The Ramsar Convention Secretariat

Copy: Ministry of Environment of
the Republic of Lithuania

Ministry of Natural Resources and Environmental Protection of the Republic of Belarus and Ministry of Environment of the Republic of Lithuania closely cooperate in the fields of protected areas, biodiversity and nature protection.

Both Countries recognize establishment of reserve «Vileity» Ramsar site in Belarus and wetland complex «Adutiskis-Svylya-Birveta» Ramsar site in Lithuania and would like to express their willingness for establishment of transboundary Ramsar site «Adutiskis- Vileity».

The above-mentioned sites in both Countries have been determined in accordance with the Ramsar Site selection Criteria for the wetlands of international importance, and are specially protected natural territories in accordance with national legislation.

Hereby Belarus is expressing its readiness to establish a transboundary Ramsar site «Adutiskis-Vileity» and requests to recognize this wetland as a transboundary site and to include it in the list of transboundary Ramsar sites.

We hope for mutual understanding and future productive cooperation.

Minister

A.Kovkhuto
