

# Ramsar National Report to COP14

## COP14 National Report

### Background information

1. The COP14 National Report Format (NRF) has been approved at its 57th meeting (SC57) for the Ramsar Convention's Contracting Parties to complete as their national reporting to the 14th meeting of the Conference of the Contracting Parties of the Convention (China, 2021).
2. The NRF is being issued by the Secretariat in 2019 to facilitate Contracting Parties' implementation planning and preparations for completing the Report. The deadline for submission of national targets is by 24 January 2020 and the deadline for submission of completed National Reports is 21 January 2021 (final dates will be updated once the dates for COP14 are agreed).
3. This COP14 NRF closely follows that of the NRF used for COP13, to permit continuity of reporting and analysis of implementation progress by ensuring that indicator questions are as far as possible consistent with previous NRFs (and especially the COP13 NRF). It is also structured in terms of the Goals and Strategies of the 2016-2024 Ramsar Strategic Plan adopted at COP12 as Resolution XII.2.
4. This COP14 NRF includes 90 indicator questions. In addition, Section 4 is provided as an optional Annex in order to facilitate the task of preparing the Party's National Targets and Actions for the implementation of each of the targets of the Strategic Plan 2016-2024 according to Resolution XII.2.
5. As was the case for previous NRF, the COP14 NRF includes an optional section (Section 5) to permit a Contracting Party to provide additional information, on indicators relevant to each individual Wetland of International Importance (Ramsar Site) within its territory.
6. Note that, for the purposes of this national reporting to the Ramsar Convention, the scope of the term "wetland" is that of the Convention text, i.e. all inland wetlands (including lakes and rivers), all nearshore coastal wetlands (including tidal marshes, mangroves and coral reefs) and human-made wetlands (e.g. rice paddy and reservoirs), even if a national definition of "wetland" may differ from that adopted by the Contracting Parties to the Ramsar Convention.

### The purposes and uses of national reporting to the Conference of the Contracting Parties

7. National Reports from Contracting Parties are official documents of the Convention and are made publicly available on the Convention's website.
8. There are seven main purposes for the Convention's National Reports. These are to:
  - i) provide data and information on how, and to what extent, the Convention is being implemented
  - ii) provide tools for countries for their national planning
  - iii) capture lessons and experience to help Parties plan future action;
  - iv) identify emerging issues and implementation challenges faced by Parties that may require further attention from the Conference of the Parties;
  - v) provide a means for Parties to account for their commitments under the Convention;
  - vi) provide each Party with a tool to help it assess and monitor its progress in implementing the Convention, and to plan its future priorities; and
  - vii) provide an opportunity for Parties to draw attention to their achievements during the triennium.
9. The data and information provided by Parties in their National Reports have another valuable purpose as well, since a number of the indicators in the National Reports on Parties' implementation provide key sources of information for the analysis and assessment of the "ecological outcome-oriented indicators of effectiveness of the implementation of the Convention".
10. To facilitate the analysis and subsequent use of the data and information provided by Contracting Parties in their National Reports, the Ramsar Secretariat holds in a database all the information it has received and verified. As for COP13, the COP14 reports will be in an online National Reporting system.

11. The Convention's National Reports are used in a number of ways. These include:

- i) providing an opportunity to compile and analyze information that contracting parties can use to inform their national planning and programming.
- ii) providing the basis for reporting by the Secretariat to each meeting of the Conference of the Parties on the global, national and regional implementation, and the progress in implementation, of the Convention. This is provided to Parties at the COP as a series of Information Papers, including:
  - \* the Report of the Secretary General on the implementation of the Convention at the global level;
  - \* the Report of the Secretary General pursuant to Article 8.2 (b), (c), and (d) concerning the List of Wetlands of International Importance); and
  - \* the reports providing regional overviews of the implementation of the Convention and its Strategic Plan in each Ramsar region;
- iii) providing information on specific implementation issues in support of the provision of advice and decisions by Parties at the COP.
- iv) providing the source data for time-series assessments of progress on specific aspects in the implementation of the Convention included in other Convention products. An example is the summary of progress since COP3 (Regina, 1997) in the development of National Wetland Policies, included as Table 1 in Ramsar Wise Use Handbook 2 (4th edition, 2010); and
- v) providing information for reporting to the Convention on Biological Diversity (CBD) on the national implementation of the CBD/Ramsar Joint Work Plan and the Ramsar Convention's lead implementation role on wetlands for the CBD. In particular, the Ramsar Secretariat and STRP used the COP10 NRF indicators extensively in 2009 to prepare contributions to the in-depth review of the CBD programme of work on the biological diversity of inland water ecosystems for consideration by CBD SBSTTA14 and COP10 during 2010 (see UNEP/CBD/SBSTTA/14/3). Similar use of COP13 NRF indicators is anticipated for the CBD's post-2020 global biodiversity framework.

