

CONVENTION ON WETLANDS (Ramsar, Iran, 1971)

26th Meeting of the Ramsar Standing Committee  
Gland, Switzerland, 3 – 7 December 2001

**DOC. SC26-8**

Agenda item 13

## **Draft Ramsar Bureau Work Plan 2002**

**Action requested: The Standing Committee is requested to review the attached draft Bureau Work Plan 2002, make amendments as appropriate, and approve the Work Plan.**

1. In spite of the fact that the Bureau took note of the concerns expressed by some Standing Committee members about the format of the Bureau Work Plan, the pressures on the Bureau staff have not permitted them to consider changing the format. Thus, this draft is divided, again, into two sections: Section I contains the Bureau's Global and Regional Policy and Technical Work Plan, and Section II the General Administration Work Plan.
2. A major part of the Bureau's work during 2002 will be focused on preparations for COP8, both substantive and logistical. This will be the a high priority area of activity for all Bureau staff during 2002. Many of the other activities in the Bureau's Work Plan are ongoing and thus are largely unchanged from those presented in the 2001 Bureau Work Plan (although it is recognized that the extent to which some can be implemented will be limited owing to the focus on COP8).
3. The 25<sup>th</sup> meeting of the Standing Committee requested that the Bureau also prepare an 'achievement report' on its implementation of the 2001 Bureau Work Plan. This has been included as an Annex to the Report of the Secretary General (DOC. SC26-2 Annex IV), since further detail on implementation of parts of the Bureau Work Plan 2001 is provided in that report.

# Draft Ramsar Bureau Work Plan 2002

Based on the Convention's Work Plan 2000-2002  
adopted by Ramsar COP Resolution VII.27

## GLOBAL ACTIONS

1. The actions described in this column are to be undertaken by the Secretary General, the Deputy Secretary General, and the Senior Advisor on Environment and Development Cooperation (SAEDC), in consultation with the Regional Coordinators and other staff as appropriate. The SG and DSG will be supported by Mireille Katz, the Executive Assistant for both of them, and the SAEDC will be assisted by Paulette Kennedy, Finance and Project Administration Assistant.
2. The global actions also include most of the work of the Communications Team: Dwight Peck, Executive Assistant for Communications; Valerie Higgins, Communications Assistant; and Sandra Hails, Senior Communications Assistant (provided that resource are available to keep her under contract in 2002).
3. In addition, assistance in the work during 2002 in preparing for COP8 will be provided by the Bureau's Technical Officer for COP8, Carlos Villalba, who has been seconded to work with the DSG through the generous support of the Government of Spain. The Technical Officer will also work for part of the time in 2002 with the MedWet Coordination Unit in order to provide technical support in MedWet's preparations for COP8.
4. Global actions in 2002 will concentrate mainly on the following priorities:
  - a) the preparations for, and running of, COP8, including:
    - finalization and circulation of COP8 papers;
    - organization of the remaining subregional preparatory meetings;
    - handling, analysis, and publication on the Web of National Reports from Contracting Parties; and
    - organization and administration of the COP;
  - b) the preparatory process and participation in the World Summit on Sustainable Development (Johannesburg, September 2002);
  - c) continuing development of synergies with other environment-related treaties and organizations in order to increase the profile of the Convention at the international level, as a means in turn to gain more recognition at the national level. Synergies will include further development and implementation of joint work plans and actions between Ramsar and other environment-related conventions and contribution to their Conferences of Parties and other meetings – noting that most such conventions are holding a COP during 2002. This should facilitate the work of the institutions directly responsible for implementation in each country, and at the same time generate the involvement of other key institutions that so far have not been working with the Convention, such as those responsible for water resources management and land use planning;

- d) continuing engagement in a more wide-ranging dialogue with the development assistance community, so as to generate more funds for wetland-related projects in developing countries and countries in transition; and in particular to promote the Ramsar Trust Fund [if the proposal is approved by the Standing Committee];
- e) further development of the Convention's Outreach programme through the provision of additional guidance, materials and information networks for its implementation by Contracting Parties;
- f) use of the celebration of World Wetlands Day 2002 as a tool to expand the outreach work of the Bureau and to increase the awareness of the cultural values of wetland and the visibility of the Convention, as a means of contributing to sustainable development around the world and heightened understanding of the culture and wetlands theme of COP8;
- g) finalization of draft technical and policy documents for submission to the May 2002 meeting of the Standing Committee's Subgroup on COP8 in preparation for COP8; and
- h) assistance to the Regional Coordinators in their efforts to encourage and support Contracting Parties, in particular in relation to:
  - i) delivering on their pledges at COP7 regarding Ramsar site designations and other aspects of the implementation of the Convention;
  - ii) application of the *Strategic Framework for the development of the Ramsar List* adopted by COP7, including issues related to the updating of the holdings of the Ramsar Sites Data Base;
  - iii) full implementation of Article 3.2 of the Convention<sup>1</sup>; and
  - iv) reception and analysis of National Reports to COP8.

## AFRICA REGION

5. The actions described under this column of the Work Plan are to be undertaken mostly by the Regional Coordinator for Africa and the Intern/Assistant to the Regional Coordinator, in consultation with the Administrative Authorities and other staff as appropriate.

**Regional Coordinator:** Anada Tiega

**Intern for Africa:** Simon Rafanomezantsoa

## Background

---

<sup>1</sup> Article 3.2: "Each Contracting Party shall arrange to be informed at the earliest possible time if the ecological character of any wetland in its territory and included in the List has changed, is changing or is likely to change as the result of technological developments, pollution or other human interference. Information on such changes shall be passed without delay to the organization or government responsible for the continuing bureau duties specified in Article 8."

6. The Africa region includes the mainland continent and the island states of Cape Verde, Comoros, Madagascar, Mauritius, Sao Tome & Principe, and Seychelles, which makes a total of 53 countries. Thirty four of these countries are Contracting Parties to the Convention: Algeria, Benin, Botswana, Burkina Faso, Chad, Comoros, Congo, Côte d'Ivoire, Democratic Republic of Congo, Egypt, Gabon, Ghana, Guinea, Guinea Bissau, Kenya, Libya, Madagascar, Mali, Malawi, Mauritania, Mauritius, Morocco, Namibia, Niger, Nigeria, Senegal, Sierra Leone, South Africa, The Gambia, Tanzania, Togo, Tunisia, Uganda, and Zambia.

### **Issues and priorities**

7. Africa is one of the driest continents with the most irregular rainfall. It has, however, a significant number of pristine wetlands, which have begun to experience immense pressure from human activities, the most pronounced being drainage for agriculture and settlement, excessive exploitation by local communities, and improperly planned development activities such as upstream dams for hydroelectric generation which alter wetland habitats.
8. Other threats to African wetlands include changes in wetland water quality due to the effects of industrial effluent and agricultural pesticides, siltation from highland catchment areas, and introduction of alien species of flora and fauna leading to colonisation by single species and loss of endemic species diversity. In Africa, wetlands are a major source of potable water and securing this resource has to be a priority. The Bureau therefore needs to be a strong advocate of total watershed or catchment level planning and management in Africa. This will also assist with managing the several major water systems which cross national boundaries and where there exists the potential for future conflicts over water access and use.
9. In the African Region it must be recognised that there are several obstacles to seeing the Ramsar Convention fully implemented by the Contracting Parties. These include:
  - a) staffing issues, notably: inadequately trained personnel; insufficient number of staff for wetland-related issues; low motivation of staff; and lack of office tenure for staff;
  - b) technical skills and tools, especially: lack of basic tools, equipment and machinery to aid management;
  - c) lack of adequate funds to cover running costs to undertake management and planning.
  - d) government policies and institutional arrangements, including: often lack of, or inadequate, government support and policies; and
  - e) poor, or little, institutional cooperation
10. The important role of wetlands in sustainable development needs to be underscored and communicated to policy makers and economic planners in Africa, so that their values and functions are taken into consideration. It must also be acknowledged that for Ramsar to be effective in Africa it must work in partnership with the many actors that exist there. These are organizations such as river or lake basin commissions and other organizations, some subregional institutions, FAO, UNEP, the bilateral and multilateral donors and the International Organization Partners (IOP) of the Convention.

### **Institutional arrangements in Africa**

11. Many of the institutions which are responsible for Ramsar implementation do not enjoy a clear mandate and strong support from the central government. It is therefore important that the strength and capacity of these institutions in terms of their set-up, staff expertise, and financing be clarified and reinforced. At the same time, it is very important that the Convention generates the interest and support of other national institutions that have a significant impact on wetland conservation and management, even when in some instances they do not have the explicit mandate to deal with wetlands. In this sense, it is essential that the Bureau encourage and support the creation of appropriate national mechanisms for the implementation of the Convention – especially the formation and training of National Wetlands/Ramsar Committees in every country.

### **Building the capacity for planning and management**

12. Support is urgently needed for the formulation of National Wetland Policies and capacity building within the institutions responsible for wetland and water management.
13. The Convention has now published its “toolkit” for implementation, including all the technical and policy guidelines adopted so far by the Conference of the Parties. A special effort is required to provide encouragement and training for the effective use of these tools. In the case of Africa in particular, there is an urgent need to encourage the support of donor Contracting Parties and the international community at large to make this possible.

### **AMERICAS REGION**

14. The actions described under this column of the Work Plan are to be undertaken mostly by the Regional Coordinator for the Americas and the Intern/Assistant to the Regional Coordinator, in consultation with the Administrative Authorities and other staff as appropriate.

**Regional Coordinator:** Margarita Astrálaga

**Intern for the Americas:** Marco Flores

### **Background**

15. The Americas region in the Bureau’s work includes two of the Ramsar Regions (the Neotropics and North America), involving the following twenty-five Contracting Parties: Argentina, Bahamas, Belize, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Suriname, Trinidad and Tobago, United States of America, Uruguay, and Venezuela.
16. In addition, there are in the region a number of dependent territories of France (French Guiana, Guadeloupe and Martinique); the Netherlands (Aruba and the Netherlands Antilles Federation); the UK (Anguilla, British Virgin Islands, Cayman Islands, Montserrat, and Turks and Caicos); and the USA (Virgin Islands), which require involving those Contracting Parties.
17. There are a further ten mainland and Caribbean Island States which are not yet Parties to the Convention: Antigua and Barbuda, Barbados, Dominica, Dominican Republic,

Grenada, Guyana, Haiti, St. Kitts and Nevis, St. Lucia, and St. Vincent and the Grenadines.

### **Issues and priorities**

18. Overall, Canada and the USA are well advanced in their implementation of the Convention, while in general the developing nations in the region still require substantial assistance and advice for the effective implementation of the treaty. Capacity building is a priority, in particular for the newest Parties to the Convention, such as Belize, Colombia, Cuba, and El Salvador.
19. Ten of the Caribbean Island States have not yet joined the Ramsar Convention despite the efforts made jointly by Trinidad and Tobago and the Ramsar Bureau. There are complex reasons for this, but essentially they come down to capacity building and financial implications. Many of these countries have few professionals dealing full time with environmental management and they already have made important commitments to other Multilateral Environmental Agreements. Several of the countries feel that they would have difficulties selecting their first Ramsar site, and therefore they make no effort to initiate the process.
20. It is encouraging that there are several countries seriously considering or working towards becoming CPs, notably the Dominican Republic and Saint Lucia.

### **ASIA REGION**

21. The actions described under this column of the Work Plan are to be undertaken mostly by the Regional Coordinator for Asia and the Intern/Assistant to the Regional Coordinator, in consultation with the Administrative Authorities and other appropriate staff members.

**Regional Coordinator:** Najam Khurshid  
**Intern for Asia:** Jia Ma (from November 2001)

### **Background**

22. The Asia Region has so far 21 Contracting Parties: Bahrain, Bangladesh, Cambodia, China, India, Indonesia, Islamic Republic of Iran, Israel, Japan, Jordan, Lebanon, Malaysia, Mongolia, Nepal, Pakistan, Philippines, Republic of Korea, Sri Lanka, Syrian Arab Republic, Thailand, and Vietnam.

