Has your country **completed** a review of its laws and institutions relating to wetlands? **Yes**

If **No**, what are the impediments to this being done? **Wetlands as a part of ecosystems are integrated in nature conservation legislation. The comprehensive review of all nature protection related legal acts has been made.**

If a review is **planned**, what is the expected timeframe for this being done? **No**

If the review has been **completed**, did the review result in amendments to laws or institutional arrangements to support implementation of the Ramsar Convention? **Yes**

<p>If <b>Yes</b>, what were the conclusions of this review? and what actions have been taken subsequently? <b></b></p>
<p>Proposed national actions and targets: <b>1.Ensure implementation and control of the efficiency of the National Programme on Biological Diversity</b> <b>2.Promote development of sector Action Plans and inclusion into the National Programme on Biological Diversity</b></p>
<p>Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, Nature Protection department, all relevant ministries.</b></p>

**Operational Objective 2.2: To integrate conservation and wise use of wetlands in all Contracting Parties into national, provincial and local planning and decision-making on land use, groundwater management, catchment/river basin and coastal zone planning, and all other environmental planning and management.**

Actions - Global and National Targets
<p><b>2.2.2 Promote the inclusion of wetlands in national, provincial and local land use planning documents and activities, and in all relevant sectoral and budgetary provisions. [CPs]</b></p> <ul style="list-style-type: none"> <li><b>Achieving integrated and cross-sectoral approaches to managing wetlands within the broader landscape and within river basin/coastal zone plans is another of the Convention's highest priorities in the next triennium.</b></li> <li><b>Global Target - By COP8, all CPs to be promoting, and actively implementing, the management of wetlands as integrated elements of river basins and coastal zones, and to provide detailed information on the outcomes of these actions in the National Reports for COP8.</b></li> </ul>
Is your country <b>implementing</b> integrated river basin and coastal zone management approaches? <b>Yes</b>
If <b>No</b> , what are the impediments to this being done? <b></b>
If integrated management approaches are being applied in part of the country, indicate the approximate percentage of the country's surface area where this is occurring and to which river basins and coastal areas this applies. <b></b>

Proposed national actions and targets: <b>Daugava River pilot project implemented by 2010</b>
Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, Environmental Protection department</b>

**Operational Objective 2.3: To expand the Guidelines and Additional Guidance on Wise Use to provide advice to Contracting Parties on specific issues not hitherto covered, and examples of best current practice.**

Actions - Global and National Targets
<p><b>2.3.1 Expand the Additional Guidance on Wise Use to address specific issues such as oil spill prevention and clean-up, agricultural runoff, and urban/industrial discharges in cooperation with other bodies. [CPs, STRP, Bureau, Partners]</b></p> <ul style="list-style-type: none"> <li><b>Global Target - Following COP7, the Bureau, with other appropriate</b></li> </ul>

collaborators, will produce a series of Wise Use handbooks, based on the outcomes of Technical Sessions at COP7.

- (added by the Ramsar Bureau pursuant to Resolution VII.14 *Invasive Species and wetlands*) CPs are requested “to provide the Ramsar Bureau with information on databases which exist for invasive species, information on invasive species which pose a threat to wetlands and wetland species, and information on the control and eradication of invasive wetland species.”**

Does your country **have** resource information on the management of wetlands in relation to the following which could be useful in assisting the Convention to develop further guidance to assist other CPs :

- oil spill prevention and clean-up? **Yes**
- agricultural runoff? **No**
- urban/industrial discharges? **Yes**
- invasive species? **No**
- other relevant aspects such as highway designs, aquaculture, etc.? **No** – **Yes**

In each case, if the answer was **Yes**, has this information been forwarded to the Ramsar Bureau for possible inclusion in the Wise Use Resource Centre (see 2.3.2 below)? **No**  
**Review has shown that there are no significant resource materials available to be exchanged with the Bureau.**

Proposed national actions and targets: **Provide Ramsar Bureau with resource information in all cases when it might be useful for other CPs.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department, Latvian Environmental Agency**

**2.3.2. Publicize examples of effective application of existing Guidelines and Additional Guidance on Wise Use. [CPs, Bureau, Partners]**

- Promoting and improving the availability of such resource materials is a priority under the *Convention’s Outreach Programme* (Resolution VII.9)**
- Global Target - By COP8, to have included in the Wise Use Resource Centre 500 appropriate references and publications as provided to the Bureau by CPs and other organizations.**