## **12. The structure of the COP14 National Report Format**

**Section 1** provides the institutional information about the Administrative Authority and National Focal Points for the national implementation of the Convention.

**Section 2** is a 'free-text' section in which the Party is invited to provide a summary of various aspects of national implementation progress and recommendations for the future.

**Section 3** provides the 90 implementation indicator questions, grouped under each Convention implementation Goals and Targets in the Strategic Plan 2016-2024, and with an optional 'free-text' section under each indicator question in which the Contracting Party may, if it wishes, add further information on national implementation of that activity.

**Section 4** is an optional annex to allow any Contracting Party that has developed national targets to provide information on the targets and actions for the implementation of each of the targets of the Strategic Plan 2016-2024.

In line with Resolution XII.2, which encourages Contracting Parties "to develop and submit to the Secretariat on or before December 2016, and according to their national priorities, capabilities and resources, their own quantifiable and time-bound national and regional targets in line with the targets set in the Strategic Plan", all Parties are encouraged to consider using this comprehensive national planning tool as soon as possible, in order to identify the areas of highest priority for action and the relevant national targets and actions for each target.

The planning of national targets offers, for each of them, the possibility of indicating the national priority for that area of activity as well as the level of resourcing available, or that could be made available during the triennium, for its implementation. In addition, there are specific boxes to indicate the National Targets for implementation by 2021 and the planned national activities that are designed to deliver these targets. Ramsar Strategic Plan 2016-2024 shows the synergies between CBD Aichi Biodiversity Targets and Ramsar Targets. Therefore, the NRF provide an opportunity that Contracting Parties indicate as appropriate how the actions they undertake for the implementation of the Ramsar Convention contribute to achievement of the Aichi Targets according to paragraph 51 of Resolution XII.3.

**Section 5** is an optional annex to allow any Contracting Party that so wishes to provide additional information regarding any or all of its Wetlands of International Importance (Ramsar Sites).

## **General guidance for completing and submitting the COP14 National Report Format**

**Important** - please read this guidance section before starting to complete the National Report form

13. All Sections of the COP14 NRF should be completed in one of the Convention's official languages (English, French, Spanish).

14. The deadline for submission of the **completed NRF is January 21st 2021**. It will not be possible to

include information from National Reports received after that date in the analysis and reporting on Convention implementation to COP14.

15. The deadline for submission of **national targets is by 24 January 2020**

16. To help Contracting Parties refer to relevant information they provided in their National Report to COP12, for each appropriate indicator a cross-reference is provided to the equivalent indicator(s) in the COP12 NRF or previous NRF, shown thus: {x.x.x}

17. For follow up and where appropriate, a cross-reference is also provided to the relevant Key Result Area (KRA) relating to Contracting Parties implementation in the Strategic Plan 2009-2015.

18. Only Strategic Plan 2016-2024 Targets for which there are implementation actions for Contracting Parties are included in this reporting format. Those targets of the Strategic Plan that do not refer directly to Parties are omitted in the National Report Format as the information is provided through the Ramsar Sites Data Base or the Work Plan of the Scientific and Technical Review Panel (e.g. targets 6 and 14).

19. For each indicator question you can choose only one answer. If you wish to provide further information or clarification, do so in the additional information box below the relevant indicator question. Please be as concise as possible (**maximum of 500 words** in each free-text box).

20. The NRF should ideally be completed by the principal compiler in consultation with relevant colleagues in their agency and others within the government and, as appropriate, with NGOs and other stakeholders who might have fuller knowledge of aspects of the Party's overall implementation of the Convention. The principal compiler can save the document at any point and return to it later to continue or to amend answers. Compilers should refer back to the National Report submitted for COP13 to ensure the continuity and consistency of information provided. In the online system there is an option to allow consultation with others.

