<b>RESOURCING:</b>	<b>B</b>	<i>A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer</i>
<b>TARGETS (text answer):</b>	To apply the strategic framework and guidelines for the future development of the Ramsar List	
<b>PLANNED ACTIVITIES (text answer):</b>	In designating new Ramsar sites, strategic framework and guidelines will be used	

### COP9 REPORT SECTION

**Action 10.1.1.-** Renew efforts to apply the *Strategic Framework and guidelines for the future development of the Ramsar List* (Resolution VII.11) including, as a matter of priority the establishment of a strategy and priorities for the further designation of Ramsar sites so as to achieve, as soon as possible, the coherent national networks called for in the Vision for the List. (Resolution VIII.10).

**GLOBAL TARGET 2003-2005:** Report on implementation progress to the Ramsar Bureau by 31 December 2003, with consolidated Bureau report circulated to all Parties by 31 March 2004. Each CP which has not designated a Ramsar site since accession to the Convention to have designated at least one new site. Designation of a further 55 million ha and 250 Ramsar sites, as progress towards global targets of 2500 sites and 250 million ha by 2010.

<b>1. A strategy and priorities have been established for further designation of Ramsar sites, in application of the Strategic Framework for the Ramsar List</b>	<b>B</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
3 new sites have been declared in 02.02.2005 (WWD) such as; Yumurtalik Lagoon, Kizoren Obrouk and Meke Maar. 8 new sites will be declared till COP9.		

**Action r10.1.i.-** Identify all wetlands which potentially qualify for designation as Ramsar sites, as a concrete output of the strategy and priorities called for in Action 10.1.1, establish targets for future designation in terms of number of sites to be designated, and communicate these targets to each meeting of the Conference of the Parties and to the Ramsar Bureau. (Resolution VIII.10)

<i>See action 1.1.2</i>		
<b>1. All potential Ramsar sites have been identified and targets for future designations have been defined.</b>	<b>B</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
135 sites are defined as Wetland of International Importance (including existing 12 Ramsar sites). A priority list has been prepared.		

**Action r10.1.ii.-** Use the appropriate 1% thresholds contained in *Waterbird Population Estimates 3rd Edition* in identifying and designating *Wetlands of International Importance* under Criterion 6 of the *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance* (Resolution VIII.11). (Resolution VIII.38)

1.- The appropriate 1% thresholds contained in <i>Waterbird Population Estimates 3rd Edition</i> have been used in identifying and designating Ramsar sites under Criterion 6 ( <i>if applicable, please include number of sites designated under Criterion 6</i> )	<b>B</b> <i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 10/12
<b>2.- Implementation progress since COP8 [Please include the list of designated sites and any other additional comments on the implementation of this action that you consider relevant.]</b>		
The criterion of % 1 thresholds has been used for 10 Ramsar sites. In potential Ramsar sites this criterion is defined for .....		

**Action 10.1.2.-** In undertaking Action 10.1.1, give priority attention to the designation sites for each representative, rare or unique wetland types present in the territory of a Contracting Party, as well as to wetland types currently under-represented in the Ramsar List, including, inter alia, karst and other subterranean hydrological systems, coral reefs, mangroves, seagrass beds, salt marshes, tidal flats, peatlands, wet grasslands, temporary pools, arid-zone wetlands and mountain wetlands (Resolution VIII.12), and in so doing apply the guidelines so far approved by the COP to assist in the designation of some of these wetland types (Resolutions VIII.11 and VIII.33), and report on progress to COP9.

<i>See action 1.1.2</i>		
1.- Designation as Ramsar sites of representative, rare or unique wetland types present in the territory has been done ( <i>if applicable, please include number of sites designated</i> ).	<b>B</b> <i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 2/12
<b>2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments on the implementation of this action that you consider relevant.]</b>		
Kizoren Obrouk and Meke Maar are declared according to this criterion.		
3.- Designation of wetland types currently under-represented in the Ramsar List has been done ( <i>if applicable, please include number of sites designated</i> ).	<b>B</b> <i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 3
<b>4.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments on the implementation of this action that you consider relevant.]</b>		
3 new sites have been declared in 02.02.2005 (WWD) such as; Yumurtalik Lagoon, Kizoren Obrouk and Meke Maar.		