### **Issues and priorities**

23. Increasing membership in the Convention remains a high priority for the Asia region. During 2001 substantial progress was made in Central Asia, with the accession of Azerbaijan, Tajikistan, and Uzbekistan, and completing accessions in this region remains a priority. Elsewhere, Lao P.D.R. has shown keen interest to join the Convention. Membership remains weak among the states of the Middle East, but it is anticipated that, encouraged by the participation of several non-Parties in the 2001 Evian Encounter for Arabic-speaking countries, and the holding of a Ramsar subregional meeting in Saudi Arabia in March 2002, some accessions will be made in 2002. There remains a need to increase understanding of the obligations and benefits of membership and the critical

importance of wetlands in arid zones, as well as the new tools and approaches that the Convention has developed and continues to develop.

24. New site designation remains a high priority for the region. Jordan, Malaysia, Nepal, Syria, Thailand, and Vietnam have only one listed site each, designated at the time of accession to the Convention. Efforts will continue to encourage CPs to designate more Ramsar sites. Japan is well advanced in this aspect of the implementation of the Convention, and India, Pakistan, and Bangladesh are known to be working to designate more Ramsar sites.
25. In some CPs, frequent changes of agency/department as the designated Ramsar Administrative Authorities is an obstacle in the implementation of the Convention. This problem is further aggravated by financial constraints and limited knowledge about the obligations and technical aspects of the Convention within Administrative Authorities. This problem could be overcome through the development of stronger linkages with Ramsar International Organization Partners at regional and subregional level; some of them have already formal or semi-formal working relations with the Administrative Authorities. The Bureau will continue to encourage and support the Partners in their efforts and explore opportunities to develop new partnerships, particularly in the Middle East and Central Asia.
26. Related to this problem, there is an urgent need for capacity building within the Administrative Authorities and among wetland site managers. While there are a number of training initiatives underway in the region, training needs analyses coupled with a review of training opportunities is needed to ensure greater coordination and effectiveness. The Bureau will continue to explore opportunities to establish a region-wide wetland management training initiative.

## **EUROPEAN REGION**

27. The actions described under this column of the Work Plan are to be undertaken mostly by the European Regional Coordinator and the Intern/Assistant to the Regional Coordinator, in consultation with the MedWet Coordinator and other staff as appropriate.

**Regional Coordinator:** Tobias Salathé

**Intern for Europe:** Sergey Dereliev (from November 2001)

### **Background**

28. The European Region of the Ramsar Convention comprises 44 Contracting Parties that have together declared 682 Ramsar Sites (as of 21 September 2001), out of which 29 figure on the Montreux Record and many more are threatened by possible or ongoing ecological change. Andorra is in the process of accession to the Convention and Bosnia & Herzegovina has recently formalized its succession, which will make European membership in the Convention nearly complete (excluding the micro-states Holy See and San Marino).
29. European countries often experience great wetland management problems due to high population densities in their catchment basins, intensive land-use pressures, and political and linguistic complexities. Given the high number of countries and Ramsar sites, and the

increasing pressures on European wetlands, this region is arguably also the most complex and demanding region to be served by the Ramsar Bureau.

30. It is therefore of high importance and value that Contracting Parties with more advanced national wetlands policies and management structure make increased efforts to share their experience with countries in economic transition and in urgent need for external support. In this way, national wetland conservation policies can be brought up to “European standard” levels.

### **Issues and priorities**

31. Increased solidarity between the rich countries with highly developed wetland conservation, management and restoration capacities and the poorer European countries in economic transition with needs for technology transfer and institutional capacity-building is a high priority at the beginning of the third millennium, if the Ramsar Convention is going to achieve its objectives and contribute to wise use of wetlands on the ground. To this end, the Ramsar Bureau will rely, even more than ever before, on the active technical and financial support from and collaboration with the more developed western European countries.
32. The elaboration and implementation of appropriate instruments for national wetland policies that ensure the wise use of all remaining wetlands within the territories of all European states is a crucial priority. The Bureau will stimulate and support Contracting Parties on a regular basis to become more active and result-oriented in this field.
33. As the region with by far the largest number of Ramsar sites (although not by surface area), Europe has many problems with the appropriate management of its Ramsar sites. Improvement of the management of many European Ramsar sites is therefore seen as a priority for the implementation of the *Strategic Framework for the future development of the Ramsar Site List*. The Bureau will stimulate and support all Contracting Parties to achieve measurable results in this domain during 2002. Training programmes and exchange of experience, knowledge and know-how will be essential. The alleviation of threats and pressures on many existing Ramsar sites is a high priority. Progress with the establishment of monitoring procedures for an increasing number of sites is anticipated.
34. The development of the third Ramsar pillar: increased international cooperation, so far often neglected or only supported half-heartedly in the region, remains a priority for 2002. As such, individual Contracting Parties will be encouraged to progress with the management of shared sites, shared water catchments, and species. The implementation of the Ramsar *Guidelines for international cooperation* provide the necessary tools at all levels: in the domain of increased collaboration between Ramsar and other global and regional environmental conventions, in the field of Pan-European cooperation for biodiversity conservation and related issues, as well as in the form of individual technical support to those countries lacking sufficient resources. This is often most pronounced in the public services responsible for wetland conservation in Newly Independent States and countries in economic transition.
35. Finally, the implementation of the many announcements and commitments made, and the Resolutions adopted, at COP7 in 1999 will be a short-term priority in 2002. The year leading to COP8 will be forward-looking, using the baseline resulting from the Regional

Meeting in October 2001 in Slovenia, for the development of a modern Ramsar Strategy 2003-2008 and an Action Plan that stands up to its expectations.

## **OCEANIA REGION**

36. In the absence of a Regional Coordinator for Oceania in the Bureau, the actions related to this region are included under the Asia Region column of the Work Plan. These actions are undertaken mostly by the Deputy Secretary General, with some administrative assistance from the Assistant to the Regional Coordinator for Asia, and working with Wetlands International – Oceania office based in Canberra and others supported by the Australian Government. It is recognised, however, that these arrangements continue to limit the capacity of the Bureau to progress accessions and support implementation of the Convention in the region.

### **Background**

37. There are currently three Contracting Parties in this Ramsar region: Australia, New Zealand, and Papua New Guinea. The Pacific Small Island Developing States remain one of the major gaps in the global membership of the Convention. Several of these, particularly through the work of Wetlands International – Oceania, have been approaching accession for some time now, but have yet to complete the process. Limitations to such progress are complex, but particularly relate to the need for capacity building and financial implications. Many of these countries have few professionals dealing full time with environmental management and they have already made important commitments to other Multilateral Environmental Agreements. Joint Work Plans and joint actions with other global conventions, such as that with CBD, are considered to help encourage developing the links with Ramsar.
38. With the very heavy workload occasioned by an increasing number of Contracting Parties in the Asia region, it is proposed that for 2002 the responsibility for the Oceania region will continue to be undertaken chiefly by the Deputy Secretary General, with some administrative assistance provided by the Intern for Asia. This will, however, need to be kept under review during 2002 and, especially if the number of Contracting Parties in the region increases, obtaining resources for an intern for Pacific Small Island Developing States in the Bureau would become a priority.

### **Issues and priorities**

39. Within this region, Australia and New Zealand are well advanced in their implementation of the Convention. Therefore, the priority will continue be to assist PNG with implementation of the Convention and the Pacific Small Island Developing States of the region to progress towards accession. Assistance to Australia and New Zealand will be largely on an 'as requested' only basis.
40. However, the Bureau will continue to need to raise matters concerning Article 3.2 of the Convention on change in the ecological character of Ramsar sites when these are brought to its attention.

## **THE MEDITERRANEAN BASIN**

41. The activities and projects under this column of the Work Plan are related to the Mediterranean Wetlands Initiative (MedWet) and are the responsibility of the outposted MedWet Coordination Unit, established in Athens in mid-2001 with financial support from the Government of Greece..
42. The work of the MedWet Unit is supported by three wetland centres:
- The Greek Biotope / Wetland Centre (EKBY), Thessaloniki (Greece), which assists the MedWet Coordination Unit with funding from the Greek Government;
  - Sede para el Estudio de los Humedales Mediterráneos (SEHUMED), University of Valencia (Spain), supported financially by the Spanish Government and the Generalitat Valenciana; and
  - Station Biologique de la Tour du Valat, Le Sambuc, Arles (France), assisted financially by the French Government.

Note: A network of MedWet National Units is been promoted in North Africa, with one of them acting as lead in MedWet on rotating basis.

43. The Mediterranean, an area with characteristic ecological, historical and cultural unity, includes 25 countries belonging officially to three Ramsar regions (Africa, Asia and Europe). Participation in the Mediterranean Wetlands Initiative (MedWet) and in the Mediterranean Wetlands Committee (MedWet/Com) which guides it, is broader than that of Ramsar Contracting Parties. MedWet/Com, formally recognized by Resolution VII.22 “as a forum for collaboration on wetland issues in the Mediterranean and as an advisor to the Convention in this region”, is composed of all 25 Ramsar Contracting Parties in the region and the Palestinian Authority, four intergovernmental bodies (European Commission, UNDP, Barcelona and Bern Conventions), and seven non-governmental organizations and wetland centres.
44. The *modus operandi* of the MedWet Team is substantially different from that of the Regional Teams of the Ramsar Bureau itself. It focuses more on specific activities and projects, which it initiates, develops and, in many cases, manages. This is in addition to the MedWet Team’s catalytic role in encouraging joint action, sharing of knowledge and expertise, and assisting with training and capacity development for policy and management of wetlands.

### **Issues and priorities**

45. In the Mediterranean, a number of social, economic and political issues result in excessive pressures on wetlands and lead to their degradation or destruction. Thus wetland loss in the region during the 20<sup>th</sup> century is estimated to average 50%. These issues are: poverty in the South and East of the region with great inequalities throughout, explosive population growth in the poorest countries of the region, strong economic migration trends, and increasing transient population pressure on the coastal zones due to tourism.
46. The resulting major problems are:
- demand for space, especially in the coastal zones, often to the detriment of wetlands;
  - water scarcity due to increased demand for irrigated agriculture and tourism, affecting wetlands;

- serious water pollution from industrial, domestic, as well as agricultural sources; and
  - unsustainable exploitation of wetland resources, especially fish and game.
47. To face these problems, the MedWet Initiative has focused on actions at three levels. At the international level, promoting collaboration, financial and technical assistance and sharing of experience and know-how. At the national level, encouraging the preparation of national wetland policies, improving legislation, and strengthening the capacity of services concerned with, or having an impact on, wetlands. On the site level, focusing on catalysing management actions, with the involvement of stakeholders.
48. Most of this work is done through methods and tools designed for the Mediterranean context, and through the establishment and strengthening of active partnerships in the region.
49. For the coming year, the MedWet priority sectors will continue to include wetland inventory (through the further development of the MedWet Inventory Database system), water (through its membership in the Mediterranean Advisory Committee (MEDTAC) of the Global Water Partnership), climate change, sustainable resource use (through membership in the Mediterranean Committee on Sustainable Development of the Barcelona Convention), and the cultural and social aspects of wetlands.

[Note: Shaded cells indicate those actions for which additional resources would be required.]

**GENERAL OBJECTIVE 1  
TO PROGRESS TOWARDS UNIVERSAL MEMBERSHIP OF THE CONVENTION.**

**Operational Objective 1.1:** To endeavour to secure at least 150 Contracting Parties to the Convention by 2002.

1.1.1 Recruit new Contracting Parties, especially in the less well represented regions (Africa, central Asia, the Middle East and the Small Island Developing States).