Further to 2.31. above, has your country, as urged by the Outreach Programme of the Convention adopted at COP7 (Resolution VII. 9), **reviewed** its resource materials relating to wetland management policies and practices? **Yes**

If **No**, what has prevented this being done? **Yes**

If **Yes**, have copies of this information been forwarded to the Ramsar Bureau? **No**

If **No**, what has prevented this being done? **Review has shown that there are no significant resource materials available to be exchanged with the Bureau.**

Proposed national actions and targets: **Provide Ramsar Bureau with resource information in all cases when it might be useful for other CPs.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department, Latvian Environmental Agency**

**Operational Objective 2.4: To provide economic evaluations of the benefits and functions of wetlands for environmental planning purposes.**

#### Actions - Global and National Targets

**2.4.1 Promote the development, wide dissemination, and application of documents and methodologies which give economic evaluations of the benefits and functions of wetlands. [CPs, Bureau, Partners]**

- **Given the guidelines available for this activity (see below: *Economic Valuation of Wetlands* handbook), this will be an area of higher priority in the next triennium.**
- **Global Target - By COP8, all CPs to be incorporating economic valuation of wetland services, functions and benefits into impact assessment and decision-making processes related to wetlands.**

Does your government **require** that economic valuations of the full range of services, benefits and functions of wetlands be prepared as part of impact assessments and to support planning decisions that may impact on wetlands? **No**

If **No**, what are the impediments to this being done? **Methodology for valuation is not yet developed for Latvia.**

If this applies in some, but not all cases, what is the expected timeframe for this to be required in all cases?

If **Yes**, has the inclusion of economic valuation into impact assessment resulted in wetlands being given special consideration or protection. **No Reply**

Proposed national actions and targets: **Develop guidelines and methodology for assessment of impact on biological diversity and valuation of wetland services.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department, National EIA Board**

**Operational Objective 2.5: To carry out environmental impact assessments (EIAs) at wetlands, particularly of proposed developments or changes in land/water use which have potential to affect them, notably at Ramsar sites, whose ecological character “is likely to change as the result of technological developments, pollution or other human interference” (Article 3.2 of the Convention).**

#### Actions - Global and National Targets

**2.5.2 Ensure that, at Ramsar sites where change in ecological character is likely as a**

**result of proposed developments or changes in land/water use which have potential to affect them, EIAs are carried out (with due consideration of economic valuations of wetland benefits and functions), and that the resulting conclusions are communicated to the Ramsar Bureau and fully taken into account by the authorities concerned. [CPs]**

- **Global Target - In the next triennium, CPs will ensure that EIAs are applied to any such situation and keep the Bureau advised of the issues and the outcomes of these EIAs.**

Has an EIA been carried out in **all** cases where a change in the ecological character of a Ramsar site within your country was likely (or possible) as a result of proposed developments or changes in land/water use? **Yes**

If **No**, what has prevented this from occurring?

If **Yes**, has this EIA, or have these EIAs, given due consideration to the full range of environmental, social and economic values of the wetland? (See also 2.4.1 above) **Yes**

AND: Have the results of the EIA been transmitted to the Ramsar Bureau? **No**

If **No**, what has prevented this from occurring? **There is only one case and EIA is still in process. When it will be finished the results will be transmitted to the Bureau.**

Proposed national actions and targets: **Ensure that EIAs are applied for any development which may have impact on Ramsar sites**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, National EIA Bureau**

**2.5.3 Carry out EIAs at other important sites, particularly where adverse impact on wetland resources is likely, due to a development proposal or change in land/water use. [CPs]**

- **Global Target - By COP8, all CPs to require EIAs under legislation for any actions which can potentially impact on wetlands and to provide detailed reports on advances in this area in their National Reports for COP8.**

Are EIAs required in your country for **all** cases where a wetland area (whether a Ramsar site or not) may be adversely impacted due to a development proposal or change in land/water use? **No**

If **No**, what are the impediments to this occurring? **In accordance with Article 4 of the "Law on EIA" it is required for certain developments listed in the Annex to the law, developments which may have transboundary impact in accordance with international agreements and if Regional Environmental Boards (REB) have so requested on the basis of the results of an initial assessment. Since Latvia is situated in humid climate zone it is not possible to demand EIA for all cases where a wetland area may be adversely impacted (following the broad definition of wetlands in the Ramsar Convention). Cases which may have an impact on protected areas, Ramsar sites and IBAS are under special control by REB.**

