

CONVENTION ON WETLANDS  
CONVENTION SUR LES ZONES HUMIDES  
CONVENCIÓN SOBRE LOS HUMEDALES  
(Ramsar, Iran, 1971)

## **5<sup>th</sup> European Regional Meeting** **on the implementation and effectiveness of the Ramsar Convention** **4-8 December 2004, Yerevan, Armenia**

# **Annotated Programme and Agenda**

### **Aim of the Meeting**

During its 30<sup>th</sup> meeting, the Convention's Standing Committee recognized the value of mid-term meetings of regional groupings of Contracting Parties and pre-accession countries in preparation of the ninth meeting of the Conference of the Parties (COP9) to be held in Kampala, Uganda, 7-15 November 2005 with the theme "**Wetlands and water – supporting life, sustaining livelihoods**".

The 5<sup>th</sup> Regional Meeting of the European Contracting Parties aims to analyse the major issues and concerns that characterize the expansion of the Convention and its work in the region. It will provide the opportunity to share experience and to discuss common problems, major achievements, and the need for future actions. Each participant is encouraged to engage actively in the debate. To allow so, half of the Meeting time is foreseen for discussions. Oral presentations will be kept to a minimum. They are either short introductions to the discussions on specific topics, or brief presentations of case studies and lessons learnt. Additional background information, baseline documentation, and case studies will be displayed in poster form or made available through hand-outs, display copies, exhibits, and on the Ramsar website. The foremost aim of the Meeting is to physically meet and interact with other people.

### **Using the Ramsar Tools**

Ramsar COPs are substantive meetings that adopt a significant array of guidelines and resolutions (decisions) for the implementation of the Convention. In 2004, the Secretariat published the 2<sup>nd</sup> edition of the "**Ramsar Handbooks for the Wise Use of Wetlands**", providing an overview of existing guidelines in 14 volumes. They are available on CD, or can be downloaded at [www.ramsar.org/lib\\_handbooks\\_e.htm](http://www.ramsar.org/lib_handbooks_e.htm). Further guidelines, requested by COP8, are in preparation by the Scientific and Technical Review Panel (STRP) for consideration by COP9. The workshops of the Regional Meeting will discuss their subjects.

In April 2003, Contracting Parties were supplied with the **National Planning Tool/National Report Format** for COP9. This tool was developed to plan the application of the Convention's **Strategic Plan 2003-2008** at national level. Contracting Parties were asked to prepare National Targets and Actions and to communicate them to the Secretariat. The Regional Meeting will provide an opportunity to discuss experience with the implementation of the actions listed in the Strategic Plan, to identify key issues for the Convention's work in Europe, and to make recommendations for improvement of its regional services.