21. The completed NRF **must be accompanied by a letter that can be uploaded in the online system or send by email (nationalreports@ramsar.org) in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP14 National Report.**

If you have any questions or problems, please contact the Ramsar Secretariat for advice (nationalreports@ramsar.org).

## Section 1: Institutional Information

**Important note:** the responses below will be considered by the Ramsar Secretariat as the definitive list of your focal points, and will be used to update the information it holds. The Secretariat's current information about your focal points is available at <https://www.ramsar.org/search?f%5B0%5D=type%3Aperson#search-contacts>

### Name of Contracting Party

The completed National Report **must be accompanied by a letter** in the name of the Head of Administrative Authority, confirming that this is the Contracting Party's official submission of its COP14 National Report. It can be attached to this question using the "Manage documents" function (blue symbol below)

## **Section 2: General summary of national implementation progress and challenges**

In your country, in the past triennium (i.e., since COP13 reporting)

### **A. What have been the five most successful aspects of implementation of the Convention?**

- 1)
  - › 1) Integration of the wetlands concept as an integral part into the National Water Sector Strategy, IWRM-ICZM process and River Basin Management Plans.
- 2)
  - › 2) Development of research related to wetlands through the integration of wetlands concept and definitions into many academic programs especially into courses related to environmental geosciences, watersheds management and IWRM/ICZM in 2 universities in Lebanon as a start.
- 3)
  - › 3) Review of the RIS of existing Ramsar sites in Lebanon, in addition to starting the update of all related data in order to be submitted as soon as possible to the Ramsar Secretariat.
- 4)
  - › 4) Submission of the RIS of ANJAR-KFARZABAD inland wetland as a potential new Ramsar site which is still under review.
- 5)
  - › Development of a roadmap for Future Perspectives related to the National Wetlands Network in the context of the cooperation between the Ministry of Environment in Lebanon and the Ministry of Natural Resources and Environment of the Russian Federation in the field of environmental protection.

### **B. What have been the five greatest difficulties in implementing the Convention?**

- 1)
  - › Lack in staff and specialists in order to have a specialized unit working on the implementation of the Ramsar Convention and related issues as IWRM & ICZM.
- 2)
  - › Lack in budget, logistics and equipment which made difficult the continuous visiting, monitoring, surveying and managing of the Ramsar sites in order to have a continuous update of the RIS and related geodatabase of each of the existing sites in Lebanon.
- 3)
  - › insufficient implementation of the existing management plans in the Ramsar sites.
- 4)
  - › Lack in previous baseline data related to the existing Ramsar sites which made the present RIS related to each site weak and incomplete.
- 5)
  - ›

### **C. What are the five priorities for future implementation of the Convention?**

- 1)
  - › Membership in the standing Committee for Ramsar Convention and Creating the Ramsar National Committee and a related research unit in cooperation with other governmental agencies, universities and research institutes in Lebanon and abroad.
- 2)
  - › Promote the cooperation between Ramsar Convention and Barcelona Convention specifically for the implementation of ICZM Protocol in the three coastal Ramsar sites.
- 2)
  - › Promote the cooperation between Ramsar Convention and Barcelona Convention specifically for the implementation of ICZM Protocol in the three coastal Ramsar sites.
- 3)
  - › Working on the update of the RISs and the management plans and their implementation for each of the 4

Ramsar sites in Lebanon.

4)

> Creating a complete geodatabase and dynamic maps for all the existing sites and their integration into a GIS-Based system.

5)

> Elaboration of a National Wetlands Inventory.

Studying and Surveying of 6 new sites (oyoun es samak - oyoun orghoch - Afqa/Roueiss sub-basin - Jeita kasrtic system - El Assi watershed [Dardara waterfalls site] - Mansouri Beach) and creating the geodatabase of each of them in order to submit them gradually to the Ramsar Secretariat for official designation.

D. Do you (AA) have any recommendations concerning priorities for implementation assistance and requirements for such assistance from the Ramsar Secretariat?

> 1- The support of the Secretariat for the organisation of basic and advanced trainings and workshops which allow more interaction between specialists and implementing agencies regionally and internationally.

2- The support of the Secretariat for the elaboration of the national wetlands inventory.

3- More financial support for the participation of Lebanon to the Ramsar Convention events.

E. Do you (AA) have any recommendations concerning implementation assistance from the Convention's International Organisation Partners (IOPs)? (including ongoing partnerships and partnerships to develop)

> More financial support for the participation of Lebanon to the Ramsar Convention events.