If <b>Yes</b> , are such EIAs required to give due consideration to the full range of environmental, social and economic values of the wetland? (See COP7 Resolution VII.16, also 2.4.1 & 2.5.2 above.) <b>No Reply</b>
Are EIAs “undertaken in a transparent and participatory manner which includes local stakeholders” (COP7 Resolution VII.16)? <b>Yes</b>
If <b>No</b> , what are the impediments to this occurring? <b></b>
Proposed national actions and targets: <b>1. Develop specific criteria for assessing the impact of various activities on biological diversity, and define the procedure of application of the criteria</b> <b>2. Improve public participation in the EIA process, as well as ensure accessibility to EIA reports.</b>
Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, Nature Protection department, National EIA Board</b>

<b>2.5.4 Take account of Integrated Environmental Management and Strategic Environmental Assessment (at local, provincial and catchment/river basin or coastal zone levels) when assessing impacts of development proposals or changes in land/water use. [CPs]</b>
(Refer to 2.5.3 above) In addition to the assessment of the potential impact of specific projects on wetlands, has your country <b>undertaken</b> a review of all government plans, programmes and policies which may impact negatively on wetlands? <b>No</b>
If <b>No</b> , what has prevented this from occurring? <b>Amendments to the Law on EIA are prepared and have been submitted to the Government. Rejected in 2001.</b>
If <b>Yes</b> , has this review been undertaken as part of preparing a National Wetland Policy or similar instrument? (refer 2.12 above) <b>No Reply</b>
Or as part of other national policy or planning activities? <b>No Reply</b> – <b></b>
Proposed national actions and targets: <b>Amendments to the Law on EIA accepted by the Parliament by 2005.</b>
Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, National EIA Bureau</b>

**Operational Objective 2.6: To identify wetlands in need of restoration and rehabilitation, and to implement the necessary measures.**

<b>Actions - Global and National Targets</b>
<b>2.6.1 Use regional or national scientific inventories of wetlands (Recommendation 4.6), or monitoring processes, to identify wetlands in need of restoration or rehabilitation. [CPs, Partners]</b>

- **The completion of such inventories is a continuing area of priority for the Convention.**
- **Global Target - Restoration/rehabilitation inventories to be completed by at least 50 CPs by COP8.**

Has your country **completed** an assessment to identify its priority wetlands for restoration or rehabilitation? (COP7 Resolution VII.17) **No**

If **No**, what has prevented this from being done? **Losses of wetlands are insignificant in Latvia. This is not a priority action for wetland policy and protection. Some wetland restoration actions are planned within management plans for areas with wetlands in order to restore their original waterlevel (peatlands) or remove sediments (lakes).**

If this has been done for only part of the country, please indicate for which areas or river basins.

If **Yes** (that is, an assessment has been **completed**), have actions been taken to undertake the restoration or rehabilitation of these priority sites? **No Reply**

If **No**, what has prevented this from being done?

If **Yes**, please provide details.

Proposed national actions and targets: **Wetlands kept at targeted ecological character in long run.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Teici Nature Reserve administration, Kemeri National Park administration, Engure Lake Fund, Rucava municipality.**

### **2.6.2 Provide and implement methodologies for restoration and rehabilitation of lost or degraded wetlands. [CPs, STRP, Bureau, Partners]**

- **There is considerable information resource on this subject, although it is not as readily accessed as desirable.**
- **Global Target - The addition of appropriate case studies and information on methodologies, etc., to the Convention's Wise Use Resource Centre (refer to 2.3.2 above also) will be a priority in the next triennium.**

Refer to 2.3.1 and 2.3.2. Does your country **have** resource information on the restoration or rehabilitation of wetlands? **Yes**

If **Yes**, has this been forwarded to the Ramsar Bureau for possible inclusion in the Wise Use Resource Centre and for consideration by the STRP Expert Working Group on Restoration? **No**

If this material has not been forwarded to the Bureau, what has prevented this from occurring? **Review has shown that there are no significant resource materials available to exchange them with the Bureau.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department, administrations of protected areas hosting wetlands.**

**2.6.3 Establish wetland restoration / rehabilitation programmes at destroyed or degraded wetlands, especially in association with major river systems or areas of high nature conservation value (Recommendation 4.1). [CPs]**

- **The Convention will continue to promote the restoration and rehabilitation of wetlands, particularly in situations where such actions will help promote or retain the 'health' and productivity of waterways and coastal environments.**
- **Global Target - By COP8, all CPs to have identified their priority sites for restoration or rehabilitation and for projects to be under way in at least 100 CPs.**

Refer to 2.6.1 above.