**Action 10.1.3.-** Give priority to the designation of coastal and marine Ramsar sites, as a contribution to the WSSD target of establishing representative networks of marine protected areas by 2012.<sup>2</sup>

<i>See action 1.1.2</i>		
1.- Designation of coastal and marine Ramsar sites has been done ( <i>if applicable, please include number of sites designated</i> ).	<b>B</b> <i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 1

<sup>2</sup> In line with Articles 1.1 and 2.1 of the Convention, which include as Ramsar wetlands areas of marine water the depth of which at low tide does not exceed six metres, and indicates that Ramsar sites may “incorporate islands or bodies of marine water deeper than six metres at low tide lying within the wetlands.”

**2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]**

Yumurtalik Lagoon and coastal parts of this ecosystem has been declared as Ramsar Site in WWD 2005.

**Action 10.1.4.-** In addition to the priority established in 10.1.2, also assign priority to the designation as Ramsar sites of wetlands hosting globally threatened species and species that are unique or endemic to the territory of a Contracting Party or for which the territory supports a significant proportion of the global extent of the species.

*See action 1.1.2*

**1.- Designation of Ramsar sites supporting globally threatened species and species that are unique or endemic, or for which the territory supports a significant proportion of the global extent of the species, has been done (if applicable, please include number of sites designated).**

**B**

*Choose an answer*

*A = Not applicable; B = Yes;

**2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]**

The new designated Yumurtalik Lagoon supports globally threatened waterfowl species.

**Action r10.1.iv.-** Collaborate in the identification and designation as Ramsar sites of national and international site networks for migratory species, including migratory waterbirds, as a contribution to other initiatives under related international and regional environmental conventions and programmes, including, *inter alia*, the *Convention on Migratory Species* and its Agreements such as the *African-Eurasian Waterbirds Agreement (AEWA)*, and other existing arrangements such as the *North American Waterfowl Management Plan*, the *Western Hemisphere Shorebird Reserve Network*, and the *Asia-Pacific Migratory Waterbird Conservation Strategy*. (Resolution VIII.10)

*See action 12.2.2*

**1.- Designation of Ramsar sites that form part of networks for migratory species has been done (if applicable, please include number of sites designated).**

**B**

*Choose an answer*

*A = Not applicable; B = Yes; C = No;  
D = Partly/ in some cases; E = In progress; F= Being planned;

**2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]**

Yumurtalik Lagoon is an important location for migratory species. This site is one of the preferred wetlands by huge populations using Caucasian and Balkanian routes.

**Action 10.1.5.-** Designate, as a priority, those eligible sites that are not under any form of protective or sustainable use management regime, including those utilised for agriculture, as the basis for accelerating the establishment of such regimes, and ensure that this is done soon after designation.

**1.- Designation of Ramsar sites that are not under any form of protective or sustainable use management regime, including those utilised for agriculture, has been done (if applicable, please include number of sites designated).**

**E**

*Choose an answer*

*A = Not applicable; B = Yes;

**2.- Implementation progress since COP8 [Please include the list of designated sites and other additional comments you consider relevant.]**

There are such wetlands which will be designated before COP9.

**Action 10.1.6.-** Consistent with the *Guidelines for international cooperation under the Ramsar Convention on Wetlands* (Ramsar Handbook 9), designate the national area of transboundary wetlands as a Ramsar site and invite the concerned neighboring country(ies) to do likewise, with a view to establishing a harmonized management regime for the entire wetland.

1.- Designation as Ramsar sites of the national area of transboundary wetlands has been done <i>(if applicable, please include number of sites designated).</i>	<b>F</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 0
2.- Implementation progress since COP8 <i>[Please include the list of designated sites and other additional comments you consider relevant.]</i>			
No significant progress has been made			

**Action r10.1.v.-** Identify additional high Andean wetlands for inclusion in the *List of Wetlands of International Importance*. (Resolution VIII.39)

1.- High Andean wetlands have been designated as Ramsar sites <i>(if applicable, please include number of sites designated).</i>	<b>A</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 0
2.- Implementation progress since COP8 <i>[Please include the list of designated sites and other additional comments you consider relevant.]</i>			
Not applicable			

**Action r10.1.xi.-** Develop, for consideration by COP9, additional Criteria and guidelines for the identification and designation of Ramsar sites concerning their socio-economic and cultural values and functions that are relevant to biological diversity, as listed in Annex 1 of the *Convention on Biological Diversity (CBD)*, which would be applied on each occasion in conjunction with one or more existing Criteria for the identification and designation of Ramsar sites; and include in this work a full analysis of the implications for Contracting Parties of the implementation of such Criteria for the management of Ramsar sites, including Contracting Party obligations and responsibilities for maintaining the ecological character of any sites so selected in order to ensure that the coherent national networks of Ramsar sites fully incorporate all relevant aspects of the biological diversity of wetlands. (Resolution VIII.10)