Target - 150 CPs by COP8

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Continue ongoing efforts to recruit new members. Priorities: Small Island Developing States (SIDS), Middle East, and Africa.	<p>African target counties for accession are Angola, Burundi, Cameroon, Cape Verde, Central African Republic, Djibouti, Ethiopia, Lesotho, Mauritius, Mozambique, Rwanda, Zimbabwe.</p> <p>Encourage and assist with accession through regular consultations with relevant institutions and people, and with the help of African representations on Standing Committee and partner organizations, through:</p> <ul style="list-style-type: none"> <li>• (sub-)regional and national meetings and workshops;</li> <li>• dissemination of Ramsar tools, and training in the use of the Ramsar Handbooks;</li> <li>• field visits to assist with Ramsar site designation.</li> </ul>	Working with the Caribbean representative to the Standing Committee, UNEP's Caribbean Environment Programme Coordinating Unit, and other Parties as appropriate, continue to encourage Non-Contracting Parties, largely Caribbean Island States, to accede the Convention.	<p>Continue efforts to increase membership especially in the Middle East and Central Asia in collaboration with the members of the Standing Committee and partner organizations. Participation in related workshops and the regional meetings will be used to motivate other countries in the region.</p> <p>Encourage CPs to translate and distribute wetland and Ramsar-related material to generate interest in wetlands and Ramsar among non-CPs.</p> <p><b>Oceania</b> Working with Wetlands International – Oceania, continue to encourage accession by the SIDS in Oceania, with a priority of countries benefiting from previous SGF pre-accession funding: Solomon Islands, Republic of Kiribati, Fiji, Micronesia, Palau and Vanuatu.</p>	Initial contacts with Andorra in 2000 will be followed up. Excluding the Holy See and San Marino, this will complete universal membership of the Convention in Europe.	Initiate efforts towards the accession of Palestine, should it become an independent country that qualifies for accession.

**GENERAL OBJECTIVE 2  
TO ACHIEVE THE WISE USE OF WETLANDS BY IMPLEMENTING AND FURTHER DEVELOPING THE RAMSAR WISE USE GUIDELINES.**

**Operational Objective 2.1:** To review and, if necessary, amend national or supra-national (e.g. European Community) legislation, institutions and practices in all Contracting Parties, to ensure that the Wise Use Guidelines are applied.

2.1.1 Carry out a review of legislation and practices, and indicate in National Reports to the COP how the Wise Use Guidelines are applied. [CPs]

**Target** – At least 100 CPs to have comprehensively reviewed their laws and institutions related to wetlands by COP8

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Ramsar Wise Use Handbook 3 should assist CPs in undertaking their reviews and reporting on this in National Reports to COP8.</p> <p>Continue to encourage CPs to undertake such reviews and explore possible joint pilot projects with IUCN’s Environmental Law Centre. Encourage donor support for this activity.</p>	<p>Encourage and assist Parties in undertaking their reviews of national legislation, in line with the guidance in Handbook 3. Identify at least one additional CP interested in undertaking the review.</p>	<p>Encourage and assist Parties in undertaking their reviews of national legislation, in line with the guidance in Handbook 3. Identify at least one CP interested in undertaking a pilot review.</p>	<p>Encourage and assist Parties in undertaking their reviews of national legislation, in line with the guidance in Handbook 3. Identify at least one CP interested in undertaking a pilot review.</p> <p><b>Oceania Region</b> As above. Encourage Australia to produce case study paper on its recent legislation concerning Ramsar. The Bureau to translate and distribute it to all CPs.</p>	<p>Encourage and assist Parties in undertaking their reviews of national legislation, in line with the guidance in Handbook 3. Identify at least one CP interested in undertaking a pilot review.</p>	

2.1.2 Promote much greater efforts to develop national wetland policies, either separately or as a clearly identifiable component of other national conservation planning initiatives, such as National Environment Action Plans, National Biodiversity Strategies, or National Conservation Strategies. [CPs, Bureau, Partners]

**Target** – By COP8 at least 100 CPs with National Wetland Policies or, where appropriate, a recognised document that harmonises all wetland-related policies/strategies and plans, and all CPs to have wetlands considered in national environmental and water policies and plans. The Guidelines for integrating wetland conservation and wise use into river basin management (Res. VII.18) will assist these efforts.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Ramsar Wise Use Handbook 2 provides CPs with guidance on developing national wetland policies.</p> <p>Continue to encourage CPs to develop such policies and report on this in National Reports to COP8. The SAEDC will encourage donors to provide funding for policy development/ application.</p>	<p>Promote the development and/or implementation of National Wetland Policies/Strategies particularly in Kenya, Madagascar, Mauritius, Namibia, South Africa, and Zambia.</p>	<p>Promote government recognition of cross-sectoral National Wetland/Ramsar Committees and the development of National Wetland Policies, in particular in Colombia and Paraguay.</p>	<p>Continue to encourage and support the development of National Wetland Policies/Action Plans/Strategies using the guidelines approved at COP7. Priority to be given to CPs where policy development is already underway.</p>		<p>Provide support and encouragement to MedWet countries to initiate NWP and provide technical advice in specific areas.</p>

**Operational Objective 2.2:** To integrate conservation and wise use of wetlands in all Contracting Parties into national, provincial and local planning and decision-making on land use, groundwater management, catchment/river basin and coastal zone planning, and all other environmental planning and management.

2.2.1 Gather and make available to Contracting Parties information on land use planning related to wetlands, and catchment/river basin and coastal zone planning in particular. [Bureau]

**Target** – COP7 adopted through Resolution VII.18 *Guidelines for integrating wetlands conservation and wise use into river basin management*. In the next triennium guidelines for integrating wetlands into coastal zone planning and management will be developed for consideration at COP8.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue working with the Global Environment Network (based in Malaysia) to implement the “River Basin Initiative” as a joint undertaking with CBD.</p> <p>Continue to support efforts to obtain further donor support to implement the project, and to identify implementing partners for the Initiative.</p>	<p>Promote the use of the <i>Guidelines for integrating wetlands conservation and wise use into river basin management</i>, and other Ramsar Handbooks (and assist in training in their use), and encourage CPs to contribute case studies to the River Basin Initiative.</p> <p>Particular actions will focus on:</p> <ul style="list-style-type: none"> <li>• Lake Chad Basin, Niger Basin, Nile Basin, Senegal River Basin and Lake Malawi/Nyassa/Niassa Basin</li> <li>• Okavango Delta</li> <li>• Bilateral and multilateral joint actions on River/Lake catchments (shared watersheds)</li> </ul>	<p>Promote the use of the <i>Guidelines for integrating wetlands conservation and wise use into river basin management</i>, and other Ramsar Handbooks (and assist in training in their use), and encourage CPs to contribute case studies to the River Basin Initiative.</p>	<p>Promote the use of the <i>Guidelines for integrating wetlands conservation and wise use into river basin management</i>, and other Ramsar Handbooks (and assist in training in their use), and encourage CPs to contribute case studies to the River Basin Initiative.</p> <p><b>Oceania Region</b> As resources permit, promote the use of the <i>Guidelines for integrating wetlands conservation and wise use into river basin management</i>, and other Ramsar Handbooks (and assist in training in their use), and encourage CPs to contribute case studies to the River Basin Initiative.</p>	<p>Promote existing Ramsar tools and those under preparation by STRP and the Bureau at appropriate conferences, workshops and meetings and through individual contacts, ideally with illustrations from real case studies of different existing or potential Ramsar Sites.</p> <p>Promote the designation of large-scale Ramsar sites in individual CPs, as a legal tool to support integrated planning approaches rather than a simple sectoral species protection approach.</p>	<ol style="list-style-type: none"> <li>1. Maintain active MedWet role in the Prespa Park Coordination Committee, and play a key role in the development of a UNDP-GEF project proposal.</li> <li>2. Support Bosnia &amp; Herzegovina and Croatia in the joint management of the Neretva River catchment basin and its wetlands.</li> <li>3. Implement activities in Objective 4 of GWP-Med and develop an Associated Programme on water management and agriculture for North African countries.</li> <li>4. Support work in specific areas as follows: <ul style="list-style-type: none"> <li>* salinas management in Slovenia;</li> <li>* impact of drought on Cyprus’s coastal torrents;</li> <li>* management training in Portugal and Catalonia (Tour du Valat);</li> <li>* Syrian wetlands and El Jabbul (Tour du Valat);</li> <li>* follow-up to work in Sebkhia El Kelbia and Merja Zerga, Morocco (WWF MedPO and Tour du Valat);</li> <li>* transboundary management of Doran Lake (Greece &amp; FYR Macedonia);</li> <li>*transboundary cooperation on the Evros/Maritsa/Merich River (Bulfaria, Greece, Turkey).</li> </ul> </li> <li>5. Assist in “exporting” the MedWet experience to the Black Sea (with Wetlands International).</li> </ol>
<p>Finalize the STRP’s draft guidelines for integrating wetlands into coastal zone management, for submission to</p>	<p>Promote the concept of ICZM in relation to wetland management and provide assistance to the interested CPs through</p>	<p>Idem</p>	<p>Idem</p>	<p>Idem</p>	<p>Idem</p>

SC COP8 Subgroup, in preparation for COP8.	networking with other organizations in the River Basin and Integrated Coastal Zone Management				
--	---	--	--	--	--

**Operational Objective 2.3:** To expand the Guidelines and Additional Guidance to provide advice to Contracting Parties on specific issues not hitherto covered, and examples of best current practice.

2.3.1 Expand the Additional Guidance on Wise Use to address specific issues such as oil spill prevention and clean-up, agricultural runoff, and urban/industrial discharges in cooperation with other bodies. [CPs, STRP, Bureau, Partners]

**Target** - Following COP7, the Bureau, with other appropriate collaborators, will produce a series of Wise Use handbooks, based on the outcomes of Technical Sessions at COP7.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>The nine Wise Use Handbooks were published and circulated in English, French and Spanish in 2000.</p> <p>Finalize the additional guidance, prepared by the STRP, with the assistance of the Bureau and others:</p> <ul style="list-style-type: none"> <li>- Inventory Restoration</li> <li>- Water allocation and management</li> <li>- Wetland management planning</li> <li>- Invasive Species</li> <li>- ICZM</li> <li>- Compensation for lost wetland areas</li> </ul> <p>Finalize STRP guidance on invasive species, jointly with CBD and the Global Invasive Species Programme (GISP), for submission to SC COP8 Subgroup in preparation for COP8.</p>	<p>Continue to distribute, promote and provide training in the use of the new Wise Use Handbooks.</p> <p>Through joint project with IUCN and other Ramsar partners, produce and disseminate additional information materials on invasive species specific to Africa.</p>	<p>Continue to distribute, promote and provide training in the use of the new Wise Use Handbooks.</p>	<p>Continue to distribute, promote and provide training in the use of the new Wise Use Handbooks.</p> <p><b>Oceania Region</b> Idem.</p>	<p>Distribute, promote and provide training in the use of the Wise Use Handbooks.</p> <p>Support, as needed, the work of STRP in finalising additional guidelines.</p> <p>Seek examples of the management and monitoring of specific RSs that could be used as demonstration cases for the COP8 document on the San José Record.</p>	<ol style="list-style-type: none"> <li>1. Continue to promote the effective use and further development of the MedWet tools prepared under MedWet Projects 1 and 2, in consonance with the new Ramsar “toolkit”.</li> <li>2. Undertake missions to Egypt, Syria and Turkey, and if possible Bulgaria and Jordan, to assist in the use of the available tools for full implementation of the Convention.</li> <li>3. Develop a project on sustainable use of wetland resources (through participation in the Mediterranean Committee on Sustainable Development), with emphasis on tourism (led by SEHUMED).</li> </ol>

**Operational Objective 2.4:** To provide economic evaluations of the benefits and functions of wetlands for environmental planning purposes.