**Operational Objective 2.7: To encourage active and informed participation of local communities, including indigenous people, and in particular women, in the conservation and wise use of wetlands.**

**Actions - Global and National Targets**

**2.7.1 Implement Recommendation 6.3 on involving local and indigenous people in the management of wetlands. [CPs, Bureau]**

- **Global Target - In the next triennium, the implementation of the Guidelines on local communities' and indigenous people's participation (COP7 Resolution VII.8) is to be one of the Convention's highest priorities. By COP8, all CPs to be promoting local stakeholder management of wetlands.**

Is your government **actively** promoting the involvement of local communities and indigenous people in the management of wetlands? **Yes**

If **No**, what are the impediments to this occurring?

If **Yes**, describe what special actions have been taken (See also 2.7.2, 2.7.3 and 2.7.4 below) (COP7 Resolution VII.8). **For all Ramsar sites or other larger protected territories Consultative boards are established. These Boards have members from all municipalities and stake holder groups (for example, fishermen, foresters, tourism promoters).**

Proposed national actions and targets: **Consultative Boards established for 10 territories by year 2003**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department**

**2.7.2 Encourage site managers and local communities to work in partnership at all levels to monitor the ecological character of wetlands, thus providing a better understanding of management needs and human impacts. [CPs]**

- **The Convention's Outreach Programme (COP7 Resolution VII.9) seeks to give such community participation higher priority as an education and empowerment tool of the Convention.**

Does your government **actively encourage or support** site managers and local communities in monitoring the condition (ecological character) of Ramsar sites and other wetlands? (Also refer to Operational Objective 5.1.) **Yes**

If **No**, what prevents this from occurring?

If **Yes**, does this include both site managers and local communities, where they are not the same people? **No** **Monitoring is executed mainly by site managers**

AND, where such monitoring occurs, are the findings being used to guide management practices? **Yes**

If **No**, what prevents this from happening? **Please elaborate.**

Proposed national actions and targets: **1. Identify biological diversity indicators and develop their monitoring system.**

**2. Develop a unified system of monitoring of biological diversity.**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Latvian Environmental Agency**

**2.7.3 Involve local communities in the management of wetlands by establishing wetland management committees, especially at Ramsar sites, on which local stakeholders, landowners, managers, developers and community interest groups, in particular women's groups, are represented. [CPs, Partners]**

- **Global Target - Ramsar site management committees operating in at least 100 CPs, and including non-government stakeholder representation.**

Are there wetland site management committees **in place** in your country? **Yes**

If **No**, what are the impediments to such being established? **Please elaborate.**

If **Yes**, for how many sites are such committees in place? **6**

AND: How many of these are Ramsar sites? **3**

AND: Of these committees, how many include representatives of local stakeholders? **6**

AND: Of these, how many have women's groups represented? **not relevant for Latvia**

Proposed national actions and targets: **To have 10 Consultative Boards established by 2005**

Ministry, agency/department, or organization responsible for leading on this action: **MEPRD, Nature Protection department**

**2.7.4 Recognize and apply traditional knowledge and management practice of indigenous people and local communities in the conservation and wise use of wetlands. [CPs]**

- **Refer to 2.7.1 above.**
- **Global Target - This will be addressed in the next triennium, possibly in partnership with the Convention on Biological Diversity and Convention to Combat Desertification, which have already initiated work in this area.**

Has your government **made any special efforts** to recognize and see applied traditional knowledge and management practices? **No Reply**

If **No**, what has prevented this from occurring? **not relevant for Latvia**

If **Yes**, please provide details of how this traditional knowledge was recognized and then put into practice. **[REDACTED]**

Proposed national actions and targets: **[REDACTED]**

Ministry, agency/department, or organization responsible for leading on this action: **[REDACTED]**

**Operational Objective 2.8: To encourage involvement of the private sector in the conservation and wise use of wetlands.**

