

NATIONAL REPORT ON THE IMPLEMENTATION OF THE RAMSAR CONVENTION ON WETLANDS

**National Reports to be submitted to the 12th Meeting
of the Conference of the Contracting Parties,
Uruguay, 2015**

Please submit the completed National Report in Microsoft Word format (.doc, 97-2003), as an electronic file (not a printed copy) and preferably by e-mail, to Alexia Dufour, Regional Affairs Officer, Ramsar Secretariat (dufour@ramsar.org) by **1 September 2014**.

The structure of the COP12 National Report Format

The COP12 National Report Format (NRF) is in four sections:

Section 1 provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

Section 2 is a 'free-text' section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

Section 3 provides the 66 implementation indicator questions, grouped under each Convention implementation strategy in the Strategic Plan 2009-2015, and with an optional 'free-text' section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

Section 4 is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

General guidance for completing and submitting the COP12 National Report Format

IMPORTANT – PLEASE READ THIS GUIDANCE SECTION BEFORE STARTING TO COMPLETE THE NATIONAL REPORT FORMAT

1. All Sections of the COP12 NRF should be completed in one of the Convention's official languages (English, French, Spanish).
2. The deadline for submission of the completed NRF is **1 September 2014**. It will not be possible to include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP12.
3. All fields with a pale yellow background  must be filled in.
4. Fields with a pale green background  are free-text fields in which to provide additional information, if the Contracting Party so wishes. Although providing information in these fields is optional, Contracting Parties are encouraged to provide such additional information wherever possible and relevant, as it helps us understand Parties' progress and activity more fully, to prepare the best possible global and regional implementation reports to COP.
5. The Format is created as a form in Microsoft Word. You are only able to submit replies and information in the yellow or green boxes, as all other parts of the form are locked to ensure that the structure and wording of indicators will remain uniform and comparable for all Parties.
6. To select a yellow or green field you wish to complete, move the cursor over the relevant part of the form and left-click the mouse. The cursor will automatically move to the next field available.
7. To move down through the sequence of fields, you can also use the 'Tab' key on the computer keyboard.

8. For a 'free-text' field, you can type in whatever information you wish. Note that there is only limited facility within the Microsoft 'form' format to make editorial changes in the 'free-text' box once text has been entered. Therefore, if you wish to amend any of the text you have put in a green or yellow 'free-text' box, you should cut and paste the existing text into a separate document, make all the amendments, and then cut and paste the revised text back into the box.
9. Certain keyboard characters interfere with the automatic entry of data into the Secretariat's database. For that reason, please **do not use double quote marks " "** in the 'free-text' fields. Please **only use single quote marks ' '**. For the same reason, please **only use simple text in the 'free-text' fields: they cannot accept formatting, colours or objects such as tables and images.**
10. For each of the 'indicator questions' in Section 3, a drop-down menu of answer options is provided. These vary between indicators, depending on the question, but are generally of the form: 'Yes', 'No', 'Partly', 'In progress'. This is necessary so that statistical comparisons can be made of the replies.
11. For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the green additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).
12. To select an answer to an indicator question, use the Tab key, or move the cursor over the relevant yellow box and left-click the mouse. The drop-down menu of answer options will appear. Left-click the mouse on the answer option you choose, and this will appear in the centre of the yellow box.
13. An NRF is not usually completed by one person alone: for many indicators it is best for the principal compiler to consult with colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP11 to ensure the continuity and consistency of information provided.
14. After each session, **remember to save the file** in Microsoft Word, .doc, 97-2003 format. A recommended filename structure is: COP12NRF [Country] [date], for example: COP12NRFSpain13July2014.doc
15. After the NRF has been completed, please **send it in this format to Alexia Dufour, Regional Affairs Officer, Ramsar Convention Secretariat, preferably by e-mail (dufour@ramsar.org).**
16. The completed NRF **must be accompanied by a letter or e-mail message in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP12 National Report.**
17. If you have any questions or problems, please contact the Ramsar Secretariat for advice (e-mail as above).

SECTION 2: GENERAL SUMMARY OF NATIONAL IMPLEMENTATION PROGRESS AND CHALLENGES

REMINDER: Please do not use double quote marks “ ”: use single quotes ‘ ’ instead.