2.4.3 Initiate specific activities which implement the findings on economic evaluations published under 2.4.2 [CPs]

**Target** - The Bureau has initiated a project, in collaboration with IUCN and supported by funds from the Swiss Government, in the countries of the Southern Africa Development Community on economic valuation of wetlands.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>As decided by STRP9, IUCN's Economic Services Unit and the Bureau are developing a comprehensive programme and resource kit on economic valuation and incentives, but this requires additional resources for completion.</p> <p>The Senior Advisor on Environment &amp; Development Cooperation (SAEDC) to act as focal point, including preparation of a manual on financing the wise use of wetlands.</p>	<p>Encourage implementation of the joint initiative with IUCN-Regional Office for Southern Africa on economic valuation of wetlands in the SADC countries, and contribute to the work on the Zambezi basin.</p>		<p>Oceania Region</p>		

**Operational Objective 2.5:** To carry out environmental impact assessments (EIAs) at wetlands, particularly of proposed developments or changes in land/water use which have potential to affect them, notably at Ramsar sites, whose ecological character “is likely to change as the result of technological developments, pollution or other human interference” (Article 3.2 of the Convention).

2.5.1 Expand the Additional Guidance on Wise Use by preparing, for a technical session at the 7<sup>th</sup> COP (1999), the results of a review of environmental appraisal guidelines and examples of current best practice in EIA. [SC, STRP, Bureau, Partners]

**Target** - In the next triennium, the development of further guidance in this area will be done in collaboration with CBD, CMS, IUCN and the International Association for Impact Assessment.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Finalize STRP's work on impact assessment guidance, jointly with CBD as a key part of the Joint Work Plan with CBD, for consideration by Standing Committee COP8 Subgroup for presentation to COP8.</p>	<p>Continue to encourage Parties to ensure that existing national legislation regarding EIAs is fully implemented in relation to wetlands.</p>	<p>Idem.</p>	<p>Idem</p> <p>Oceania Region As above, as resources permit.</p>	<p>Idem</p>	

**Operational Objective 2.6:** To identify wetlands in need of restoration and rehabilitation, and to implement the necessary measures.

2.6.2 Provide and implement methodologies for restoration and rehabilitation of lost or degraded wetlands [CPs, STRP, Bureau, Partners]

**Target** – The addition of appropriate case studies and information on methodologies, etc., to the Convention's Wise Use Resource Centre will be a priority in the next triennium.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue to assist STRP's Working Group on Restoration in its development of a Web-based resource kit of restoration techniques and case studies, and finalize its guidelines on restoration for presentation to COP8.</p> <p>Develop cooperation with GISP on providing guidance and methodologies for managing invasive/alien wetland species</p>	<p>Encourage CPs to provide input to the Web site.</p>	<p>Idem</p>	<p>Idem</p> <p><b>Oceania Region</b> Idem</p>	<p>Encourage CPs to provide proposals for STRP's work</p>	<p>Play a key role in initiating collaboration between Greece and the FYR Macedonia for rehabilitation of the Doran lake, and assist in preparation of funding proposals.</p>

**Operational Objective 2.7:** To encourage active and informed participation of local communities, including indigenous people, and in particular women, in the conservation and wise use of wetlands.

2.7.1 Implement Recommendation 6.3 on involving local and indigenous people in the management of wetlands. [CPs, Bureau]

**Target** - In the next triennium, the implementation of the above Guidelines is to be one of the Convention's highest priorities. By COP8 all CPs to be promoting local stakeholder management of wetlands.

The Bureau has published Handbook 5 on *Establishing and strengthening local communities' and indigenous people's participation in the management of wetlands*.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Serve in Steering Committee of Ramsar/IUCN/WWF project "Participatory Management Clearinghouse". Requires additional resources for full implementation.</p>	<p>Promote the use of Handbook No. 5, including through SGF, Swiss Grant for Africa, and other sources.</p> <p>Encourage Parties to involve local community representatives in the National Ramsar/Wetland Committees and to report on progress made.</p>	<p>Promote the use of Handbook 5, including through the Wetlands for the Future Initiative and SGF.</p> <p>Encourage Parties to involve local community representatives in the National Ramsar/Wetland Committees and to report on progress made.</p>	<p>Promote the use of Handbook 5, including through the SGF and other sources.</p> <p>Encourage Parties to involve local community representatives in the National Ramsar/Wetland Committees and to report on progress made.</p> <p><b>Oceania Region</b> Working with Wetlands International – Oceania, promote the use of Handbook 5, including through SGF and other sources.</p>	<p>Promote the use of Handbook 5, including through SGF and other sources.</p> <p>Encourage Parties to involve local community representatives in the National Ramsar/Wetland Committees and to report on progress made.</p>	<p>Further develop the three new wetland networks (as approved by MedWet/Com3):</p> <p>a) MedWet/Regions: work led by Tour du Valat, with support by France and the Languedoc Roussillon region, to establish a network of administrative/autonomous regions within member countries.</p> <p>b) Identify lead partner for MedWet/Sites network and focus on the implementation of the MedWet methods and tools</p> <p>c) MedWet/NGOs: assist the WWF Mediterranean Programme Office to organize this network of national NGOs involved with wetland conservation.</p> <p>Encourage local community participation in projects and other activities undertaken</p>

					through MedWet.
--	--	--	--	--	-----------------

2.7.4 Recognise and apply traditional knowledge and management practice of indigenous people and local communities in the conservation and wise use of wetlands. [CPs]

- Refer to 2.7.1 above.

**Target** - This will be addressed in the next triennium, possibly in partnership with the Convention on Biological Diversity and Convention to Combat Desertification, which have already initiated work in this area.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Refer to 2.7.1 above.</p> <p>Continue discussion of input and assistance from CBD, CCD and others to review the current state of knowledge and proposed activities in this area, and develop a suitable draft work programme for Ramsar.</p>	<p>Encourage actions for communities' participation through joint programme activity with CBD, CCD, World Heritage and CMS, particularly on:</p> <ul style="list-style-type: none"> <li>• Okavango</li> <li>• Lake Chad Djoudj, Ndaël, Diawling, Manambolomaty</li> <li>• Other Ramsar sites with management plans, and through Ramsar Advisory Missions</li> </ul>	<p>Seek input and assistance from relevant regional bodies to review the current state of knowledge and proposed activities in this area, with a view to developing a suitable programme of work for the Ramsar Convention, if resources permit.</p>	<p>Seek input and assistance from relevant regional bodies to review the current state of knowledge and proposed activities in this area, with a view to developing a suitable programme of work for the Ramsar Convention, if resources permit.</p> <p><b>Oceania Region</b> As above.</p>	<p>Seek input and assistance from relevant regional bodies to review the current state of knowledge and proposed activities in this area, with a view to developing a suitable programme of work for the Ramsar Convention, if resources permit.</p>	

**Operational Objective 2.8: To encourage involvement of the private sector in the conservation and wise use of wetlands.**

2.8.1. Encourage the private sector to give increased recognition to wetland attributes, functions and values when carrying out projects affecting wetlands. [CPs, Bureau, Partners]

Note. In the past triennium the Bureau entered into the innovative “Evian Project” in partnership with the multinational Danone Group and several French government agencies through which projects on training and communications are being sponsored. [Note: The Evian/Danone Group has agreed to continue funding the project in 2001-2002]

**Target** - In the next triennium the efforts to work in partnership with the private sector will be further escalated and the Bureau will seek to document and make available case studies on some of the more effective and innovative approaches. By COP8 the target is to have private sector support for wetlands conservation in more than 100 CPs.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue working relations with Evian/Danone.</p> <p>Continue to explore, in cooperation with partners, the involvement of the private sector in Ramsar issues, particularly on the occasion of COP8.</p> <p>Continue efforts to obtain sponsorship for Bureau activities, in particular for the maintenance and further</p>	<p>Explore possibilities for private sector involvement in consultation with Contracting Parties.</p> <p>Continue to disseminate the Naivasha experience on the role of the private sector in Ramsar site designation, preparation and implementation of a management plan, raising awareness, and using legal instruments, including adoption of code of conduct by each interest group, especially in Madagascar, Mauritius, and Botswana.</p>	<p>Encourage Parties to involve the private sector in the implementation of projects.</p>	<p>Where possible provide information to the private sector (directly or through CPs ) about the importance of wetlands, their function and values, and encourage CPs to involve the private sector in the conservation of wetlands.</p> <p><b>Oceania region</b> Encourage Parties to involve the private sector in the implementation of projects.</p>	<p>Encourage Parties to involve the private sector in the implementation of projects.</p>	

development of the Web site.					
------------------------------	--	--	--	--	--

2.8.2 Encourage the private sector to apply the Wise Use Guidelines when executing development projects affecting wetlands. [CPs, Bureau, Partners]

**Target** - In the next triennium the application of this tool for promoting Wise Use will be a priority under the Convention. By COP8 the target is to have more than 50 CPs which have completed reviews of their incentive measures.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
See 2.4.3. Incentives was a major theme of CBD's COP5, and forms part of the Joint Work Plan. This is a high priority, but requires additional resources.			Oceania Region	Provide regional support as necessary to implement the actions proposed by the Bureau.	

**GENERAL OBJECTIVE 3**

**TO RAISE AWARENESS OF WETLAND VALUES AND FUNCTIONS THROUGHOUT THE WORLD AND AT ALL LEVELS.**

**Operational Objective 3.1:** To support and assist in implementing, in cooperation with partners and other institutions, an international programme of Education and Public Awareness (EPA) on wetlands, their functions and values, designed to promote national EPA programmes.

3.1.1 Assist in identifying and establishing coordinating mechanisms and structures for the development and implementation of a concerted global programme of EPA on wetlands. [CPs, Bureau, Partners]

**Target** - By COP8 to see the global network of proposed CP focal points for Wetland Communication, Education and Public Awareness (CEPA) in place and functioning effectively in the promotion and execution of the global Outreach Programme. To secure the resources to increase the Bureau's capacity for implementing the Outreach Programme.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Promote the use by CPs of the Bureau guide for developing a Wetland CEPA Action.  Maintain the e-mail CEPA discussion groups in English, French and Spanish.  Continue to develop the Web-based resources centre concerning CEPA issues.  Actively encourage and promote signage at Ramsar sites.  Offer to CPs a PowerPoint presentation on CEPA, and update this as necessary.  Carry out survey through CEPA Focal Points on wetland issues in	Assist with obtaining further designations of CEPA National Focal Points and support at the regional level the Bureau communications and awareness effort.  Promote specific joint action with Ramsar partners on education and public awareness activities.	Assist with obtaining further designations of CEPA National Focal Points and support at the regional level the Bureau communications and awareness effort.  Promote specific joint action with Ramsar partners on education and public awareness activities.  Continue promoting the Wetlands for the Future Initiative through the Web site, the Ramsar-Forum and other list servers, as well as through the Newsletter and other mechanisms.	Assist with obtaining further designations of CEPA National Focal Points and support at the regional level the Bureau communications and awareness effort.  Promote specific joint action with Ramsar partners on education and public awareness activities.  Give special attention to informing the media within these regions about the Ramsar Convention.  Oceania Region As above.	Assist with obtaining further designations of CEPA National Focal Points and support at the regional level the Bureau communications and awareness effort.  Promote specific joint action with Ramsar partners on education and public awareness activities.	1. Work with WWF Mediterranean Programme. MIO-ECSDE and other potential partners in the design and launching of a Pan-Mediterranean Wetlands Campaign.  2. Develop a project on cultural aspects of wetlands (led by SEHUMED), as follow-up to discussion at MedWet/Com3 and preparatory work for COP8 on cultural issues.  3. Publication of two booklets within the MedWet/Tour de Valat series, on "Culture and wetlands – A link for conservation and sustainable use" (in collaboration with

formal school curricula and distribute “good practice” examples.					SEHUMED) and “MedWet, a Mediterranean adventure – Working together for people and wetlands”
--	--	--	--	--	---

3.1.2 Participate in the identification of regional EPA needs and in the establishment of priorities for resource development. [CPs, Bureau, Partners]

**Targets - Refer to 3.1.1 above.**

**Operational Objective 3.2:** To develop and encourage national programmes of EPA on wetlands, targeted at a wide range of people, including key decision-makers, people living in and around wetlands, other wetland users and the public at large.

