

# Kaleidocycle

## HOW TO CONSTRUCT YOUR KALEIDOCYCLE:

**1.** Print the pdf on an A3 sheet, preferably using heavy paper, then cut out along the dotted lines.

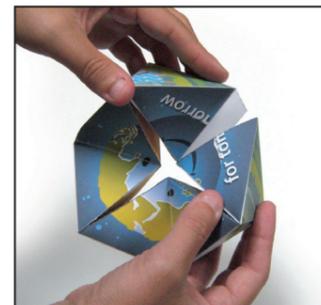

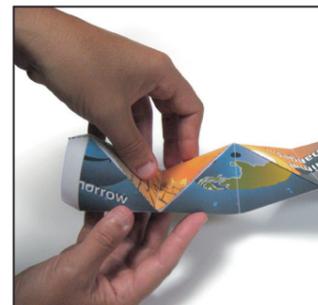

**2.** Fold along **all the grey lines backwards and forwards** to crease the paper well.

**3.** Put glue on the 3 white triangles marked "glue here".

**4.** Assemble as shown above, sticking point **A** onto **A'**; **B** onto **B'** and **C** onto **C'**. You should now have a "snake" of six tetrahedrons.

**5.** Glue the two tabs at the end and insert both of them into the other end of the "snake", forming a ring – your kaleidocycle!
