WWD 2012 in Agrinio & Lousika, Greece Dionysios Mamasis Environmentalist-Cartographer M.Sc.

The students sent their message!!!

The environmental events on World Wetlands Day 2012, taken part in the 2nd primary school of Agrinion, and the primary school of Lousika, were successfully completed.

In Agrinion, Aitoloakarnania, the subject of the event was "Trichonis, a living lake".

Trichonis is the largest lake of Greece and is characterized as an area with valuable environmental heritage. It was made an extensive reference to the values and functions of the ecosystem, its rich biodiversity and the problems which are continuously recorded in the area, inspiring positive attitudes towards the natural environment.

In Lousika, Achaia, the students were informed about the wetlands respectively, emphasizing to the coastal forest ecosystem of stone pines (Pinus pinea), located in western Achaia. The event was titled 'Ecosystems of International Importance: the wetland forest of Strofylia'.