3.2.1 Encourage partnerships between governments, non-governmental organizations and other organizations capable of developing national EPA programmes on wetlands. [CPs, Bureau, Partners]

**Target -** By COP8 to see the global network of proposed CP and non-government focal points for Wetland Communication, Education and Public Awareness (CEPA) in place and functioning effectively in the promotion and execution of the national Outreach Programmes in all CPs. To secure the resources to increase the Bureau’s capacity for implementing the Outreach Programme.

**Refer to 3.1.1. above.**

**Operational Objective 3.3:** To improve the Ramsar Bureau’s communications activities and to develop a Convention Communications Strategy, capable of further promoting the Convention and its wider application, and of raising awareness of wetland values and functions.

3.3.1 Review the Bureau’s communications activities, especially those related to the creation and functioning of regional and national communication networks; develop new material and use of technology, and improve existing material. [Bureau]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Keep the communications activities constantly under review to respond to new challenges and opportunities.</p> <p>Update the Ramsar info pack in the three official languages and in Arabic, Russian and Chinese. Encourage, and if possible support financially, the translation of the info pack into other languages.</p> <p>Continue to publish regularly the Ramsar List and the Annotated Ramsar List. Translate the Annotated List into French and Spanish.</p> <p>Ensure all COP8 materials are available through the Web site in a timely manner.</p> <p>Make the Ramsar “Toolkit”</p>					

<p>available on the Web and perhaps on CD-ROM, with assistance from the United Nations University.</p> <p>Produce a Ramsar glossary in English, French and Spanish.</p> <p>Print and distribute a leaflet addressed to the general public on what are Ramsar sites and their significance, and work with CEPA focal points towards translations in national languages and wide distribution.</p> <p>Encourage celebration of WWD 2003 by preparing and distributing widely the appropriate materials.</p> <p>Produce at least three issues of the <i>Ramsar Newsletter</i>.</p> <p>Respond in a timely manner to requests for information and printed materials.</p>					
--	--	--	--	--	--

**3.3.3** Prepare material, complementary to the existing Ramsar information package, to highlight specific regional issues and the benefits of membership for non-Contracting Parties. [SC regional representatives, Bureau, Partners]

This was done for Small Island Developing States and for west Asia.

**Target** - By COP8 to have produced such material for Africa.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Prepare, with UNCCD, a leaflet on the importance of wetlands in drylands.</p>	<p>Assist in the preparation of the special publication for Africa. (Achievements of the Swiss Grant Funds and lessons learned)</p>				

**3.3.4** Seek the support of an electronic communications carrier to provide and maintain an electronic mail network and electronic bulletin board/ mailing lists linking the Contracting Parties, Standing Committee members, the STRP, the Bureau, and partner organizations. [All]

The Convention's site on the World Wide Web is increasingly the Bureau's primary communication tool. During recent months, the site has received an average of 1,400 – 1,700 user sessions per day from 144 nations, with more than 170,000 Web pages viewed per month, and as of November 2001 the Ramsar site (formerly hosted by IUCN's Web site, but independent for the past 18 months) has grown to nearly 5,800 documents and images. In addition, there are several e-mail groups operating effectively (Ramsar Forum, Ramsar Exchange, STRP and STRP national focal points, Standing Committee, CEPA focal

points). The Outreach Programme proposes a continuing escalation in the use and application of the Internet as a communication tool of the Convention. With funds from the "Evian Project" (refer to 2.8.1 above), a number of developing country Administrative Authorities have been assisted to gain access to the Internet during this triennium.

**Target** - By COP8 to gain a sponsor(s) for the Convention's Web site, to ensure that all CPs have Internet access, to increase the use of French and Spanish in the Ramsar Web site, and to see over 300 Ramsar site managers also communicating with the Bureau, and each other, via the Internet.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue to maintain the Web site as the main communications tool. Keep under review the technical aspects of the site and its design. Add new sections as required.</p> <p>Obtain corporate sponsorship for the Web site, so as to add staff resources to this area of work.</p> <p>Continue to operate in an effective manner the various e-mail groups established by the Bureau, and add new ones if required.</p>	<p>Support the daily updating of the Web site with provision of relevant information.</p> <p>Continue to assist Administrative Authorities and other key institutions for the Convention in CPs with their access to Internet and email facilities.</p> <p>Make active use of e-mail groups for communications with CPs.</p> <p>Actively encourage the contributions to and use of the Ramsar Web-based resources.</p>	<p>Support the daily updating of the Web site with provision of relevant information.</p> <p>Continue to assist Administrative Authorities and other key institutions for the Convention in CPs with their access to Internet and email facilities.</p> <p>Make active use of e-mail groups for communications with CPs.</p> <p>Actively encourage the contributions to and use of the Ramsar Web-based resources.</p>	<p>Support the daily updating of the Web site with provision of relevant information.</p> <p>Continue to assist Administrative Authorities and other key institutions for the Convention in CPs with their access to Internet and email facilities.</p> <p>Make active use of e-mail groups for communications with CPs.</p> <p>Actively encourage the contributions to and use of the Ramsar Web-based resources.</p>	<p>Support the daily updating of the Web site with provision of relevant information.</p> <p>Continue to assist Administrative Authorities and other key institutions for the Convention in CPs with their access to Internet and email facilities.</p> <p>Make active use of e-mail groups for communications with CPs.</p> <p>Actively encourage the contributions to and use of the Ramsar Web-based resources.</p>	<p>Redevelop, and keep updated, the MedWet Web-site through the MedWet Coordination Unit.</p> <p>Actively encourage the contributions to and use of the Ramsar Web-based resources.</p>

**GENERAL OBJECTIVE 4**

**TO REINFORCE THE CAPACITY OF INSTITUTIONS IN EACH CONTRACTING PARTY TO ACHIEVE CONSERVATION AND WISE USE OF WETLANDS.**

**Operational Objective 4.2:** To identify the training needs of institutions and individuals concerned with the conservation and wise use of wetlands, particularly in developing countries, and to implement follow-up actions.

**4.2.3** Develop new training activities and general training modules, for application in all regions, concerning implementation of the Wise Use Guidelines, with specialized modules covering ..... [CPs, Bureau, Partners]

**Target** - To launch a major wetland manager training initiative under the Convention, possibly in partnership with one or more of the Convention's International Organization Partners, which can promote and take advantage of these new training tools. Refer also to 4.2.4 below regarding the Wetlands for the Future Initiative.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Continue chairing the Board of the International Course on Wetland Management organized annually by RIZA (The Netherlands) and contribute in the selection of participants.	<p>Main regional priorities for training are: wetland inventories, invasive species and wetland management planning. The regional team will:</p> <ul style="list-style-type: none"> <li>• Consult Ramsar partners for joint actions on training</li> <li>• Follow up the outcomes of the training activities sponsored by the SGF and the Swiss Grant for Africa</li> <li>• Continue to work with OMPO and seek further assistance for training of wetland managers</li> <li>• Encourage other institutions to sponsor training activities similar to the ones assisted by OMPO.</li> </ul>	Continue to administer the Wetlands for the Future Initiative, including the evaluation of proposals and final reports.	Seek ways of assisting capacity development of institutions in the region to implement training courses on wetland management (based on the RIZA model, and involving staff in the region who have received training through it).		Incorporate training modules in all new activities planned by MedWet, especially in North African and Balkan countries.
Continue to seek funding jointly with Wetlands International for the 'Wetlands Training Service designed to implement this action.		Where possible, continue to support participation of nationals from the region in wetland-related training courses.	Collaborate with partner organizations and interested agencies in exploring the possibility of developing a mechanism for training in the Asia region.	Establish with CPs their training needs, and contribute, as appropriate, to development and implementation of the proposed Training Framework.	

**4.2.4** Provide opportunities for manager training by: personnel exchanges for on-the-job training; holding pilot training courses at specific Ramsar sites; siting wetland manager training facilities at Ramsar sites; obtaining and disseminating information about training courses for wetland managers around the world. [CPs, Bureau, Partners]

**Target** - Refer to 4.2.3 above. Also to seek the resources from donors or interested CPs to establish Wetlands for the Future Initiatives for the Asia-Pacific, Eastern European and African regions.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue, and if possible expand, the Ramsar Bureau internship programme.</p> <p>The SAEDC to explore donors' interest in supporting training activities, and with Regional Coordinators opportunities for Wetland for the Future-type initiatives in other regions than the Neotropics .</p>	Continue to explore donors' interest in a Wetland for the Future-type initiative for Africa	As 4.2.3. Encourage CPs to identify wetland management training priorities.	<p>Continue to explore donors' interest in a Wetland for the Future-type initiative for Asia.</p> <p>Encourage CPs to identify wetland management training priorities.</p> <p><b>Oceania region</b> Promote attendance in Australian Wetland Managers Training Programme by SIDS</p>	Explore donors' interest in a Wetland for the Future-type initiative for countries in transition.	

			representatives from the region.  Continue to encourage training projects in PNG for submission to SGF and Evian.		
--	--	--	---	--	--

**GENERAL OBJECTIVE 5**

**TO ENSURE THE CONSERVATION OF ALL SITES INCLUDED IN THE LIST OF WETLANDS OF INTERNATIONAL IMPORTANCE (RAMSAR LIST).**

**Operational Objective 5.1: To maintain the ecological character of Ramsar sites.**

**5.1.3** Review and regularly update the Montreux Record (Res. 5.4, 5.5 and VI.1)

**Target** – CPs with sites in the Montreux Record, and for which Ramsar Advisory Missions have been completed prior to COP7, are expected to have taken the actions necessary to warrant their removal from the Record before COP8

<b>Global</b>	<b>Africa Region</b>	<b>Americas Region</b>	<b>Asia Region</b>	<b>European Region</b>	<b>MedWet</b>
<p>An ongoing role for the Bureau. Continue to remind CPs of their commitment under Article 3.2 of the Convention.</p> <p>Finalize proposals for presentation to COP8 on Article 3.2 reporting and the role and functioning of the Montreux Record, and the STRP's proposals for a Wetland Ecosystem Assessment Framework.</p> <p>Respond to and follow up on all expressions of concern about the ecological character of Ramsar sites.</p>	<p>An ongoing regional role. Follow up with Parties their commitment in relation to Article 3.2 and in taking appropriate management action to remove sites from the Record, notably where RAMs have been completed.</p> <p>Liaise with Botswana, Comoros, Guinea, the Gambia and Togo for possible inclusion of Ramsar sites on the Montreux Record.</p> <p>Liaise with Algeria, Democratic Republic of Congo, Egypt, Senegal, South Africa, and Uganda for update on the conservation status of Ramsar sites included in Montreux Record.</p>	<p>An ongoing regional role. Follow up with Parties their commitment in relation to Article 3.2 and in taking appropriate management action to remove sites from the Record, notably where RAMs have been completed.</p> <p>Continue the efforts to work with Uruguay on the removal of Bañados del Este from the Montreux Record.</p>	<p>An ongoing regional role. Follow up with Parties their commitment in relation to Article 3.2 and in taking appropriate management action to remove sites from the Record notably where RAMs have been completed.</p> <p><b>Oceania Region</b> An ongoing regional role, in 2001 to follow up with Parties their commitment in relation to Article 3.2</p>	<p>An ongoing regional role. Follow up with Parties their commitment in relation to Article 3.2 and in taking appropriate management action to remove sites from the Record notably where RAMs have been completed.</p>	

**5.1.4** Increase application of the Ramsar Advisory Missions (RAMs) to provide advice on future management of Ramsar sites. [CPs, SC, Bureau]

**Target** – refer to 5.1.2 and 5.1.3

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Continue to promote the use of the RAM mechanism as resources allow, engaging the assistance, as required, of external organizations, bodies or individuals.  Continue to pursue opportunities for joint missions where sites are also listed under the World Heritage Convention.	Undertake or arrange Ramsar Advisory Missions with the participation of partners as appropriate.	Undertake or arrange Ramsar Advisory Missions, with the participation of partners as appropriate.	Undertake or arrange Ramsar Advisory Missions, with the participation of partners as appropriate	Undertake or arrange Ramsar Advisory Missions, with the participation of partners and IUCN as appropriate	Participate in and/or facilitate Ramsar Advisory Missions in the Mediterranean region, as requested by the Bureau.

