

Greetings from our icy Danube Gate, Tulcea city! Only the weather is cold, but not our souls.

WWDAY's importance was not celebrated, but understood by our students.

After viewing the messages and discussing about the idea of being responsible when you are a tourist, the pupils of the Gymnasium School nr. 5 from Tulcea show their results as documentarists.

They proposed to their colleagues some rules to be followed when camping or travelling in the Danube Delta: electric boats for travelling in the Danube Delta, camping only in permitted areas, select waste and deposit it properly - for keeping nature clean and happy. The children don't want new-born waste - mountains, like little frogs believed it happened in your comic strips.

- ARBDD recomandă folosirea pe traseele aprobate a ghizilor cu pregătire specială pentru RBDD
- ARBDD recomandă pentru transportul grupurilor de turiști folosirea navelor de mică capacitate cu propulsie electrică.
- Camparea este permisă în zonele aprobate în acest scop.
- Turiștii individuali trebuie să scoată din Rezervație toate ambalajele de plastic, hârtie, metal sau sticlă care au conținut produse alimentare.
