**SUMMARY OF IMPLEMENTATION (OPTIONAL)**

*Please, include a summary on the implementation of Ramsar Convention in your country during the last triennium*

In the last triennium, Malaysia has listed three wetland sites as Ramsar Sites bringing the total number of Ramsar sites in Malaysia to four. Malaysia will be nominating another site as a Ramsar Site soon.

**OPERATIONAL OBJECTIVE 1. INVENTORY AND ASSESSMENT**

**Action 1.1.1.-** Promote and encourage the use of standard wetland inventory methodologies following the *Ramsar Framework for Wetland Inventory (Resolution VIII.6)*, to undertake, update and disseminate national (or, where appropriate, provincial) scientific inventories of wetlands.

1.- Country has a comprehensive National Wetland Inventory <i>(if inventory exists, please include the number of sites)</i>	<b>G</b>	<u>N<sup>o</sup> wetlands / Ramsar sites</u>
	<i>Choose an answer for each indicator</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>94 / 4</b>

The existing inventory was done in 1987. A new inventory using the Asian Wetland Inventory Model is being carried out.

**Action 1.2.7.-** Undertake assessments of water quality and quantity available to, and required by, wetlands, to support the implementation of the *Guidelines for the allocation and management of water for maintaining the ecological functions of wetlands (Resolution VIII.1)*, as a contribution to the WSSD Plan of Implementation.

1. The water quality and quantity available to, and required by, wetlands has been assessed	<b>D</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
---	----------	--

**2.- Implementation progress since COP8 [Please include additional comments on the assessment undertaken.]**

Malaysia is undertaking a project to develop conservation models for three wetland areas in the country. These are peat swamps in the Southeast of Pahang, Klias Peninsula in Sabah and Loagan Bunut in Sarawak. The models will address the hydrological, biological, ecological and economic aspects of management of the sites. Water issues will be studied under the hydrological assessment component of the project. The lessons learnt from this project would guide management of all other wetland sites in Malaysia.

**OPERATIONAL OBJECTIVE 2. POLICIES AND LEGISLATION, INCLUDING IMPACT ASSESSMENT AND VALUATION**

**Action 2.1.2.-** Ensure that wetland policies are fully integrated into and harmonized with other strategic or planning processes and documents, in particular those related to biodiversity, desertification, climate change, agriculture, trade in endangered species, water resource management, integrated coastal zone management and environmental planning in general including national strategies for sustainable development called for by the WSSD. When these other documents include chapters or sections on different ecosystems, ensure that one of them is devoted to wetlands.

1. Wetland issues have been incorporated into national strategies for sustainable development called for by WSSD	<b>D</b>	<i>Choose an answer for each indicator</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
2. Wetland issues have been incorporated into poverty eradication strategies	<b>A</b>	
3. Wetland issues have been incorporated into water resources management and water efficiency plans	<b>B</b>	
4. Wetland issues (conservation, wise use, restoration/rehabilitation) have been integrated into other sectoral strategic or planning processes and documents at any of the following levels: national, regional, provincial, and local	<b>B</b>	

5.- Implementation progress since COP8 *[Please include additional comments on the incorporation of wetland issues into other sectoral strategic or planning processes.]*

The National Physical Plan on land use launched in 2002 categorises many wetland sites as *environmentally sensitive areas* . This category calls for care in planning and utilization of the areas involved.

**Action 2.2.4.-** Promote the continuing development, wide dissemination - primarily through the Internet-based resource kit (<http://www.biodiversityeconomics.org/assessment/ramsar-503-01.htm>) and application of methodologies to undertake valuations of the economic, social and environmental benefits and functions of wetlands, in collaboration with the *International Association of Impact Assessment (IAIA)*, Ramsar’s International Organization Partners, and interested Parties and organizations.

Progress has been made in the development and/or application of methodologies for the valuation of economic, social and environmental benefits and functions of wetlands	<b>D</b>	<i>Choose an answer for each indicator</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
2. The Party has contributed to the STRP work on methodologies for economic, social and environmental valuation of wetland benefits and functions	<b>C</b>	

3.- Implementation progress since COP8 *[Please include additional comments on progress made and contribution to STRP work, if applicable.]*