**5.1.6** Identify the potential impact on the ecological character of Ramsar sites of global threats, including toxic chemicals (Recommendation 6.14), climate change and sea level change. [STRP, Bureau, Partners]  
The STRP has responded in part to this action through the development of a Wetland Risk Assessment Framework (Resolution VII.10).

**Targets** - By COP8, to see the Wetland Risk Assessment Framework being regularly applied in all CPs. The STRP will prepare for consideration at COP8 a comprehensive review of the potential impacts of climate change on wetlands and the roles that wetlands can potentially play in mitigating the effects of climate change and sea level rise.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Finalize the STRP's reports on climate change and wetlands, for presentation to COP8	.				Develop a joint project with IUCN-Malaga office on the potential impacts of climate change on wetlands, and mitigation methodologies.

**Operational Objective 5.2:** To develop and implement management plans for all Ramsar sites, consistent with the Convention's Guidelines on Management Planning and emphasizing involvement of local communities and other stakeholders.

**5.2.1** Review the Guidelines on Management Planning in the light of practical experience and Recommendation 6.13. [COP]

**Target** - The STRP to prepare for consideration at COP8 the additional guidance on management planning recommended by the review undertaken in this triennium.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Finalize the STRP's new guidelines on management planning for presentation to COP8.  Finalize proposals for establishing the "San José Record" for presentation to COP8.	Contribute to finalizing the New Guideliens from the region's perpspective	Idem	Idem	Idem	Idem

**5.2.3** Ensure that, by the 8th COP (2002), management plans or other mechanisms are in preparation, or in place, for at least half of the Ramsar sites in each Contracting Party, beginning with pilot programmes at selected sites with input from local communities and other stakeholders. [CPs, Partners]

The National Reports for COP7 indicate that management plans are in place or being prepared for 416 or 44% of Ramsar sites at present (Resolution VII.12).

**Target** - By COP8 management plans will be in preparation, or in place, for at least three-quarters of the Ramsar sites in each CP and all CPs will seek to ensure that these are being implemented in full.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>The SAEDC to support development of pilot management plans for significant Ramsar sites in each region, including Africa (Okavango), Asia (Mekong), Neotropics (coral reefs and Pantanal), and North Africa.</p> <p>Support, with Regional Coordinators, the identification of suitable Ramsar sites for management planning development through the WWF Living Waters Programme.</p>	<p>Explore with partners possible avenues for support to management plans for Ramsar sites and contribute to joint actions such as the project on Lake Chad and the joint initiative on the Okavango Delta.</p> <p>Cooperate with WWF and other partners as appropriate and explore possible actions following the designation of new Ramsar sites, notably those designated through the WWF Living Waters Programme.</p> <p>Encourage submission of projects that support management plans for Ramsar sites (SGF, Swiss Grant for Africa, GEF and other sources of funding)</p> <p>Evaluate reports on existing initiatives relating to management of wetlands and draw lessons from these experiences (especially SGF and Swiss Grant projects).</p>	<p>Continue to promote the development and implementation of management plans for Ramsar sites.</p> <p>Encourage submission of projects that support management plans for Ramsar sites (SGF, GEF and other sources of funding)</p> <p>Evaluate reports on existing initiatives relating to management of wetlands and draw lessons from these experiences (especially SGF).</p>	<p>Continue to promote the development of management plans for Ramsar sites.</p> <p>Encourage submission of projects that support management plans for Ramsar sites (SGF, GEF and other sources of funding)</p> <p><b>Oceania Region</b> Encourage and assist PNG to submit proposal (SGF or other donors) for management planning on their Ramsar sites.</p>	<p>Disseminate relevant materials on wetland management and contribute to the work of STRP.</p> <p>Continue to promote the designation of new Ramsar sites, as well as the development and implementation of management plans for the designated sites.</p>	<p>Encourage development and implementation of management plans on sites with MedWet projects/ activities, including Prespa, Doran and Algerian wetlands.</p>

**Operational Objective 5.3: To obtain regularly updated information on wetlands of international importance, in accordance with the approved standard format.**

5.3.1 Ensure that the maps and descriptions of Ramsar sites submitted to the Ramsar Sites Database by the Contracting Parties at the time of designation are complete, in the approved standard format of the Information Sheet on Ramsar Wetlands, and provide sufficient detail to be used for management planning and monitoring of ecological character. [CPs, Bureau, Wetlands International]

project supported by NASA. This will include mapped information about Ramsar sites.					
---	--	--	--	--	--

**GENERAL OBJECTIVE 6**

**TO DESIGNATE FOR THE RAMSAR LIST THOSE WETLANDS WHICH MEET THE CONVENTION’S CRITERIA, ESPECIALLY WETLAND TYPES STILL UNDER-REPRESENTED IN THE LIST AND TRANSFRONTIER WETLANDS.**

**Operational Objective 6.1:** To identify those wetlands that meet the Ramsar criteria, and to give due consideration to their designation for the List.

**6.1.2** Establish, update and disseminate national scientific inventories of wetlands which identify potential Ramsar sites and wetlands of provincial or local importance in the territory of each Contracting Party. [CPs, Partners]

**Target** – By COP8 to have national wetland inventories completed by over 50 CPs and the information housed in databases (Refer 5.4.4) which are accessible globally.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Finalize the STRP’s guidance on a Framework for Wetland Inventory, for presentation to COP8.</p> <p>Continue discussion with Wetlands International regarding project development of standard inventory databases.</p> <p>The SAEDC to assist in identifying opportunities for donors’ support for national inventory work.</p>	<p>Encourage Parties to develop projects to carry out national and regional inventories, including through proposals to SGF.</p> <p>Encourage Parties to prepare proposals for undertaking wetland inventories with the support of the SGF, the Swiss Grant for Africa, or other sources.</p> <p>Follow up the outcomes of the African workshop on wetland inventories.</p> <p>Cooperate with Ramsar partners on possible joint actions on wetland inventories.</p>	<p>Encourage Parties to develop projects to carry out national and regional inventories, including through proposals to SGF.</p>	<p>Encourage Parties to develop national wetland inventory, including through proposals to SGF and participation in the Asian Wetland Inventory project, and to use these to identify potential Ramsar sites.</p> <p><b>Oceania region</b> Encourage national wetland inventory proposals to SGF and other sources, so as to assist countries in implementation or progress towards accession through identification and designation of Ramsar sites.</p>	<p>Encourage Parties to develop national wetland inventory, including through proposals to SGF, and to use these to identify potential Ramsar sites.</p>	<p>Continue to further refine and integrate the work on inventory done by ICN (Portugal) and EKBY (Greece) and encourage full use in Mediterranean countries, including the application of the MedWet Inventory methodology in North African countries.</p>

**6.1.3** Utilise information from regional wetland directories, national scientific inventories of wetlands and other sources, to begin development of a quantification of global wetland resources, as baseline information for considering trends in wetland conservation or loss. [Bureau, Partners]

- The Report prepared by Wetlands International (Refer to 5.4.4 and 6.1..2 above) on the extent of the global wetland resource provides an estimate of area, but not with great confidence given the poor state of wetland inventory globally.

**Target** - By COP8 to have undertaken a more detailed follow-up study to the Wetlands International Report to ensure that the Convention has available the best possible information relating the extent of the world’s wetland resources. As national wetland inventories are completed (refer to 6.1.2), include the findings into the global dataset.

Identify possible field projects for joint MedWet/AEWA action.
--	---	--	--	--	--

**7.2.6** Develop Ramsar’s contribution to wildlife trade issues affecting wetlands, through increased interaction with CITES. [Bureau]

- The *Guidelines for international cooperation under the Ramsar Convention* propose an escalation of the joint efforts between Ramsar and CITES (Resolution VII.19)

**Target** - A Memorandum of Cooperation with CITES, leading to a Joint Work Plan between the Conventions and which sees cooperative implementation of both at the international, national and local levels.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
If human resources allow, discussion of elements of an MoC and joint work plan will be initiated in 2002 with CITES secretariat and IUCN.					

**7.2.7** Initiate links with the United Nations Framework Convention on Climate Change, in view of the potential impacts on wetlands of climate change. [CP, Bureau]

- These links have yet to be established and this will be a priority over the next triennium.

**Target** - A Memorandum of Cooperation with UNFCCC, leading to a Joint Work Plan between the Conventions and which sees cooperative implementation of both at the international, national and local levels.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
See also 5.1.6. Further develop, with UNFCCC secretariat, a joint action plan during 2002, which will capitalise on the climate change work by STRP for COP8, on the basis of an updated version of IUCN’s 1999 position paper detailing the areas of potential cooperation, synergy and partnership. As a step to developing the work plan, with IUCN hold a workshop to involve the secretariats, IPCC, NGOs and other relevant groups.					Develop a project on climate change and its impact on Mediterranean wetlands, possible in collaboration with IUCN (see also 7.2.2).

**7.2.8** Extend cooperation with conventions and agencies concerned with conservation and wise use of wetlands at regional level, and in particular: with the European Community, as regards application of its Habitats Directive to wetlands, and adoption and application of measures like the Habitats Directive for wetlands outside the states of the European Union; with the Council of Europe (Bern) Convention on the conservation of European wildlife and natural habitats as regards the Pan-European Biological and Landscape Diversity Strategy; with the Barcelona Convention and Mediterranean Action Plan in relation to the MedWet initiative; with the Western Hemisphere Convention; with UNEP programmes, in particular the Regional Seas Conventions; and with the South Pacific Regional Environment Programme (SPREP). [CPs, Bureau]

- These links are at differing stages in their evolution and each will be advanced as resources allow over the next triennium.

**Target** - With the European Commission and SPREP - develop and sign a Memorandum of Cooperation, prepare and implement a Joint Work Plan. For Medwet, secure the long-term funding base for this important initiative and continue to develop new programmes of regional action. For the others referred to, and others which are appropriate, develop an appropriate working relationship.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>This area of Bureau activity will be pursued chiefly by the relevant regional teams.</p> <p>European Commission – further evaluate, through the SAEDC, the best course of action for putting in place a more formal understanding regarding cooperation.</p> <p>Continue to participate in the preparatory process for the WSSD, as appropriate. Provide advice to Ramsar Administrative Authorities on their involvement in the WSSD process at the national and regional levels.</p>		<p>Define joint actions that could be carried out with the Caribbean Environment Programme RCU within the Memorandum of Cooperation.</p> <p>Discuss possible cooperation agreement with CEC - Commission for Environmental Cooperation for North America, Conservation International, and CPPS.</p>	<p>Continue to pursue discussions on a possible memorandum of understanding between Ramsar Bureau and ASEAN (Association for South-East Asian Nations) Secretariat as a first step towards formalising the relationship between the Convention and ASEAN. Continue to build on initial dialogues with ROPME (Regional Organization for Protection of the Marine Environment) and MRC (Mekong River Commission).</p> <p>Continue to seek opportunities to establish dialogue with the secretariats of SAARC (South Asian Association for Regional Co-operation).</p> <p><b>Oceania Region</b> SPREP – implement SC25 decisions in relation to the Barbados Plan of Action.</p>	<p>Continue discussion with the European Commission on developing more formal understanding on cooperation.</p> <p>Continue to participate in the work of PEBLDS as appropriate.</p> <p>Pursue cooperation with the Habitats Group of HELCOM concerning coastal and marine conservaiton in the Baltic Sea.</p> <p>Develop understanding with the Council of Europe concerning the management of wetland sites listed in the Annexes of the Berne Convention.</p>	<p>Develop working contacts with the LIFE and SMAP units in the European Commission’s DG Environment, as well as with other DGs involved in environment and sustainable development.</p> <p>Continue to work with the Emerald Network (Council of Europe/Bern Convention) for possible joint projects.</p> <p>Support the RC for Europe in work related to PEBLDS.</p>

**7.2.9** Develop relationships with other specialized agencies that deal with wetland-related issues, such as the International Coral Reef Initiative (ICRI) and the World Water Council (Resolution VI.23). [Bureau]

**Target** - To progress to closer working relations with these and other relevant initiatives, as appropriate.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>ICRI – continue efforts to work more closely with ICRI and with other coral reef networks.</p> <p>World Water Council, Global Water Partnership – continue to push for wetland and water and the environment issues to be fully taken into account in the preparations for the 3<sup>rd</sup> World Water Forum (Japan, 2003) and through the development of partnerships under the River</p>	<p>Encourage the participation of CPs in the Global Water Partnership, International Coral Reef Initiative (ICRI), and GREEN and work with these programs and networks on suitable projects in the regions.</p>	<p>Encourage the participation of CPs in the Global Water Partnership, International Coral Reef Initiative (ICRI), and GREEN and work with these programs and networks on suitable projects in the regions.</p>	<p>Continue to maintain contact with SEATAC (South-East Asia Technical Advisory Committee, &amp; SASTAC ( South Asia Tec.) of the Global Water Partnership.</p> <p>Provide support to ICRI (International Coral Reef Initiative) activities in the region.</p> <p><b>Oceania Region</b> Support ICRI activities in the region, as resources permit.</p>	<p>Encourage the participation of CPs in the Global Water Partnership and other networks in the region, and work with these programs and networks on developing suitable projects.</p>	<p>See action 3 under 2.2.1</p>

Basin Initiative.  Contribute to the preparations for the 3 <sup>rd</sup> World Water Forum, including through the establishment of 'Virtual Forums' on wetlands and river basin management, and wetland management planning and water allocation.					
--	--	--	--	--	--

**Operational Objective 7.3:** To ensure that the development assistance community, and multinational corporations, follow improved wetland practices such as the Wise Use Guidelines in developing countries and countries whose economies are in transition.