1. The Party has contributed to the elaboration of additional Criteria and guidelines concerning socio-economic and cultural values and functions that are relevant to biological diversity	<b>C</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
2.- Implementation progress since COP8 <i>[Please include additional comments on the implementation of this action.]</i>		
No significant progress has been made		

**Action r10.1.xviii.-** [The STRP has been asked to] review . . . the ecological roles played by reservoirs and other human-made wetlands, including their use by aquatic and other water-dependent biota, and prepare guidance for Contracting Parties concerning the identification and designation of such wetlands for the Ramsar List, taking into account the experience gained by Parties that have already done so. (Resolution VIII.2)

1. The Party's experience with the ecological roles played by reservoirs and other human-made wetlands, and lessons learned, have been communicated to the STRP for inclusion in its review	<b>F</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
2.- Implementation progress since COP8 <i>[Please include additional comments on the implementation of this action.]</i>		
The ecological roles, values, functions or negative impacts of artificial wetlands (dams and reservoirs) having a characteristic of wetland of international importance will be evaluated and documented. This is planned to be realized in 2006.		

**Action 10.1.8.-** Continue to support the work of *Wetlands International* and others in the updating for each COP of the 1% thresholds for waterbird populations for the application of Criterion 6 for Ramsar site designation, having first undertaken international scientific consultation on its contents; seek to provide such population information for other wetland-dependent taxa; and apply this information for the designation of Ramsar sites. (Refer also to Operational Objective 12.2.)

<b>1. Contributions have been made to the updating of the 1% thresholds for waterbird populations</b>	<b>B</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>2.- Implementation progress since COP8 [Please include additional comments on the contributions made.]</b>		
IBA update has been terminated in 2004 by Birdlife International & Doga Derneği (National NGO). These studies have been supported by governmental institutions.		
<b>3. Populations information for wetland-dependent taxa other than waterbirds have been provided to Wetlands International</b>	<b>E</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>4.- Implementation progress since COP8 [Please include additional comments on the information provided.]</b>		
National bird watching groups provide these informations directly to the Birdlife International and Wetlands International.		

**Action r10.1.xxi.-** Assist *Wetlands International* and *BirdLife International* through the continued collection and supply of population data on waterbirds, including globally threatened species and those species identified by *BirdLife International* in *Threatened Birds of the World* as being data deficient. (Resolution VIII.38)

<b>1. Population data on waterbirds is collected regularly</b>	<b>B</b>	<i>Choose an answer for each indicator</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>2. The population data on waterbirds collected has been regularly provided to Wetlands International</b>	<b>B</b>	
<b>3. The population data on waterbirds collected and supplied to WI included information on globally threatened species and species with deficient data</b>	<b>B</b>	
<b>4.- Implementation progress since COP8 [Please include additional comments on the information available about population data on waterbirds.]</b>		
These studies are being realized by national bird watching groups.		

## OPERATIONAL OBJECTIVE 10. DESIGNATION OF RAMSAR SITES

<b>PLANNED ACTIVITIES (text answer):</b>	Ramsar information sheets will be updated with relevant and best available data for all Ramsar sites	

## COP9 REPORT SECTION

**Action 10.2.2.-** Ensure that the social and cultural values and features of listed sites are fully recognized in the descriptions of Ramsar sites in the *Information Sheet on Ramsar Wetlands*, as the basis for their incorporation in site management planning.

**1. Special care has been taken to include the social and cultural values and features in the 'Information Sheets on Ramsar Wetlands' submitted for inclusion in the Ramsar Database**

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

Ramsar information sheets will be updated by using best available data and also social & cultural values of these wetlands

**Action 10.2.3.-** Submit missing or incomplete data sheets and/or maps of listed sites as a matter of utmost urgency, and also ensure that all previously submitted site descriptions are in the format of the approved *Information Sheet on Ramsar Wetlands*.

**1. All missing or incomplete data sheets and/or maps of Ramsar sites have been submitted to the Ramsar Bureau**

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

Missing or incomplete data (including maps) was requested from Ramsar Bureau and all those informations have been sent to the Bureau in 2002.

