CONVENTION ON WETLANDS (Ramsar, Iran, 1971) 52<sup>nd</sup> Meeting of the Standing Committee Gland, Switzerland, 13-17 June 2016

SC52-08 Rev.1

## Secretariat Work Plan for 2016

## **Actions requested:**

The Standing Committee is invited to take note of and approve the Secretariat 2016 Work Plan, which is based upon the triennium workplan and also includes the priority actions requested by the Executive Team in the Interim Arrangements for Secretariat Administration of November 2015.

- 1. The 12<sup>th</sup> meeting of the Conference of the Parties concluded with 16 Resolutions, containing decisions and specific instructions to the Secretariat.
- 2. The activities of the Secretariat have been defined for each of the decisions derived from the COP12 Resolutions, and then mapped against the goals and targets of the Ramsar 4<sup>th</sup> Strategic Plan (SP4), to develop the Work Plan for the 2016-2018 triennium.
- 3. This workplanning was done in a collaborative workshop involving the participation of all staff members of the Ramsar Convention Secretariat, from 21-24 July 2015. The workshop resulted in a detailed spreadsheet of activities and tasks for the triennium, mandated by COP12 Resolutions, and cross-referenced against the targets of SP4. Each activity has a leader within the Secretariat, with the detailed tasks being allocated to various Secretariat staff in a collaborative way. Ongoing Secretariat duties are also considered within this spreadsheet. The 2016 workplan for the Secretariat as well as individual 2016 workplans for Secretariat staff members are derived from the spreadsheet.
- 4. Standing Committee Decision SC51-10 instructed the Secretariat to prepare a revised Secretariat Work Plan for the 2016-2018 triennium. The annual Work Plan for 2016 in Annex 1 below was derived from the Work Plan for the 2016-2018 triennium. It also includes the priority action items requested by the Executive Team in the Interim Arrangements for Secretariat Administration (see Document SC52-04 Annex 1) as follows:
  - MOU for the COP13 (and other MOUs deemed appropriate by the Executive Team);
  - An audit of the Budget to ensure it properly aligns to priorities;
  - Preparations for SC52 in 2016;
  - Complete implementation of working webpage and RSIS;
  - Review consultancies and rationalize where possible;
  - Review resource mobilization, especially as it relates to fund-raising, to ensure the capture
    of work undertaken already so that an incoming SG is in a position to reinvigorate this
    program. This review should be undertaken in conjunction with the Resource Mobilization
    Working Group;
  - Evaluation of COP12 (this was completed in December 2015 and thus is not included in the 2016 workplan).

## Annex 1 Secretariat 2016 Work Plan

Goal 1
Addressing the Drivers of Wetland Loss and Degradation

Target	Activities	Indicator	Team Leader(s)	
Target 1: Wetland benefits are featured in national/local policy strategies and plans relating to key sectors such as water, energy, mining, agriculture, tourism, urban development, infrastructure, industry, forestry, aquaculture, fisheries at the national	1.1 Support Contracting Parties to increase attention in decision-making to the significance of wetlands benefits, through National Wetland Committees collaborating with relevant government departments (Resolution XII.9 target 1.2). Develop best practice examples targeted towards specific sectors.  1.2 Implement the Conceptual Framework for the wise use of wetlands (Resolution IX.1 Annex	Number of National Wetland Committees supported through- Relevant guidance (e.g. TEEB report, Ramsar Handbooks), and case studies updated and disseminated to CPs and water users. Individual sectors namely water, aquaculture, tourism, agriculture, forestry, mining and land use planning targeted with specific examples and best practices. Contracting Parties, IOPs and other interested stakeholders targeted and joint fundraising proposals	Leader(s) SG/DSG/Com ms/SRAs  SG/DSG/SRAs	Comment [EL1]: Senegal Comment [EL2]: USA: task is for CPs
and local level.	A) the Integrated Framework for the Convention's water related guidance (Resolution IX.1 Annex C) and Resolution XI.21 Wetlands and sustainable development, as stated in Resolution XII.3 para.50, through resource mobilization for the protection and wise use of wetlands. Undertake a review of all resource mobilization efforts together with the Working Group on Resource Mobilization.	developed in all regions, to bilateral and multilateral donors such as GEF and others, private sector entities and philanthropic foundations.  Review of resource mobilization completed.		
Target 2: Water use respects wetland ecosystem needs for them to fulfil their functions and provide services at the appropriate scale inter alia at the basin level or along a coastal zone.	2.1 Dissemination of Ramsar Handbooks, Factsheets, Briefing Notes and other STRP products on water related guidance, river basin management, water allocation and management, managing groundwater as well as other related guidance in IWRM and good practices to CPs and	Ramsar guidance on water allocation and management for ecosystems disseminated to all Parties to support decision-making on water resource management, as a contribution to achieving of SDG 6.6. water resources management and water efficiency plans. Networks of water users targeted to assist in	SG/Head of Comms/ SRAs	
I I	water users to ensure that the wise use provisions of the Convention are applied.  2.2 Increase efforts to integrate wetland management plans into integrated water resources management plans and efficiency plans at basin level, as well as into spatial planning/land-use plans.	Guidelines and projects developed together with river basin commissions to strengthen integration of wetland management plans into their work, with the aim of mobilizing GEF7 funding (SDG 6.6).