7.3.1 Identify representative examples of best practice in wetland projects supported by development agencies and/or initiated by multinational corporations. [Bureau, Partners]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
To be done by the SAEDC in the course of his contacts with donor agencies.					

7.3.2 Work with multilateral and bilateral development agencies and multinational corporations towards a full recognition of wetland values and functions (Recommendation 4.13), and assist them to improve their practices in favour of wetland conservation and wise use taking account of the *Guidelines for Aid Agencies for Improved Conservation and Sustainable Use of Tropical and Sub-Tropical Wetlands*, published by OECD's Development Assistance Committee (Recommendation 6.16). [Bureau, Partners]

**Target** - At the Bureau level, to consider ways and means to increase its ability to work more systematically in this area, so as to increase the level of donor agency support for wetland conservation and wise use activities, and to see an increasing number of multinational corporations adopting voluntary codes of conduct for protecting wetlands.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
The SAEDC will give priority to developing further the working relations with the GEF and its implementing agencies (UNDP, UNEP and WB), European Commission, Parliament and Council, Asian Development Bank, and OECD/ DAC.	Work with the SAEDC, as appropriate.	Work with the SAEDC, as appropriate.	Work with the SAEDC, as appropriate, with special focus on formalising linkages with the Asian Development Bank.	Work with the SAEDC, as appropriate.	

7.3.3 Interact with multilateral development agencies and through bilateral development programmes, to assist developing countries in meeting their Ramsar obligations, and report on actions taken and results achieved (Recommendation 5.5). [CPs]  
Refer to 7.4.2 to 7.4.6 below.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
The SAEDC to consider providing training for national authorities on the setting up of environment funds.	Work with the SAEDC, as appropriate.	Work with the SAEDC, as appropriate.	Work with the SAEDC, as appropriate.	Work with the SAEDC, as appropriate.	Continue close collaboration with the SAEDC, as appropriate.

Seek to publish a Ramsar Handbook on financing the wise use of wetlands.  Further investigate potential interest for debt-for-wetland swaps as a means to finance restoration of degraded wetlands, in particular Ramsar sites.					
---	--	--	--	--	--

**Operational Objective 7.4:** To obtain funds to fulfil obligations contracted under the Convention, notably for developing countries and countries whose economies are in transition.

7.4.2 Include projects for conservation and wise use of wetlands in development plans funded by development assistance agencies, and ensure the latter consult the Ramsar administrative authority in each Contracting Party. [CPs]

**Target** - To see this trend escalate such that all eligible CPs are receiving donor support for a range of major wetland-related projects by the time of COP8.  
**Refer to 7.3.2 and 7.3.3 above.**

7.4.3 Maintain close working relations with multilateral agencies that provide development assistance in relation to project screening, development and evaluation, notably: .....[Bureau]  
 Refer to 7.3.2 and 7.3.3. above.

**Target** - By COP8 to have increased the Bureau’s capacity in this area and to see these relationships mature to full and frequent dialogue and advice.  
**Refer to 7.3.2 and 7.3.3 above.**

7.4.4 Mobilize direct funding support from multilateral and bilateral development assistance agencies, to assist developing countries and countries whose economy is in transition, in the conservation and wise use of wetlands and in implementation of the present Strategic Plan. [CPs. Bureau]

**Target** - By COP8 to have all the bilateral donors from appropriate CPs with funds earmarked for wetlands projects, and for all of these CPs to have in place mechanisms for consultation between the development assistance agency and their Ramsar Administrative Authority.  
**Refer to 7.3.2 and 7.3.3 above.**

7.4.5 Assist developing countries and countries whose economies are in transition to prepare wetland projects for funding by other agencies. [Bureau, Partners]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
The SAEDC to secure, in cooperation with the Regional Coordinators, a portfolio of at least two major wetland projects in each of the Ramsar regions for submission to potential bilateral and/or multilateral donors.	as 7.3.2.	as 7.3.2.	as 7.3.2.	as 7.3.2.	Follow up the development of a North African Wetlands Network, including missions to Morocco, Algeria, Tunisia, Libya and Egypt; identify specific collaborative activities; and submit funding proposals. Keep under review the establishment of a North African Wetlands Centre. Link development of North African activities with the GWP-Med framework.

7.4.6 Assist bilateral development assistance agencies in the screening, development and evaluation of wetland projects. [STRP, Bureau]

**Target** - Refer to 7.4.4.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Assistance and advice will be given as resources allow.	Assistance and advice will be given as resources allow.	Assistance and advice will be given as resources allow.	Assistance and advice will be given as resources allow.	Assistance and advice will be given as resources allow.	Assistance and advice will be given as resources allow

**GENERAL OBJECTIVE 8  
TO PROVIDE THE CONVENTION WITH THE REQUIRED INSTITUTIONAL MECHANISMS AND RESOURCES.**

**Operational Objective 8.1:** To maximize achievement of Ramsar’s mission and objectives by evaluating and, if necessary, modifying the Convention’s institutions and management structures.

**8.1.1** Reorganize, as of the 7<sup>th</sup> COP (1999), the meeting into a business session, focusing upon administrative matters, and a technical session, focusing upon wetland conservation and wise use priorities, with smaller working groups as required. [SC, Bureau]

**Target** – The Standing Committee to review the structure and organization of the Conference of Contracting Parties and adopt changes to facilitate its implementation and effectiveness.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Assist, support and advise the Standing Committee regarding these issues, and prepare the required documentation on these matters for COP8, including the <i>modus operandi</i> of the STRP and, as appropriate, proposals concerning Bureau staffing.	Assist CPs in preparing for COP8 through regional or subregional meetings in North Africa and West Africa, as resources permit.  Assist CPs in the use of the new National Reports format.	Assist CPs in preparing for COP8 through two regional or subregional meetings in 2002, as resources permit  Assist CPs in the use of the new National Reports format.	Assist CPs in preparing for COP8 through regional or subregional meetings in Saudi Arabia and Iran,  Assist CPs in the use of the new National Reports format.  <b>Oceania Region</b> As above.		Complete the establishment of the MedWet Coordination Unit. Seek to ensure that all legal and institutional arrangements are in place by COP8 for the long-term establishment of the Unit, with the necessary political and financial support.  Continue preparations for the 5th meeting of the Mediterranean Wetlands Committee (Turkey).  Coordinate MedWet presence and inputs to COP8.

**8.1.2** Keep under review the regional representation in the Standing Committee as the number of Contracting Parties increases. [COP, SC]

Refer to Resolution VII.1 entitled *Regional categorisation of countries under the Convention and composition, roles and responsibilities of the Standing Committee, including duties of Standing Committee members*

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
The Bureau will provide support to the Standing Committee and STRP as required on issues of regionalisation.	Provide support to the African Regional members of Standing Committee and STRP as required.	Provide support to the Americas Regional members of Standing Committee and STRP as required.	Provide support to the Asia Regional members of Standing Committee and STRP as required.  <b>Oceania Region</b> As above.	Provide support to the European Regional members of Standing Committee and STRP as required.	

**8.1.4** Review the working priorities of the Scientific and Technical Review Panel (STRP) at each meeting of the COP. [COP, SC]

These priorities are determined by the Convention’s Work Plan and the Resolutions and Recommendations adopted by COP7.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Continue to urge those CPs which have yet to designate their STRP National Focal Point to do so.</p> <p>Provide support for the involvement of STRP National Focal Points, including management of the STRP e-mail listserve.</p> <p>Prepare draft STRP work plan, and make it available to CPs with the call for nominations for members of the STRP for the next triennium, and to COP8 for consideration of STRP priority tasks for 2003-2005.</p> <p>Finalize proposals to COP8 concerning changes to the <i>modus operandi</i> of the STRP.</p>	Facilitate the involvement of National Focal Points.	Facilitate the involvement of National Focal Points.	Facilitate the involvement of National Focal Points.	Facilitate the involvement of National Focal Points.	

**8.1.5** Review requirements for the Bureau's staff structure and size in line with decisions on programme, and review linkages between the Bureau, other convention secretariats and partner organizations. [COP, SC]  
**Resolution VII.4 reviews linkages between the Bureau and other Convention secretariats, and Resolution VII.3 between the Bureau and International Organization Partners.**

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Provide advice to the Standing Committee and COP8 on staff matters and seek to find ways and means to increase the Bureau capacity to absorb significantly larger demands, due to the Convention's increased visibility.					

**8.1.6** Evaluate and report on the implementation of the Strategic Plan at each meeting of the COP and prepare for every other meeting a draft Strategic Plan for the forthcoming two triennia. [COP, SC, Bureau]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Finalize the draft Strategic Plan 2003-2008 and the Convention's Work Plan 2003-2005 for consideration by COP8. Seek submission from CPs of their national implementation targets for 2003-2005, so as to develop	Regional/subregional CPs meetings will review the draft 2003-2008 Strategic Plan.	Regional/subregional CPs meetings will review the draft 2003-2008 Strategic Plan.	Regional/subregional CPs meetings will review the draft 2003-2008 Strategic Plan.  <b>Oceania Region</b> As above.		Continue to provide input to the preparation of the draft Strategic Plan.

global targets for the Convention's Work Plan .					
---	--	--	--	--	--

8.1.7 Prepare annual Bureau Business Plans, based on the Strategic Plan and Triennial Programmes approved by the COP, for the consideration and approval of the Standing Committee. [SC, Bureau]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Prepare the Bureau Work Plan for 2003 for consideration by the Standing Committee.	Contribute to the preparation of the Work Plan 2003	Contribute to the preparation of the Work Plan 2003.	Contribute to the preparation of the Work Plan 2003.  <b>Oceania Region</b> As above.	Contribute to the preparation of the Work Plan 2003.	Contribute to the preparation of the Work Plan 2003.

8.1.8 Develop liaison mechanisms based with Contracting Parties or partner organizations to enhance implementation of the Convention in the regions, in coordination with the Bureau. [CPs, Bureau, Partners]

**Target** - To see more of these types of arrangements being supported by CPs.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Following establishment of the MedWet Coordination Unit in Greece, no new arrangements of this type are envisaged.			<b>Oceania Region</b> Continue the collaboration in relation to the Pacific island states with Wetlands International – Oceania, based in Canberra and supported by the Australian Government.		

