- **Refer to 2.5.2 - In the COP7 National Reports, 35 CPs reported Ramsar sites where some change in ecological character had occurred or was likely to occur in the near future. This was true for 115 sites in 33 CPs, and two other CPs stated that changes had occurred to all or some of their sites. In COP7 Resolution VII.12, these CPs were urged to consider nominating these sites to the Montreux Record.**
- **Global Target – In the period up to COP8, promote the application and benefits of**

the Montreux Record as a tool of the Convention through disseminating reports and publications on the positive outcomes achieved by a number of countries which have now removed sites from the Record.
Refer to 2.7.2 and 2.8.3 also. Are regular internal reviews undertaken to identify factors potentially altering the ecological character of Ramsar sites? Yes

If Yes , have these reviews detected situations where changes in ecological character have occurred or may occur? Yes
If Yes , for how many sites was this case, which sites were they, and what actions were taken to address these threats? Four RS: Poodri, Floodplain of lower Dyje river, in the case of Litovelske Pomoravi and Trebon fishponds the reasons were substantially enlarged

Do all the Ramsar sites in your country have management plans **in place**? **No**

If **No**, how many sites do not have management plans in place and which sites are they? **Only one from ten: Floodplain of lower Dyje river.**

If plans are being prepared for some sites, please indicate which sites these are. **Floodplain of lower Dyje river.**

For those sites where management plans are in place, how many of these are being implemented fully, and which sites are they? **Very hardly to evaluate: management plans includes also long-term goals. The substantial parts of management plans were already implemented for Sumava peatlands, Novozamecky and Brehynsky fishpond, Lednice fishponds, Krkonose mountain mires, Libechovka and Psovka brooks, i.e. 5 RSs.**

Where plans are not in place, or not being fully implemented, what has prevented this from being done? **More reasons: in Trebon fishponds incorrect privatisation, in Litovelske Pomoravi and Poodri are MP mainly long-term, in Floodplain of lower Dyje common MP for all three RS under Memorandum of Understanding (§§§) has been started.**

- **Global Targets - The long-term targets are set by the *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance* (COP7 Resolution VII.11). Based on this, short-term targets for each wetland type will be derived [by the STRP].**

Further to 6.2.1 above: If your territory includes under-represented wetland types, has special attention been given to identifying suitable sites for designation? **Yes**

If **No**, what has prevented this from occurring? **Please elaborate.**

If **Yes**, has this included designations of wetlands including:

- coral reefs? **No**
- mangroves? **No**
- seagrass beds? **No**
- peatlands? **Yes**
- intertidal wetlands? (COP7 Resolution VII.21) **No**

Proposed national actions and targets: **see 6.2.1.**

Ministry, agency/department, or organization responsible for leading on this action: **Ministry of Environment**

6.2.4 Pay particular attention to the designation of new sites currently enjoying no special conservation status at national level, as a first step towards developing measures for their conservation and wise use. [CPs]

- **This question was not considered in the National Reports for COP7. It will be included for consideration in the NRs for COP8.**
- **Global Target - All CPs to consider this approach to ensuring the long-term conservation and wise use of wetlands that are subject to intense human use.**

Has your country designated wetland sites for the Ramsar List which previously had no special conservation status? **Yes**

If **No**, what has prevented this from happening? **Please elaborate.**

If **Yes**, please provide details. **The importance of RS candidate Krusnohorska mountain mires is comparable with Sumava peatlands. Majority of them are not particularly protected: the inclusion into Ramsar list we see as the possibility to promote their special protection according to legislation on nature conservation.**

AND: Are there plans for further such designations? **Yes/No**

If **No**, why not? **Please elaborate.**

If **Yes**, please elaborate. **To include the most important parts of RS candidate**

Krusnohorska mountain mires into particularly protected areas: National Nature Reserves and Nature Reserves.

Proposed national actions and targets: **to prepare all relevant documents for establishing above mentioned particularly protected areas; to ensure special protection for all key parts of this RS candidate.**

Ministry, agency/department, or organization responsible for leading on this action: **Ministry of Environment, relevant District Councils**

6.2.5 Consider as a matter of priority the designation of transfrontier wetland sites. [CPs]

- **The issue of transfrontier or shared wetlands is addressed in the *Guidelines for international cooperation under the Ramsar Convention (COP7 Resolution VII.19)* and the *Guidelines for integrating wetlands into river basin management (COP7 Resolution VII.18)*.**
- **Global Target - By COP8, for there to be over 50 transfrontier wetland sites designated under the Convention.**

For those CPs which 'share' wetlands with other CPs, have all suitable sites been designated under the Convention? **No**

If **No**, what has prevented this action being taken? **The importance of RS candidate Krusnohorska mountain mires has been found during the preparation of inventory of wetlands of the Czech Republic. The area lies on the boundary with previous Federal Republic of Germany, and it was inaccessible for a very long time. Nowadays, the suggestion is under finalizing.**

If **Yes**, are there arrangements in place between the CPs sharing the wetland for the cooperative management of the site? **Yes**

If **No**, what has prevented such arrangements from being introduced? **Please elaborate.**

Proposed national actions and targets:

Ministry, agency/department, or organization responsible for leading on this action: **Ministry of Environment, Ministry of Agriculture - the Directorate of Forests of the Czech Republic.**

If No , what has prevented this from happening? Please elaborate.
If Yes , please note how many such twinning arrangements are in place and indicate which sites are involved. Sumava peatlands RS, Trebon fishponds, Trebon peatlands, Floodplain of lower Dyje river.
AND: Do these arrangements involve: <ul style="list-style-type: none"> • sharing of information resources? Yes • transfer of financial resources? Yes • exchanges of personnel? Yes • other activities? Yes - common activities against common enemies (e.g. Channel Danube-Odra-Labe in the case of RSs on the boundary of Austria, Czech Republic and Slovakia)

<p>If No, what are the impediments to such a mechanism being introduced? Please elaborate.</p>
<p>If Yes, describe the mechanism and the conventions/treaties it is expected to consider. Regular, twice a year meeting at the Ministry of Environment with the focal points for all Conventions.</p>
<p>AND: Has the mechanism proven to be effective? Yes</p>
<p>If No, why not? Please elaborate.</p>
<p>If Yes, please elaborate. At least the exchange of information, up-to-date news, and also reduction of some work which already has been done by other convention activity.</p>

<p>Ministry, agency/department, or organization responsible for leading on this action: Ministry of Environment</p>
<p>7.2.2 Prepare project proposals together with other conventions and partner organizations, and submit them jointly to potential funding agencies. [CPs, SC, Bureau, Partners]</p>
