

»Make your own wetland for WWD 2012«

On 1st February our NGO, LUTRA, Institute for Conservation of Natural Heritage, prepared a workshop in order to celebrate World Wetland Day 2012. We prepared a little task for the nine children of Trnovo primary school from Ljubljana. They had to build their own wetland model. Models served us to learn about the important role of the wetlands, their functions and main threats. The workshop was carried out within the frameworks of LIFE+ project *AQUAVIVA: Live water – from biodiversity to tap* and project *Povodni mož v šoli 2*, supported by the City of Ljubljana.

Best regards,
