Does there exist a comprehensive national inventory (as opposed to a directory of important sites; see 6.1.1 above) for your country? **Yes/No**

If **No**, what are the impediments to such an inventory being prepared? **0**

If only some parts of the country have had inventories completed, please indicate which parts these are. <b>Only an inventory of all ecosystems for the lowland (savannah belt and coastal plain). The inventory was completed in 1978.</b>
AND: What is the likely timeframe for completing the national inventory? <b>Depends on external funding</b>
If a national inventory has already been completed, when was it finalized? <b></b>
AND: Is the information housed where it is accessible to stakeholders and the international community? (COP7 Resolution VII.20) <b>Yes/No</b>
If <b>No</b> , what are the impediments to this occurring? <b></b>

<b>Actions - Global and National Targets</b>
<b>6.2.1 Promote the designation for the Ramsar List of an increased area of wetland, through listing by new Contracting Parties, and through further designations by current Contracting Parties, in particular developing countries, in order to ensure the listing of a representative range of wetland types in the territory of each Contracting Party and in each Ramsar region. [CPs, Bureau, Partners]</b>

- **Global Target - As proposed in the Strategic Framework, the short-term target of the Ramsar List should be to achieve the designation of 2000 sites, in accordance with the systematic approach advocated therein, by the time of COP9 in the year 2005. In addition, by COP8 the target is to have at least 20 CPs that are applying a systematic approach to site selection nationally.**