**Action 10.2.4.-** Fully update and submit revised *Ramsar Information Sheets* as frequently as necessary to record changes in the status of sites, and at least at intervals of not more than six years, so that they can be used for reviewing change in ecological character and progress in achieving the Vision and Objectives of the *Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance* (Ramsar Handbook 7) at each COP.

**1. All required updates of the Information Sheet on Ramsar Wetlands have been submitted to the Ramsar Bureau**

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

RIS of the new designated sites will be sent to the Bureau in a couple of weeks. The updated information of the existing 9 Ramsar sites will also be transmitted to the Bureau.

## OPERATIONAL OBJECTIVE 11. MANAGEMENT PLANNING AND MONITORING OF RAMSAR SITES

### OPERATIONAL OBJECTIVE 11.1. Maintain the ecological character of all Ramsar sites

### PLANNING TOOL SECTION

<b>PRIORITY:</b>	<b>A</b>	A= High; B= Medium; C= Low; D= Not relevant; E= No answer
<b>RESOURCING:</b>	<b>C</b>	A= Good; B= Adequate; C= Limiting; D= Severely limiting; E= No answer
<b>TARGETS (text answer):</b>	To maintain the ecological character of all wetlands of international importance	
<b>PLANNED ACTIVITIES (text answer):</b>	To undertake necessary studies and works in order to maintain the ecological character of all Ramsar sites (the application of wise use principle, administrative measures, legislative measures, etc)	

### COP9 REPORT SECTION

**Action 11.1.1.-** Consistent with Article 3.1 of the Convention, define and apply the measures required to maintain the ecological character of each listed site, using as the basis for this the official definitions of “ecological character” and “change in ecological character” adopted by Resolution VII.10 and the integrated package of Convention tools for site management as presented in Ramsar Handbook 8 as well as the supplementary guidance adopted by COP8, and ensure that this information is included in the *Information Sheet on Ramsar Wetlands*.

<b>1.- The measures required to maintain the ecological character of Ramsar sites have been defined and applied (if available, please include number of sites where measures have been applied).</b>	<b>B</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	<b>N° Ramsar sites</b> 12/12
<b>2.- Implementation progress since COP8 [Please include the list of sites involved and any additional comments on the implementation of this action that you consider relevant.]</b>			
The measures required to maintain the ecological character of Ramsar sites have been defined and started to be applied. We were planning to ask Ramsar advisory mission for Montreux Record for Sultansazligi. However decisions made by the National Wetlands Committee could be applied seriously. This yielded to an effective conservation in the ecosystem. The healing process began but it's obvious that it will take time. There is approximately same problems in Lake Seyfe, however we are trying to overcome. If we cannot see any progress until the autumn of 2006, we'll have to give its name for the Record.			

**Action 11.1.2.-** Apply the Convention's *New Guidelines for management planning for Ramsar sites and other wetlands* (Resolution VIII.14) to develop management plans or strategies for all Ramsar sites.

<b>1. The New Guidelines for management planning have been used in the development of management plans or strategies</b>	<b>B</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer	
<b>2.- Implementation progress since COP8 [Please include additional comments on the way the guidelines have been used.]</b>			
3 new management planning project has started, 5 more are waiting for reply of their proposals.

<b>7.- Implementation progress since COP8 [Please include the list of Ramsar sites whose management plans fall under each category, and any additional comments you consider relevant.]</b>			
Besides these plans, there are some potential Ramsar sites for which management planning projects have been initiated (Meric Delta, Acigol, etc..)			

**Action r11.1.i.-** When reviewing and updating existing management plans, recognize that other management planning processes exist, especially where other designations apply to the same areas that are listed as Ramsar sites, and that these may be valid alternatives for delivering management planning where such approaches adequately and fully implement clearly stated conservation objectives to ensure the conservation and wise use of these wetlands. (Resolution VIII.14)

2.- Implementation progress since COP8 <i>[Please include the list of Ramsar sites under this category, and any other comments you consider relevant.]</i>	
No significant progress has been made	

**Action r11.1.ii.-** Utilize all the available Ramsar tools and guidance to assist in management planning processes, including *inter alia* the description and maintenance of ecological character and designing a monitoring programme (Resolution VI.1); the wetland risk assessment and indicators (Resolution VII.10); the guidance on impact assessment (Resolution VIII.9) and on wetland restoration, including identification of sites appropriate for restoration (Resolution VIII.16); and, where appropriate, the *Guidelines for Global Action on Peatlands* (Resolution VIII.17). 2.- Implementation progress since COP8 <i>[Please include additional comments on the implementation of this action.]</i>		
All stakeholders have been fully involved in the management planning processes.		