F. How can national implementation of the Ramsar Convention be better linked with implementation of other multilateral environmental agreements (MEAs), especially those in the 'biodiversity cluster' (Convention on Biological Diversity (CBD), Convention on Migratory Species (CMS), Convention on International Trade in Endangered Species (CITES), World Heritage Convention (WHC), and United Nations Convention to Combat Desertification (UNCCD) and the United Nations Framework Convention on Climate Change (UNFCCC)?

> Through the close cooperation between the national focal points of each convention and especially the cooperation and regular meetings between different national committees in order to coordinate common issues.

G. How is the Ramsar Convention linked with the implementation of water policy/strategy and other strategies in the country (e.g., on sustainable development, energy, extractive industries, poverty reduction, sanitation, food security, biodiversity) and how this could be improved?

> The first step in linking the implementation of the Ramsar Convention in Lebanon with other policies/strategies has started with the implementation of water policy/strategy through the Strategic Environmental Assessment of the National Water Sector Strategy that is being reviewed in details by a group of experts from the Ministry of Environment and the Ministry of Energy and Water. In addition, all the other policies and strategies will be linked to the Ramsar Convention through a planned program targeting each of them in details.

H. According to paragraph 21 of Resolution XIII.18 on Gender and wetlands, please provide a short description about the balance between men and women participating in wetland-related decisions, programmes and research.

> women are playing a very important role in promoting the importance of wetlands especially that the Head of Tyre Ramsar site's committee is a very active woman and through the presence of many women working in NGOs, academic and research centers related directly or indirectly to the management and studies on wetlands.

I. Do you (AA) have any other general comments on the implementation of the Convention?

>

J. Please list the names of the organisations which have been consulted on or have contributed to the information provided in this report

>

## Section 3: Indicator questions and further implementation information

### Goal 1. Addressing the drivers of wetland loss and degradation

[Reference to Sustainable Development Goals 1, 2, 6, 8, 11, 13, 14, 15]

#### Target 1

Wetland benefits are featured in national/ local policy strategies and plans relating to key sectors such as water, energy, mining, agriculture, tourism, urban development, infrastructure, industry, forestry, aquaculture, fisheries at the national and local level.

[Reference to Aichi Target 2]

1.1 Have wetland conservation and the identification of wetlands benefits been integrated into sustainable approaches to the following national strategies and planning processes, including: {1.3.2} {1.3.3} KRA 1.3.i

### 1.1 Additional information

> All the above mentioned strategies and processes are being in general taken into consideration, and some more precise and specific applications are being planned gradually to incorporate wetlands issues into all the above mentioned national strategies and planning processes and through the application of Strategic Environmental Assessment and Environmental Impact Assessment according to Law#444/2002 and the Decree# 8213/2012 and the Decree#8633/2012.

### Target 2

Water use respects wetland ecosystem needs for them to fulfil their functions and provide services at the appropriate scale inter alia at the basin level or along a coastal zone.

## 8.6 Details

According to the Ramsar definition and classification of wetlands, the disaggregated information on wetland extent is as follows.

### Note:

The minimum information that should be provided is the total area of wetlands for each of the three major categories; “marine/coastal”, “inland” and “human-made”.

If the data on inventories are partial or not complete, use the information that is available.

Guidance on information on national wetland extent, to be provided in Target 8 “National Wetlands Inventory” of the National Report Form can be consulted at: <https://www.ramsar.org/document/guidance-on-information-on-national-wetland-extent>

## 8.6 Marine/Coastal Wetlands

	Square kilometers (km2)
A -- Permanent shallow marine waters in most cases less than six metres deep at low tide; includes sea bays and straits.	
B -- Marine subtidal aquatic beds; includes kelp beds, sea-grass beds, tropical marine meadows.	
C -- Coral reefs.	
D -- Rocky marine shores; includes rocky offshore islands, sea cliffs.	
E -- Sand, shingle or pebble shores; includes sand bars, spits and sandy islets; includes dune systems and humid dune slacks.	
F -- Estuarine waters; permanent water of estuaries and estuarine systems of deltas.	
G -- Intertidal mud, sand or salt flats.	
Ga -- Bivalve (shellfish) reefs.	
H -- Intertidal marshes; includes salt marshes, salt meadows, saltings, raised salt marshes; includes tidal brackish and freshwater marshes.	

