with the Ramsar strategic plan 2016-2024

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), Convention on International Trade in Endangered Species (CITES), World Heritage Convention (WHC), and United Nations Convention to Combat Desertification (UNCCD) and the United Nations Framework Convention on Climate Change (UNFCCC)?

> National implementation of the Ramsar Convention could be better linked with CBD, CMS, CITES in term of protection and conservation of endangered and threatened species since wetlands are one of the important habitat for certain endangered species especially waterbirds and migratory birds. For WHC, UNCCD, UNFCCC could be linked in water management, climate change, carbon sequestration, flood and drought control, disaster mitigation and

G. How is the Ramsar Convention linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity) and how this could be improved?

> Ramsar Convention could be linked with the implementation of National Biodiversity Strategy and Action Plan 2016 for the biodiversity conservation especially on the endangered bird conservation and linked with National Environment Strategy and Action Plan 2016-2023 on the natural resource management and governance. In addition, the Ramsar Convention also linked with Cambodia Climate Change Strategic Plan 2014-2023 in term of climate change resilience and contribute to the achievement of National Sustainable Development Goals.

H. According to paragraph 21 of Resolution XIII.18 on Gender and wetlands, please provide a short description about the balance between men and women participating in wetland-related decisions, programmes and research.

> There are also women involve in wetland-related programmes and research. In addition, women also participating in wetland-related decisions (i.e. actively chaired the consultation meeting and involve on the designation Boeung Snae wetlands as protected area).

I. Do you (AA) have any other general comments on the implementation of the Convention?

> Ramsar Secretariat should invest more on how to ensure the Ramsar strategies and guidelines will be taken into action through providing the technical assistant and capacity building. In addition, funding mechanism for the implementation of those strategies should be considered.

J. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report