**Action r11.1.iv.-** Take into account, when planning the management of Ramsar sites and other wetlands, the wider management implications of activities within river basins and other catchments, which duly acknowledge the need for appropriate implementation of agricultural practices (Resolution VIII.34), applying Resolution VII.18 on *Guidelines for integrating wetland conservation and wise use into river basin management* (Ramsar Handbook no. 4), and the guidance adopted by COP8 on integrated coastal zone management (Resolution VIII.4) and on the allocation and management of water for maintaining the ecological functions of wetlands (Resolution VIII.1). (Resolution VIII.14)

1. The wider management implications (e.g., agricultural practices, river basin management, coastal zone management) have been taken into account in preparing the management plans for Ramsar sites	B	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

**2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]**

All these practices are being taken into account in management planning processes

**Action r11.1.v.-** Include in each management plan for a Ramsar site an objective of maintenance of the ecological character of the site so as to provide a basis for implementation of Article 3.1 of the Convention, in recognition that this greatly facilitates the identification, reporting and resolution of changes in ecological character (refer also to Operational Objective 11.2). (Resolution VIII.8)

Waterbird data and analysis derived from bird watching groups have been used in management planning

**Action r11.1.x.-** With the support of Contracting Parties and IOPs, the Ramsar Bureau should identify agriculture-related management practices developed for areas that include Ramsar sites, and contribute this information to the preparation of the guidelines as requested in Action r11.1.ix and share this information with the secretariats of CBD and the *Convention to Combat Desertification* (CCD). <b>TARGETS (text answer):</b>	To monitor ecological behaviour of all Ramsar sites and to take necessary measures including the Montreux Record to prevent their destruction.	

<b>PLANNED ACTIVITIES (text answer):</b>	To monitor regularly all Ramsar sites and to document their situation to the Bureau If the measures taken in Lake Seyfe won't be effective, this Ramsar site will be nominated for Montreux Record
--	---

### COP9 REPORT SECTION

**Action 11.2.1.-** Establish for each Ramsar site an effective monitoring programme, ideally as part of the site management plan, which is designed to detect and provide early warning of changes in ecological character. In so doing, use the Convention's framework for designing an effective monitoring programme (Resolution VI.1) and its *Wetland Risk Assessment Framework* (Resolution VII.10) (Ramsar Handbook 8).

			<u>N°Ramsar sites</u>
<b>1.- Monitoring programmes have been established at Ramsar sites <i>(if available, please include number of sites)</i></b>	<b>D</b>	<i>Choose an answer for each indicator A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>	4/12

<b>3.- Implementation progress since COP8 <i>[Please include the list of Ramsar sites falling under each category, and any additional comments you consider relevant about monitoring programmes.]</i></b>			
For Lake Manyas, Lake Uluabat and Gediz Delta, regular monitoring programmes have been initiated. For first 2 sites, these monitoring programmes are part of the site management plan.			

**Action 11.2.2.-** Ensure that sites on the Ramsar List are used as baseline and reference areas for national, supranational/regional, and international environmental monitoring to detect trends in the loss of biological diversity, climate change and the processes of desertification (Objective 4.1 of the Objectives for the List (Resolution VII.11), and report on status and trends to each meeting of the Conference of the Parties.

<b>1.- Ramsar sites are used as baseline and reference areas for national environmental monitoring <i>(if applicable, please include number of sites)</i></b>	<b>F</b>	<i>Choose an answer A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>	<u>N° Ramsar sites</u> 3/12
<b>2.- Implementation progress since COP8 <i>[Please include the list of Ramsar sites concerned, and any additional comments on the implementation of this action.]</i></b>			
No significant progress has been made			
<b>3.- Status and trends on the loss of biological diversity, climate change and the process of desertification <i>[Please include a summary of the cited issues and provide reference citation to any relevant publications, reports or analyses.]</i></b>			
Two Ramsar sites (Sultansazligi and lake Seyfe) are seriously threatened by desertification. Main causes of this process are climate change and human use. By measures taken last year, a significant progress has been observed in Sultansazligi. However it's hard to say the same for Lake Seyfe. The arid climatic conditions and increasing demand for irrigation accelerate this process. A detailed report about the actual situation of the lake will be sent to the Bureau in the first months of 2006.			