8.1.9 Promote the establishment of National Ramsar Committees to provide the opportunity for input from, and representation of, governmental and non-governmental organizations, key stakeholders, indigenous peoples, the private sector and interest groups, and land use planning and management authorities. [CPs, Bureau, Partners]

**Target** – By COP8 to see a co-ordinating mechanism in place in all CPs, and more particularly to see National Ramsar Committees including government and non-government stakeholder representatives in place in more than 100 CPs. In addition, by COP8 all CPs that have reported the existence of NRCs at COP7 to have evaluated their effectiveness

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Prepare review of membership, terms of reference and operations of National/ Wetland Committees, based on COP8 National reports, for consideration by SC Subgroup on COP8 and transmission to COP8 (Res. VII.27)	Promote the establishment of National Ramsar Committees in Parties lacking them in the region and encourage effective operation of existing ones.  Seek opportunities to participate in, or provide input for the preparation of, meetings of National Ramsar Committees.	Promote the establishment of National Ramsar Committees in Parties lacking them in the region and encourage effective operation of existing ones.  Seek opportunities to participate in, or provide input for the preparation of, meetings of National Ramsar Committees.	Promote the establishment of National Ramsar Committees in Parties lacking them in the region and encourage effective operation of existing ones.  Seek opportunities to participate in, or provide input for the preparation of, meetings of National Ramsar Committees.  <b>Oceania region</b> Encourage establishment of a National Ramsar Committee and Wetlands Policy in PNG.	Promote the establishment of National Ramsar Committees in Parties lacking them in the region and encourage effective operation of existing ones.  Seek opportunities to participate in, or provide input for the preparation of, meetings of National Ramsar Committees.	

**8.1.11** Establish and ensure regular implementation of processes for evaluating the effectiveness and efficiency of all Ramsar Convention institutions, mechanisms, and programmes, including National Reports to the COP (Resolution VI.21); implement recommendations arising, and report to the COP and Standing Committee on the results obtained. [COP, SC, Bureau]

- The Standing Committee at its 24<sup>th</sup> meeting will review the National Report format from COP7 and adopt the format for COP8. This is to distributed to all CPs in early 2000.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>The National Planning Tool and National Report format was provided to CPs in 2000. The Bureau will continue to review the progress by CPs in using this tool, including timely submission by CPs of their National Reports to COP8.</p> <p>Prepare for consideration by Standing Committee and COP8 Parties' achievements towards meeting the global and regional targets under the Convention Work Plan 2000-2002.</p>	<p>Through subregional/regional workshops and meetings:</p> <p>seek feedback on the effectiveness and efficiency of all Ramsar Convention institutions and programmes.</p> <p>Analyse National Reports for reporting on regional implementation to COP8.</p>	<p>Through subregional/regional workshops and meetings:</p> <p>a. seek feedback on the effectiveness and efficiency of all Ramsar Convention institutions, and programmes.</p>	<p>Through subregional/regional workshops and meetings:</p> <p>seek feedback on the effectiveness and efficiency of all Ramsar Convention institutions, and programmes.</p> <p><b>Oceania Region</b> As above.</p>	<p>Analyse National Reports for reporting on regional implementation to COP8.</p>	

**Operational Objective 8.2:** To provide the financial resources required to carry out Ramsar activities.

**8.2.3** Ensure the Bureau has adequate staff to play a catalytic role in presenting projects to potential donors for funding. [COP]

**Target** – The Bureau to consider establishing a post of Development Assistance Officer by 1 January 2000 (Resolution VII.28).

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Prepare review of the work of the Senior Advisor – Environment &amp; Development Cooperation (SAEDC) for Standing Committee and COP8 consideration.</p>					

**8.2.4** Give priority to funding for training programmes, education and public awareness work, development of the Ramsar Database, and the Convention's Communications Strategy. [CPs, Bureau, Partners]

**Target** - To secure the resources needed to establish regional training initiatives (like Wetlands of the Future) in other regions, to allow the Bureau to progress the implementation of the Outreach Programme and to support the proposed developments for the Ramsar Sites Database into a fully online and Web-based promotional and planning tool of the Convention.

**Refer to actions under General Objective 4.**

**Operational Objective 8.3:** To maximize the benefits of working with partner organizations.

**8.3.1** Strengthen cooperative planning mechanisms with the partners and improve communications and information exchange, including exchange of staff. [CPs, Bureau, Partners]

**Refer to 8.3.2.**

**8.3.2** Review and renew formal agreements with partners to ensure there is no duplication of effort and to maximise effective use of resources, and establish new partnerships, especially in relation to the Wise Use Guidelines.

**Target** – To review the existing cooperative arrangements with all International Organization Partners by 31 December 1999 and in the light of COP7 decisions.

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
<p>Work with the IOPs to review existing memoranda of cooperation, as required, including preparation of an MoC with WWF.</p> <p>Encourage each IOP to prepare a work plan for the next triennium linked to the Convention's Work Plan 2003-2005, in order to achieve a systematic view of their contribution to the work of the Convention, and establish their lead areas of activity in supporting the Convention.</p> <p>Coordinate as much as possible with the IOPs the Bureau work with the donor agencies.</p>	Work with regional and country offices of the IOPs in the implementation of the Work Plan 2002	Work with regional and country offices of the IOPs in the implementation of the Work Plan 2002.	Work with regional and country offices of the IOPs in the implementation of the Work Plan 2002.	Work with regional and country offices of the IOPs in the implementation of the Work Plan 2002.	Act as the focal point for Ramsar cooperation with Ramsar IOPs in the region, in particular the WWF Mediterranean Programme (based in Rome) and the IUCN Mediterranean Office (Malaga).

**Operational Objective 8.4:** To secure at least one million US dollars per annum for the Ramsar Small Grants Fund for Wetlands Conservation and Wise Use (Resolutions 5.8 and VI.6) and to allocate these funds effectively.

8.4.1 Develop a strategy for securing at least one million US dollars annually for the Ramsar Small Grants Fund, to be approved by the first full meeting of the Standing Committee after the 6<sup>th</sup> COP (1996) and proceed immediately to its implementation. [Bureau, SC, CPs, Partners]

- Refer to Resolution VII.5.
- The contributions to the SGF remain unpredictable on a year by year basis.

**Target** - To establish a mechanism to ensure one million US dollars annually for the Ramsar Small Grants Fund (Resolution VII.28).

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
Subject to approval by SC26, establish a Ramsar Trust Fund for the SGF and seek contributions to this fund.					

8.4.2 Evaluate critically, at the 7<sup>th</sup> COP (1999), the performance of the Small Grants Fund. [COP, SC, Bureau]

Global	Africa Region	Americas Region	Asia Region	European Region	MedWet
To be revisited, in particular in relation to the advisability or not of maintaining the SGF, if no effective funding mechanism can be established before COP8 (see 8.4.1).					

**8.4.3** Encourage and assist the preparation of high quality applications to the Small Grants Fund. [SC, Bureau, Partners]  
Refer to the review of the SGF – Resolution VII.5 - for suggested improvements to be made in this area in the next triennium.

<b>Global</b>	<b>Africa Region</b>	<b>Americas Region</b>	<b>Asia Region</b>	<b>European Region</b>	<b>MedWet</b>
<p>Continue with the SGF cycle in 2002 and prepare recommendations for Standing Committee on projects to be funded.</p> <p>Consider opportunities for CP training in the preparation of SGF proposals, based on the guidance prepared by the SAEDC on project proposal development, so as to improve the quality of applications.</p>	<p>Review Africa SGF proposals and manage and keep under review the current SGF projects. ## Section II Administration Work Plan 2002

1. Financial administration
2. Project management and reporting
3. Personnel management
4. Meeting preparations and logistics

The actions described in this Section are mostly to be undertaken by the Finance Team (Ibrahim Shaame, Accountant, and Paulette Kennedy, Finance Assistant and Projects Administrator) and the Administration Coordinator (Annette Keller), assisted by the Office Clerk (Montse Riera).

### 1. Financial Administration

#### Core budget administration

In addition to day-to-day management, monitoring and reporting of the core budget, the following actions will be required for 2002 and beyond.

- a) Prepare financial reports, including audited accounts for 2001 and the 2002 budget projection for review by the the Standing Committee.
- b) Send reminders of unpaid invoices twice yearly.
- c) Invoice Parties for 2003 dues.
- d) Administer the COP8 budget.

#### General Administration

##### Monthly:

- Petty Cash
- Long distance telephone calls
- Annual contributions - to date (acknowledge each with a Diplomatic Note)
- Projects - Income and Expenditures
- Investment of surplus funds

##### Year-End Statements for:

- Core Budget
- Projects with earmarked contributions
- Annual Contributions

##### Standing Committee Statements:

- Core Budget
- Projects with earmarked contributions
- Annual Contributions
- Bureau budget projection for 2003 (subject to COP8 approval of budget for 2003-2005)

##### COP8

- Finalize draft triennial budget for consideration by COP8
- Triennial report on Projects with earmarked contributions

### 2. Project management and reporting

**Small Grants Fund (activities in conjunction with Regional Coordinators and Interns)**

Implement the SGF in accordance with the Operational Guidelines 2000-2002 and the internal system for the SGF projects administration established in early 2000.

Prepare new Guidelines for the SGF for 2003-2005 on the basis of decisions taken by COP8 for submission to the Standing Committee in February 2003.

#### **Wetlands for the Future, Swiss Grant for Africa, and Evian Projects**

During 2002 the Bureau will continue to administer funds provided by the USA for the Wetlands for the Future Initiative and by Switzerland for projects in Africa, as well as the Bureau's corporate sector partnership with the Danone Group – the Evian project.

#### **Other projects supported or administered by the Bureau**

As required, administer projects supported by either core or external funds, including funds for the MedWet Initiative, for example.

#### **Reporting to donors**

Continue the reporting to donors and generally build on the good relations with donors that the Bureau currently enjoys.

**Support the Senior Advisor on Environment and Development Cooperation** in his work in general and in particular in relation to his efforts for the establishment of a funding mechanism for the SGF.

### **3. Personnel Management**

As required, provide general support to the senior managers of the Bureau with respect to all aspects of staff recruitment and termination of services.

Support necessary personnel management activities as instructed by the Secretary General. This includes but is not limited to the following:

- maintain staff files (on current staff, past staff, applicants, and general directives)
- liaise with IUCN's Human Resources Management Division on Ramsar staff issues, including the drawing up of staff contracts as required
- prepare draft position vacancies
- prepare letters for staff who have successfully completed their probation period
- prepare or draft letters of reference
- recruit and interview for administrative support positions within the Bureau
- write appointment or rejection letters.

Finalize Bureau Procedures Manual.

#### **The Internship program** (4 interns for a period of 12 to 18 months each)

- Respond to inquiries
- Receive and acknowledge applications
- Process rejection, short list letters and final rejection letters.
- Assist interns with their arrival, settling in, and departure arrangements.
- Manage the four apartments rented by the Bureau in Gland to provide accommodation to the interns.

### **4. Meeting preparations and logistics and general office administration**

#### **Preparations for the meeting of the Standing Committee Subgroup on COP8 Meeting**

Provide organizational and logistical support for the meeting of the Standing Committee Subgroup on COP8, to be held in May 2002. This will include all general meeting arrangements (travel, accommodation, venue arrangements) as well as the distribution of papers, etc.

**Support to other Ramsar meetings**

Assist Regional Coordinators with their provision of organizational, logistical and financial support for subregional preparatory meetings for COP8 to be held during 2002 (provisionally in Iran, Saudi Arabia, Algeria, West Africa, Ecuador and Bahamas).

**COP8**

Provide organizational and logistical support for the 8<sup>th</sup> meeting of the Conference of the Contracting Parties, to be held in November 2002. This will include all general meeting arrangements (travel, accommodation, venue arrangements) as well as the distribution of papers, etc.

Raise funds for sponsored delegates from developing countries and countries in transition and make all the necessary arrangements for their participation.

**General office administration**

Ensure an efficient functioning of the office concerning use of space, office supplies and equipment, publications and documents storage and distribution, archives and files maintenance, mail reception and dispatching, etc.