I -- Intertidal forested wetlands; includes mangrove swamps, nipah swamps and tidal freshwater swamp forests.	
J -- Coastal brackish/saline lagoons; brackish to saline lagoons with at least one relatively narrow connection to the sea.	
K -- Coastal freshwater lagoons; includes freshwater delta lagoons.	
Zk(a) -- Karst and other subterranean hydrological systems, marine/coastal.	

## 8.6 Marine/Coastal Wetlands total (km2)

>

## 8.6 Inland Wetlands

	Square kilometers (km2)
L -- Permanent inland deltas.	
M -- Permanent rivers/streams/creeks; includes waterfalls.	
N -- Seasonal/intermittent/irregular rivers/streams/creeks.	
O -- Permanent freshwater lakes (over 8 ha); includes large oxbow lakes.	
P -- Seasonal/intermittent freshwater lakes (over 8 ha); includes floodplain lakes.	
Q -- Permanent saline/brackish/alkaline lakes.	
R -- Seasonal/intermittent saline/brackish/alkaline lakes and flats.	
Sp -- Permanent saline/brackish/alkaline marshes/pools.	
Ss -- Seasonal/intermittent saline/brackish/alkaline marshes/pools.	
Tp -- Permanent freshwater marshes/pools; ponds (below 8 ha), marshes and swamps on inorganic soils; with emergent vegetation water-logged for at least most of the growing season.	

Ts -- Seasonal/intermittent freshwater marshes/pools on inorganic soils; includes sloughs, potholes, seasonally flooded meadows, sedge marshes.	
U -- Non-forested peatlands; includes shrub or open bogs, swamps, fens.	
Va -- Alpine wetlands; includes alpine meadows, temporary waters from snowmelt.	
Vt -- Tundra wetlands; includes tundra pools, temporary waters from snowmelt.	
W -- Shrub-dominated wetlands; shrub swamps, shrub-dominated freshwater marshes, shrub carr, alder thicket on inorganic soils.	
Xf -- Freshwater, tree-dominated wetlands; includes freshwater swamp forests, seasonally flooded forests, wooded swamps on inorganic soils.	
Xp -- Forested peatlands; peat swamp forests.	
Y -- Freshwater springs; oases.	
Zg -- Geothermal wetlands.	
Zk(b) -- Karst and other subterranean hydrological systems, inland.	

## 8.6 Inland Wetlands total (km2)

>

## 8.6 Human-made wetlands

	<b>Square kilometers (km2)</b>
1 -- Aquaculture (e.g., fish/shrimp) ponds.	
2 -- Ponds; includes farm ponds, stock ponds, small tanks; (generally below 8 ha).	
3 -- Irrigated land; includes irrigation channels and rice fields.	
4 -- Seasonally flooded agricultural land (including intensively managed or grazed wet meadow or pasture).	

5 -- Salt exploitation sites; salt pans, salines, etc.	
6 -- Water storage areas; reservoirs/barrages/dams /impoundments (generally over 8 ha).	
7 -- Excavations; gravel/brick/clay pits; borrow pits, mining pools.	
8 -- Wastewater treatment areas; sewage farms, settling ponds, oxidation basins, etc.	
9 -- Canals and drainage channels, ditches.	
Zk(c) - Karst and other subterranean hydrological systems, human-made.

## Section 5: Optional annex to enable Contracting Parties to provide additional voluntary information on designated Wetlands of International Importance (Ramsar Sites)

### Guidance for filling in this section

1. Contracting Parties can provide additional information specific to any or all of their designated Ramsar Sites.
2. The only indicator questions included in this section are those from Section 3 of the COP14 NRF which directly concern Ramsar Sites.
3. In some cases, to make them meaningful in the context of reporting on each Ramsar Site separately, some of these indicator questions and/or their answer options have been adjusted from their formulation in Section 3 of the COP14 NRF.
4. Please include information on only one site in each row. In the appropriate columns please add the name and official site number (from the Ramsar Sites Information Service).
5. For each 'indicator question', please select one answer from the legend.
6. A final column of this Annex is provided as a 'free text' box for the inclusion of any additional information concerning the Ramsar Site.

A final column of this Annex is provided as a 'free text' box for the inclusion of any additional information concerning the Ramsar Site.