**Action 11.2.3.-** Ensure that at Ramsar sites where change in ecological character may occur as a result of proposed developments or changes in territorial and/or water use which have potential to affect them, an impact assessment is carried out which considers the full range of environmental, social and economic benefits and functions provided by the wetland, and that the resulting conclusions are communicated to the Ramsar Bureau, in line with Article 3.2 of the Convention, and fully taken into account by the authorities concerned.

<i>See action 2.2.3</i>		
<b>1. Proposed developments that may affect the ecological character of Ramsar sites have been subject to EIAs, and the results communicated to the Ramsar Bureau pursuant to Article 3.2</b>	<b>D</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
These projects have been subject to EIAs and they have been all prevented. However results couldn't be communicated to the Bureau.		

**Action r11.2.iv.-** Put in place, as a matter of high priority in fulfillment of 3.2 of the Convention, mechanisms in order to be informed at the earliest possible time, including through reports by national authorities and local and indigenous communities and NGOs, if the ecological character of any wetland included in the Ramsar List has changed, is changing or is likely to change.

<b>1. Mechanisms have been established to collect information on changes in ecological character of Ramsar sites in accordance with Article 3.2</b>	<b>B</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
Provincial directorates of the General Directorate of Nature Conservation & National Parks are collecting data		

**Action 11.2.4.-** In fulfilment of Article 3.2 of the Convention, report to the Ramsar Bureau without delay all actual or likely changes in ecological character on Ramsar sites, and include Ramsar sites “where changes in ecological character have occurred, are occurring or are likely to occur” in the *Montreux Record* as appropriate.

<b>4.- Implementation progress since COP8 [Please include information on the changes or likely changes in ecological character, and list the sites affected.]</b>			
Some positive changes occurred in Lake Manyas and Sultansazligi. That's why EC renovated the EC Diploma of Lake Manyas. As mentioned before, Sultansazligi started to be healed, for this moment it's not necessary to nominate it to Mantreux Record. But we determined a time period in order to see what will change in Lake Seyfe with our efforts. If they won't yield any positive result, it's obvious that we'll use the Montreux Record option.			
<b>5.- Implementation progress since COP8 [Please include information on the steps followed to include sites in the Montreux Record since COP8.]</b>			
There's no site included in Montreux Record			

**Action r11.2.vi.-** Utilize all appropriate mechanisms to address and resolve as soon as practicable the matters for which a site may have been the subject of a report pursuant to Article 3.2; and once those matters have been resolved, submit a further report, so that both positive influences at sites and changes in ecological character may be fully reflected in reporting under Article 3.2 and in the reporting to all meetings of the COP in order to establish a clear picture of the status and trends of the Ramsar site network at three-year intervals (Resolution VIII.8)

No significant progress has been made so far.		

**Action 11.2.5.-** For sites included in the *Montreux Record* request a *Ramsar Advisory Mission* of independent experts, where appropriate, to review the problems affecting the site and offer recommendations for remedial actions.

**GLOBAL TARGET 2003-2005:** For all sites on the *Montreux Record*, and which have not been subject to a *Ramsar Advisory Mission (RAM)*, CPs to request such a Mission prior to COP9.

At the appropriate time, seek the removal of the site from the *Montreux Record*, having provided the Bureau and STRP with details of the site condition using the approved questionnaire (Ramsar Handbook 7).

Turkey has a reserve on the Resolution VIII.1 and thinks that “transboundary waters” is beyond of the scope of Ramsar Convention. “Shared wetland ecosystems” is a priority according to our wetland policy, however “transboundary waters” is not subject of our studies.		

**Action 12.1.3.-** Where appropriate, engage in joint impact assessment processes with neighbouring countries that share wetlands, international river basins, or coastal systems, taking note, where applicable, of the terms of the *Esppo Convention on impact assessment* in a European transboundary context.

River basin management approach is brand new in Turkey and for this moment institutional and legislative structure don't give the permission for such studies. During the harmonisation of 2000/60/EC Water Framework Directive, it's planned to integrate ecosystem and biodiversity approaches into river basin management processes.

Actions have been taken to work with investors on possible impacts of their projects on wetlands</b>	<b>F</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
No significant progress has been made.		

