

SOME DRY FACTS ABOUT WETLANDS

www.ramsar.org

GOOD NEWS! WE WILL GET RID OF THIS BUG-RIDDEN WASTELAND AND DRAIN THE WATER THROUGH A CHANNEL.

NO! WETLANDS ARE NOT WASTELANDS! IN FACT...

WETLANDS HELP TO REMOVE EXCESS NUTRIENTS WHICH COME FROM HUMAN ACTIVITIES...

AND TURN THEM INTO FOOD FOR PLANTS, ANIMALS AND HUMANS.

SOME WETLAND PLANTS ABSORB CO₂ FROM THE ATMOSPHERE...

CO₂

PEAT

AND STORE IT... WHICH HELPS CONTROL CLIMATE CHANGE.

WETLANDS ACT LIKE SPONGES, SOAKING UP EXCESS WATER...

AND STORING IT FOR WHEN THE WEATHER IS DRY.

SO OUR RIVERS DON'T FLOOD SO MUCH...

...OR RUN DRY.

SO WE'VE WATER FOR YOUR BOTTLE! AND OUR WETLANDS ARE ALSO FILLED WITH LIFE AND JOY! ENJOY THE FROG CONCERT!

VIVA THE WETLANDS!