In your country, in the past triennium (i.e., since COP11 reporting):

A. What have been the five most successful aspects of implementation of the Convention?

- 1) Ramsar Site Information Sheets and criteria were adapted and extensively used by stakeholders to identify key conservation sites such as Important Bird Areas, East Asia-Australasian Flyway Partnership Sites, protected areas network modelling by Development by Design developed by The Nature Conservancy approach in Mongolia
- 2) Conservation management plan of six nationally protected areas that overlaps with Ramsar Sites were updated using MIRADI software developed by Conservation Measures Partnership.
- 3) Two lakes (Khukh and Orog lake) in the Valley of the Lakes Ramsar Sites have been included in the Ikh Bogd National Park and conservation actions are being implemented in accordance with conservation management plans of the PA.
- 4) Public awareness activities for Ramsar sites have improved, e.g. Nature and Wetland Interpretative Center at Ogii Lake, crane festival at Khurkh-Khuiten Valley, swan watching day at Ganga Lake, and publication of brochures on waterbirds and shorebirds at Terkhii Tsagaan Lake, bird field guide for Khurkh and KHuiten River Valleys, and inclusion of information about Ramsar Sites in government documents such as River Basin Administrations management plans.
- 5) International cooperation on migratory bird research and monitoring is expanding significantly. International Crane Foundation, US Geological Survey, US Forest Service, and UN North East Asia Environmental Program have supported trans-boundary activities for conservation and monitoring of the migratory bird species, e.g. White-naped Cranes, Swan Geese, and wetland ecosystem monitoring. A wetland site monitoring has been established at Khurkh and Khuiten River Valleys Ramsar Site. A field monitoring camp has been established by Wildlife Science and Conservation Center of Mongolia in Khurkh River Valley which could serve as a training base for Ramsar site managers.

B. What have been the five greatest difficulties in implementing the Convention?

- 1) Inadequate funding to secure human resources and long-term integrated monitoring and management activities at RAMSAR sites.
- 2) Lack of government supported mechanism to manage Ramsar sites, maintain site information database, and
- 3) Inadequate nationwide public awareness programme on Ramsar Sites and its biodiversity and habitats.
- 4) Lack of Ramsar Site managers and local administrations to implement law enforcement, management and conservation activities
- 5) Ramsar sites included in the national protected areas are better protected whereas the sites outside national protection areas are threatened with various economic development and unsustainable human use.

C. What are the five priorities for future implementation of the Convention?

- 1) To conduct status assessment for Ramsar Sites and develop recommendations for future conservation and management
- 2) To designate Khurkh Khuiten Valley into local protected area and establish a model community based nature resource management.
- 3) To improve Ramsar Site monitoring activities and develop a mechanism to monitor sites and maintain national database.
- 4) To improve international coordination through migratory bird researches and regional wetland and sustainable water usage training.
- 5) To improve funding mechanism for RAMSAR sites outside protected areas network.

D. Do you (AA) have any recommendations concerning implementation assistance from the Ramsar Secretariat?

Financial and technical supports are much needed from the Ramsar Secretariat to conduct a GAP analysis and status assessment for all Ramsar Sites in Mongolia. Based on such works it is needed to develop a strategic plan for conservation and management of Ramsar Sites in Mongolia.

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

N/A

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Ramsar, Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), CITES, and World Heritage Convention), and UNCCD and UNFCCC?

Mongolian government is updating National Biodiversity Action Plan based on Aichi targets in 2014. One of the outputs of NBSAP is linked with improved management of RAMSAR sites.

G. How can implementation of the Ramsar Convention be better linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity)?

Since 2012, new policy of integrated river basin management is started through the amendment of Law in Water. Integrated River Basin Management (IRBM) is the worldwide accepted conservation tool for managing river basins and watersheds at ecosystem level in an integrated manner. IRBM addresses all components of the watershed, from its source to drainage regardless of political boundaries. Implementation of the IRBM concept at national level has been launched by establishing model IRBM sites where River Basin Councils are formed. Also the management plans are being developed and their implementations initiated at selected sites. Management issues of the protected area and international convention area included integrated water resource management plan in river basins.

H. Do you (AA) have any other general comments on the implementation of the Convention?

Need for fundraising support for capacity building of human resources, site monitoring, CEPA, and databank of RAMSAR sites.