**Action 15.2.3.-** Review wetland-related project development approval and consider the introduction of mechanisms to direct resources derived from these activities back to hands-on wetland management in the country. (Based on Section G3 of the Guidelines.)

<b>1. Work has been done to introduce mechanisms to direct resources derived from wetlands back to wetland management</b>	<b>F</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

----------------	--------------------------------------

### COP9 REPORT SECTION

**Action 18.1.1.-** Encourage the review of existing national institutions responsible for the conservation and wise use of wetlands, and on the basis of such a review, identify and implement measures to:

- a) increase cooperation and synergy among institutions with direct or indirect responsibility for wetland issues, especially those responsible for the management of water resources and for biodiversity and wetland conservation and management;
- b) promote enhanced cooperation, and where appropriate integrated approaches, among the national focal points of environment-related conventions, and consider establishing a coordinating committee to ensure that integrated approaches are taken;
- c) promote enhanced contact, and where appropriate close coordination, between the Ramsar Administrative Authority and national professional, technical, scientific and educational societies and agencies involved in wetland conservation or management, including those involved in social and cultural heritage issues; and
- d) provide appropriately trained staff, in adequate numbers, to enable these institutions to implement the Convention to full effect.

<b>1. A review of national institutions responsible for the conservation and wise use of wetlands has been completed</b>	<b>E</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases;</i> <i>E = In progress; F= Being planned; G = Being updated;</i> <i>H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 [Please include information on the review and other comments you consider relevant.]</b>		
Institutional rearrangements are being realized in the frame of harmonization works during the EU accession process		
<i>See action 13.1.1</i>		
<b>3. A coordinating committee among focal points of environment-related conventions is in place</b>	<b>B</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases;</i> <i>E = In progress; F= Being planned; G = Being updated;</i> <i>H = Other status (explain below); I = No answer</i>
<b>4.- Implementation progress since COP8 [Please include information on the coordinating committee and other comments you consider relevant.]</b>		
This committee has organized its first regular meeting		
<b>5. <b>6. Mechanisms are in place to ensure cooperation between the Ramsar Administrative Authority and relevant professional, scientific or educational societies and agencies involved in wetland conservation or management, including social and cultural heritage issues</b>	<b>B</b>	<i>Choose an answer for each indicator</i> <i>A = Not applicable;</i> <i>B = Yes;</i> <i>C = No;</i> <i>D = Partly/ in some cases;</i> <i>E = In progress;</i> <i>F= Being planned;</i> <i>G = Being updated;</i> <i>H = Other status (explain below);</i> <i>I = No answer</i>
<b>7.- Implementation progress since COP8 [Please include information on the relevant cooperation mechanisms and any other comments you consider relevant.]</b>		
Such mechanism was already established before COP8. This committee (National Wetlands Committee) is working well in all wetland related issues.		

**Action r18.1.i.-** Build and strengthen institutional capacity and synergies between related instruments at the national level in order to address the linkages between climate change and wetlands and report to COP9 on progress on this matter, including achievements and the identification of difficulties encountered (Resolution VIII.3)

<b>1. Work has been done to address the linkages between climate change and wetlands</b>	<b>E</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
Some scientific researches are being realized in order to determine the effects of climate change on wetlands especially in Central Anatolia which is probably one of the most arid regions in the Balkans-Caucasia-Middle East triangle.		

**Action 18.1.2.-** Establish National Ramsar/Wetlands Committees to provide the opportunity for input from, and representation of, relevant government agencies, including national water management ministries and/or agencies, where appropriate, and non-governmental organizations, STRP and CEPA National Focal Points, key stakeholders, indigenous people and local communities, the private sector and interest groups, and land use planning and management authorities (Recommendation 5.13). When in place, ensure the proper functioning of these Committees.

<i>See actions r3.4.iii, r13.1.iii</i>		
<b>1. A National Ramsar / Wetlands Committee (or equivalent body) is in place</b>	<b>B</b>	<i>Choose an answer for each indicator</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases;</i>
<b>2. If a Ramsar Committee exists, it is cross-sectoral (relevant ministries and agencies, NGOs, key stakeholders, local communities, private sector, etc.)</b>	<b>B</b>	<i>E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>3.- Implementation progress since COP8 [Please include additional comments on the National Ramsar Committee].</b>		
The existing National Committee is a cross-sectoral body, however the private sector is not being represented in it regularly. They're invited if it's necessary.		