**Actions - Global and National Targets**

**2.8.1. Encourage the private sector to give increased recognition to wetland attributes, functions and values when carrying out projects affecting wetlands. [CPs, Bureau, Partners]**

- **Global Target - In the next triennium, the efforts to work in partnership with the private sector will be further increased and the Bureau will seek to document and make available case studies on some of the more effective and innovative approaches. By COP8, the target is to have private sector support for wetlands conservation in more than 100 CPs.**

Have **special efforts been made** to increase the recognition of wetland attributes, functions and values among the private sector in your country? **Yes**

If **No**, what has prevented this from happening? **[REDACTED]**

If **Yes**, describe these special efforts. **World Bank's loan has been provided to establish local private company managing Pape wetland, in particular - harvesting reed and processing it for roof cover.**

AND: Have these efforts been successful? **Yes**

If <b>No</b> , why not? [REDACTED]
If <b>Yes</b> , how do you judge this success? Financial support for management or monitoring? Active involvement in management or monitoring? (Refer to 2.8.3 below) Application of Ramsar's Wise Use principles by private sector interests? (Refer to 2.8.2 below)? Other criteria? <b>There is active involvement in management of the wetland and monitoring secured. Company is able to return loan in time. (No complaints from the WB).</b>
Proposed national actions and targets: <b>Assist private sector to understand potential values of wetlands and benefits from the sustainable use of wetland resources.</b>
Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, Nature Protection department</b>

<b>2.8.2 Encourage the private sector to apply the Wise Use Guidelines when executing development projects affecting wetlands. [CPs, Bureau, Partners]</b>
<ul style="list-style-type: none"> <li><b>Global Target - In the next triennium the application of this tool for promoting Wise Use will be a priority under the Convention. By COP8, the target is to have more than 50 CPs which have completed reviews of their incentive measures.</b></li> </ul>

**Operational Objective 6.2: To increase the area of wetland designated for the List of Wetlands of International Importance, particularly for wetland types that are under-represented either at global or national level.**

<b>Actions - Global and National Targets</b>
<b>6.2.1 Promote the designation for the Ramsar List of an increased area of wetland, through listing by new Contracting Parties, and through further designations by current Contracting Parties, in particular developing countries, in order to ensure the listing of a representative range of wetland types in the territory of each Contracting Party and in each Ramsar region. [CPs, Bureau, Partners]</b>
<ul style="list-style-type: none"> <li><b>Global Target - As proposed in the Strategic Framework, the short-term target of the Ramsar List should be to achieve the designation of 2000 sites, in accordance with the systematic approach advocated therein, by the time of COP9 in the year 2005. In addition, by COP8 the target is to have at least 20 CPs that are applying a systematic approach to site selection nationally.</b></li> </ul>
Refer also to 6.1.1, 6.1.2, and 6.2.3. Has your country taken a systematic approach to identifying its future Ramsar sites (as promoted in the <i>Strategic Framework for the List – COP7 Resolution VII.11</i> )? <b>Yes</b>

Proposed national actions and targets: <b>To designate three new sites by 2002.</b>
Ministry, agency/department, or organization responsible for leading on this action: <b>MEPRD, Nature Protection department</b>

**6.2.3 Give priority attention to the designation of new sites from wetland types currently under-represented on the Ramsar List, and in particular, when appropriate, coral reefs,**

**mangroves, sea-grass beds and peatlands. [CPs]**

- **Global Targets - The long-term targets are set by the *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance* (COP7 Resolution VII.11). Based on this, short-term targets for each wetland type will be derived [by the STRP].**

Further to 6.2.1 above: If your territory includes under-represented wetland types, has special attention been given to identifying suitable sites for designation? **Yes**

If **No**, what has prevented this from occurring?

If **Yes**, has this included designations of wetlands including:

- coral reefs? **No**
- mangroves? **No**
- seagrass beds? **No**

If **Yes**, please provide details.

AND: Are there plans for further such designations? **No**

If **No**, why not? **See above**

If **Yes**, please elaborate.

Proposed national actions and targets: **To maintain status for wetlands designated for the Ramsar List.**

- **Global Target - By COP8, for there to be over 50 transfrontier wetland sites designated under the Convention.**

For those CPs which 'share' wetlands with other CPs, have all suitable sites been designated under the Convention? **No**