**Action 18.1.3.-** Review the designated Ramsar national Administrative Authority (and provincial (sub-national) focal points where appropriate) and STRP and CEPA national focal points in each Contracting Party, with a view to ensuring that these positions are being effective in increasing involvement in the work of the Convention of all relevant agencies and organizations concerned with the conservation and wise use of wetlands.

<b>1. The institutional capacity for the effective implementation of the Convention – including the Ramsar Administrative Authority, National Wetland Committee (or equivalent body) and STRP and CEPA focal points– has been assessed</b>	<b>B</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
As regards focal points of specific subjects and the National Wetlands Committee, the institutional capacity is sufficient. However the establishment of necessary networks is required and it's planned to be realized right after COP9.		

**Action 18.1.4.-** Assist in achieving a cohesive and coordinated national effort towards the implementation of the Convention, using Ramsar's national planning tool (based on the National Report Format) as an ongoing planning and monitoring mechanism. Ideally, this tool should be used by all relevant government departments/agencies and include input from National Ramsar/Wetland Committee members and other stakeholders as appropriate.

<b>1. The National Report Format has been used as a national planning tool for the implementation of the Convention</b>	<b>B</b>	<i>Choose an answer</i> <i>A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
---	----------	---

2.- Implementation progress since COP8 *[Please include additional comments on the implementation of this action.]*

The recent National Report Format was very useful in preparing National Wetlands Strategy 2003 – 2008. As the same, this report will be used in preparing the National Work Plan 2005 – 2008.

No significant progress has been made		

**Action 20.1.2.-** Identify at national, provincial, and local levels the needs and target audiences for training in implementation of the Convention and, in particular, use of the *Wise Use Guidelines and Ramsar Handbooks*.

**GLOBAL TARGET 2003-2005: At least half of CPs to have assessed national and local training needs.**

<b>1. An assessment has been completed of national and local training needs in the implementation of the Convention and use of the Wise Use Handbooks</b>	<b>B</b>	<i>Choose an answer A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer</i>
<b>2.- Implementation progress since COP8 <i>[Please include additional comments on the implementation of this action.]</i></b>		
The training needs of local and national institutions have been determined		

**Action 20.1.3.-** Identify and disseminate, nationally, regionally and globally, information describing the current training opportunities in disciplines essential for the conservation and wise use of wetlands through the further development of the *Bureau's Ramsar Wise Use Resource Centre* ([http://ramsar.org/wurc\\_index.htm](http://ramsar.org/wurc_index.htm)) and the *Directory of Wetland Management Training Opportunities* ([http://ramsar.org/wurc\\_training\\_directory.htm](http://ramsar.org/wurc_training_directory.htm)).

<b>2.- Implementation progress since COP8 [Please include additional comments on the implementation of this action.]</b>		
The needs and the opportunities of training for wetland related subjects are all determined		

**Action 20.1.5.-** Assemble and make available, or develop, new training activities and general training modules as necessary, for the use of the Ramsar Handbooks, with specialized modules including coverage of the following fields:

- a) wetland inventory, assessment and monitoring;
- b) national wetland policies and plans;
- c) integrated catchment/river basin and coastal zone planning and management;
- d) integrated site management planning at the local, provincial or catchment/river basin level;
- e) wetland restoration and rehabilitation;
- f) invasive alien species;
- g) agricultural impacts on wetlands and water resources;
- h) impact assessment and strategic environmental assessment;
- i) impacts of climate change, and adaptive management and mitigation of such impacts
- j) economic valuation of wetlands;
- k) communication, education and public awareness techniques.

<b>1. Training modules and materials on wetland-related issues have been developed</b>	<b>E</b>	<i>Choose an answer</i> A = Not applicable; B = Yes; C = No; D = Partly/ in some cases; E = In progress; F= Being planned; G = Being updated; H = Other status (explain below); I = No answer

Relevant materials and documents are being prepared.		

**Action 20.1.6.-** Provide opportunities for manager training by:

- a) encouraging personnel exchanges for on-the-job training, possibly between twinned sites;
- b) holding pilot training courses at specific Ramsar sites;
- c) siting wetland manager and wetland educator training facilities at Ramsar sites;
- d) obtaining and disseminating information about training courses for wetland managers around the world;
- e) establishing further regional training initiatives such as the *Wetlands for the Future Initiative* funded by the Government of the USA for the countries of Latin America and the Caribbean.
